

Contents

Part 1

General Principles

Chapter 1 Principles of Ultrasonography and Types of Ultrasound Imaging	3
Principles of Ultrasound Laminagraphy . . .	3
Static Scanning (Contact)	4
Dynamic Imaging (Real-time)	8
Mechanical Scanners	8
Arrays (Linear, Curved, Phased)	8
Doppler Ultrasound	13
Interventional Sonology	13
Other Techniques	13
Contact and Real-time Scanning in 1989 . . .	13
Image Quality	14
Spatial Resolution	14
Contrast Resolution	17
References and Further Reading	18

Chapter 2 Types of Tissue Echo Pattern and Artifacts	21
Contour Images	21
Tissue Images	21
Liquid and Solid Regions	21
Semisolid Echotexture	24
Tissue Identification or Characterization . . .	25
Ultrasound Contrast Agents	25
Tubular Images	25
Duplex Imaging	26
Artifacts	26
Acoustic Shadowing	26
Other Artifacts	30
Slice-Thickness Artifacts	30
Reverberation and Comet Tails	30
Mirror Artifacts	32
Artifacts Behind Cysts	32
Artifacts of Velocity	32
References and Further Reading	35

Chapter 3 Examination Methods and Positioning	37
Preparation of the Patient	37

Positions and Scanning Planes	37
Ultrasonically Guided Biopsy and Drainage . .	38
Choice of Ultrasound Equipment	38
Documentation	41
Who Should Conduct the Examination? . . .	41
References and Further Reading	41

Chapter 4 An Anatomic Guide in Examination of the Upper Abdomen: Echoangiography	43
The Aorta	43
Branches of the Aorta	48
The Vena Cava	54
Branches of the Vena Cava	61
The Portal System	64
References and Further Reading	72

Part 2

The Liver

Chapter 5 Examination Techniques	75
Choice of Techniques	75
Failures	75
Views and Patient Positions	75
Preparation of the Patient	80
Doppler Examination	82
Intraoperative Ultrasound Examination . .	82
Ultrasonographically Guided Biopsy	82
References and Further Reading	82

Chapter 6 Sonoanatomy of the Liver	83
General Shape and Contours	83
Contours	83
Size	94
Hepatic Parenchyma	96
Tubular Structures	96
Sectorial and Segmental Anatomy	101
Ultrasonographic Anatomic Relations	104
Conclusion	104
References and Further Reading	105

Chapter 7 Hepatomegaly and Diffuse Liver

Diseases	107
The Criteria for Hepatomegaly	107
Relations of the Liver to the Costal	
Margin; Angle and Tangent Signs	107
Liver and Costal Margin	107
The Tangent Sign	107
The Angles	107
Intercostal Bulges	107
Liver Volume	107
Nonspecific Hepatomegaly	110
Cardiac Liver	110
Hepatitis	115
Congenital Fibrosis	116
Other Nonspecific Hepatomegalies	117
Storage Diseases	117
References and Further Reading	119

Chapter 8 Metastases 121

Technical Data	121
Elementary Signs	121
Contour Abnormalities	121
Changes in Echotexture	122
Nodules	122
Tubular Signs	131
Discussion of the Elementary Signs	131
The Bump Sign	131
The Margin Sign	131
Hypoechoic Regions	131
Hyperechoic Regions	137
Ultrasound Features of Hepatic Metastases	137
Solitary Nodules	137
Multiple Nodules	139
Histologic Correlations	141
Lymphomas and Lymphoid Splenomegaly	142
Hepatic Signs	142
Associated Signs	142
Metastases and Chemotherapy	146
Interventional Sonology	146
Differential Diagnosis	146
Reliability and Diagnostic Strategy	146
Conduct of the Examination and Final	
Diagnosis	147
References and Further Reading	148

Chapter 9 Primary Tumors of the Liver 151

Malignant Tumors	151
Hepatocellular Carcinomas	
(Hepatocarcinoma) Fibrolamellar	
Hepatocarcinoma, Cholangiocarcinoma	151
Diagnosis of Lesions	151
Diagnosis of Spread	151
Distal Spread	156

Interventional Sonology and Radiology in	
Hepatocarcinoma	158
Benign Tumors	159
Adenomas and Focal Nodular	
Hyperplasia	159
Hamartomas	162
Cystadenomas	162
Lipomas and Angiomyolipomas	162
Vascular Tumors	162
Reliability and Diagnostic Strategy	167
The Ultrasonographic Follow-up of	
Transplanted Livers	168
Morphologic Analysis	168
Ductal Structures and Parenchyma	168
Juxtahepatic Fluid Collection	169
Doppler Studies	169
Rejection	170
References and Further Reading	177

Chapter 10 Cirrhosis and Portal Hypertension 179

Morphologic Appearances of Cirrhosis	179
Hepatomegaly and the Bright Liver	179
Steatosis, Fibrosis, and Hepatic Retraction	179
Advanced Fibrosis	180
Associated Abnormalities	187
Splenomegaly	187
Ascites	187
Jaundice	187
Hepatocarcinoma	187
Portal Hypertension	191
Etiological Factors in Portal Thrombosis	199
Budd-Chiari Syndrome	199
Differential Diagnosis	201
Screening for Hepatocarcinoma	201
References and Further Reading	201

Chapter 11 Abscesses, Cysts, and Parasitoses 205

Abscesses	205
Bacterial Abscesses	205
Amebic Abscesses	211
Congenital Cysts and Biliary Cysts	212
Parasitic Cysts	220
The Common Hydatid Cyst	220
Alveolar echinococcosis	232
Other Parasitoses	237
References and Further Reading	237

Chapter 12 Differential Diagnosis 239

Confusing Juxtahepatic Images	239
Hypoechoic Images	239
Hyperechoic Images	239
Confusing Anatomic Intrahepatic Images	240
Hypoechoic Anatomic Images	240

Hyperechoic Anatomic Images	242
Contour Images	242
Diagnosis of Liver Diseases	243
References and Further Reading	246

Chapter 13 The Postoperative Liver	247
References and Further Reading	253

Chapter 14 Juxtahepatic Liquid Collections, Peritoneum, and Ascites	255
Juxtahepatic Collections	255
Subcapsular Collections	255
Subdiaphragmatic Collections	257
Supradiaphragmatic Collections	258
Pleural Effusions	258
Other Supradiaphragmatic Collections	258
Peritoneal Effusions	262
Small Effusions and the Anatomy of the Ligaments and Peritoneal Recesses	262
Perihepatic Recesses	262
Juxtaplenic Recesses	267
The Mesentery	267
Paracolic Gutters	267
Pelvis	267
Lesser Sac	271
Mesocolon	271
Foramen of Winslow	271
Peritoneal Anatomy: Comparison of Ultrasound and Computed Tomography	280
Abundant Ascites	280
Rare Types of Ascites	288
Pneumoperitoneum	291
References and Further Reading	291

Part 3 The Bile Ducts

Chapter 15 The Bile Ducts: Examination Techniques and Sonoanatomy	295
Examination Techniques	295
Gallbladder	295
Main Bile Duct	296
Intrahepatic Bile Ducts	296
Interventional Sonology	296
Sonoanatomy	297
Gallbladder	297
Shape and Position	297
Gallbladder Wall	298
Contents	299
Size	299
Relations	304
Visualization and Nonvisualization	308

Main Bile Duct	309
Biliary Convergence and Intrahepatic Bile Ducts	311
References and Further Reading	313

Chapter 16 Biliary Lithiasis and Cholecystitis	315
Gallstones	315
Direct Sign	315
Indirect Sign	325
Gallbladder Filled with Calculi	326
Hydrops of the Gallbladder	327
Differential Diagnosis and Pitfalls	328
Direct Findings of Lithiasis	328
Papillomas	328
Indirect Signs	328
Pseudocalculi Due to Parasites	331
Hydrops of the Gallbladder	331
Lithiasis of the Common Bile Duct	331
Intrahepatic Calculi	335
Cholecystitis	335
Acute Cholecystitis	335
Gallbladder Wall	335
Gallbladder Contents	337
Pain	337
Associated Signs	337
Diagnosis of Acute Cholecystitis	341
Thickening of the Wall	341
Lithiasis and Localized Tenderness	343
Chronic Cholecystitis	343
General Reliability of Biliary Ultrasonography	343
Interventional Sonology	344
References and Further Reading	344

Chapter 17 Rare Abnormalities of the Bile Ducts, Congenital Anomalies, and Tumors	349
Cysts of the Bile Ducts	349
Caroli's Syndrome (Ectasia of the Intrahepatic Bile Ducts)	349
Aerobilia	349
Sclerosing Cholangitis	353
Tumors of the Gallbladder	353
Benign Tumors	353
Malignant Tumors	356
Small Tumors	356
Large Tumors	358
Differential Diagnosis	361
Tumors of the Bile Ducts	362
Extrahepatic	362
Intrahepatic	362
The Shell Sign	362
References and Further Reading	363

Part 4**The Pancreas and Retroperitoneal Space****Chapter 18 Examination of the Pancreas:**

Techniques	367
Review of Anatomy	367
Views and Sectional Planes	371
Endoscopic and Intraoperative Ultrasonography	374
References and Further Reading	374

Chapter 19 Sonoanatomy of the Pancreas 377

Position	377
Anatomic Landmarks	377
Superior Mesenteric Vessels	377
Splenic Vein	383
Left Renal Vessels	384
Topography	385
Shape	386
Size	387
Echotexture of the Normal Pancreas	388
Status of Adjacent Vessels	390
Pitfalls	391
Congenital Anomalies	394
References and Further Reading	394

Chapter 20 Acute Pancreatitis 395

Special Examination Techniques	395
Pancreatic Swelling	395
Contours	400
Echotexture	401
Liquid Collections	406
Evolution	408
Abscesses	408
Postoperative Complications	410
Diagnostic Strategy	412
References and Further Reading	413

**Chapter 21 Fluid Collections of Pancreatic
Origin and Pseudocysts** 415

Definition	415
Collections in Situ	415
Evolution of Pseudocysts	418
Migrating Collections	424
Pancreatic Trauma	429
Diagnostic Strategy and Other Diagnostic Methods	429
References and Further Reading	430

Chapter 22 Chronic Pancreatitis 431

Echotexture	431
Contours	436

Size	438
Acute and Subacute Pancreatitis Developing on Chronic Pancreatitis	438
Tubular Structures	439
Associated Signs	442
Reliability of Ultrasonography and Relations to Other Diagnostic Methods	443
References and Further Reading	443

Chapter 23 Pancreatic Tumors 445

General Ultrasonographic Signs	445
Tumefaction	445
Contours	445
Echotexture	447
Associated Signs and Spread	453
Rare Tumors	456
Endocrine Tumors – Nesidioblastomas and Apudomas (Insulinomas, Gastrinomas)	456
Cystic Tumors – Cystadenomas and Cystadenocarcinomas	458
Pancreatic Metastases and Lymphomas	461
Relation of Ultrasonography to Other Diagnostic Methods	462
Reliability	462
Strategy	464
Guided Therapeutic Puncture	465
References and Further Reading	465

**Chapter 24 Pancreatic Disease: Overview,
Differential Diagnosis, and Diagnostic
Strategy** 469

References and Further Reading	472
--	-----

**Chapter 25 Humps, Lumps, and Sumps:
Differential Diagnosis of Pancreatic Diseases** 475

Normal Stomach and Intestines	475
Duodenum and Stomach	475
Duodenum	475
Stomach	476
Esophagogastric Junction	478
Colon	481
Jejunum and Ileum	485
Malrotation of the Gut	487
Intraperitoneal and Retroperitoneal Abdominal Tumors and Pseudotumors	488
Gastric and Intestinal Tumors	488
Pitfalls Other than Tumors	496
Liquid Images	496
Solid Masses	497
Nonpancreatic Retroperitoneal Tumors	504
Adenopathy	504
Other Retroperitoneal Tumors	516

Summary	516
References and Further Reading	519
Chapter 26 Jaundice	521
Examination Technique	521
Diagnosis of Dilatation of the Biliary Tree	521
Gallbladder	521
Extrahepatic Bile Ducts	523
Shotgun Sign	523
Confusing Images (False Shotgun)	528
Transitory Dilatation	534
Intrahepatic Bile Ducts	535
Diagnosis of the Level of Obstruction	536
Etiological Diagnosis	538
Lithiasis	538
Intrahepatic Lithiasis	538
Choledochal Lithiasis	538
Pancreatic and Ampullary Obstructions and Infiltration of the Distal Common Bile Duct	541
Suprapancreatic Obstruction	548
Hilar and Intrahepatic Obstructions	548
Congenital Anomalies	552
Postoperative Jaundice	552
Hepatitis-Induced Intrahepatic Cholestasis	552
Reliability and Radiologic Strategy	552
References and Further Reading	554

Part 5

The Spleen, the Acute Abdomen, and Emergencies

Chapter 27 The Spleen: Examination Techniques and Sonoanatomy	559
Examination Techniques	559
Without Splenomegaly	559
Splenomegaly	560
Sonoanatomy	561
General Shape and Contours	561
Echotexture	562
Accessory Spleen, Wandering Spleen, and Polysplenia	562
Anatomic Relations	568
Particular Appearances	569
Size Criteria	569
Chapter 28 The Pathologic Spleen	571
Nonspecific Splenomegaly	571
Splenic Lesions of Lymphomas and Other Tumors	574
Lymphomas	574

Other Tumors	577
Benign	577
Malignant	577
Cysts	579
Infarcts, Spontaneous Hematomas, and Abscesses	581
Infarcts and Hematomas	581
Abscesses	583
Spontaneous Ruptures and Traumatic Lesions	583
Differential Diagnosis	583
Reliability and Diagnostic Strategy	585
References and Further Reading	586

Chapter 29 The Acute Abdomen – Abscesses, Hematomas, and Postoperative Collections	587
Special Techniques	587
Abscesses	587
General Characteristics	587
Echotexture	587
Contours	587
Topography	591
Extraperitoneal Abscesses	591
Intraperitoneal Abscesses	591
Postoperative Collections	592
Abscesses	592
Other Collections	594
Foreign Bodies	595
Evolution	595
Hematomas	595
General Characteristics	595
Topography	596
Evolution	598
The Acute Abdomen	602
Acute Painful Right Upper Quadrant	604
Acute Painful Left Upper Quadrant	605
Painful Syndromes with Shock	605
Acute Appendicitis	616
Syndromes of Intestinal Obstruction	616
Acute Abdominal Complications of AIDS	617
Abdominal Trauma	618
Traumatic Lesions of the Liver	618
Traumatic Lesions of the Spleen	625
Pancreatic Trauma	631
Intestinal Contusions	633
Other Lesions	634
Interventional Sonology	634
Reliability of Ultrasonography – Comparison with Other Procedures	634
Conclusion	634
References and Further Reading	634

Part 6

Conclusion

<i>Chapter 30</i> Some Practical Advice, or, How to Do Better than We Did	639
Choice of Ultrasonographic Apparatus	640
Sophisticated, Specialized, Automated, and Basic Apparatus	642
Practical Training	643
 Subject Index	 645
