

Roland Hausser

Computation of Language

An Essay on Syntax, Semantics
and Pragmatics in Natural
Man-Machine Communication

Foreword by Dana Scott

Introduction	3
 PART I Natural Language and Formal Grammar	 9
 1 Goals and Results	 11
1.1 A Unified Perspective	11
1.2 Assumptions Accepted and Assumptions Rejected	13
1.3 Theory and Practice	16
1.4 Summary of the Formal Results	19
1.5 Applications and Future Work	21
 2 Grammar and Interpretation	 23
2.1 Limitations of Constituent Structures	23
2.2 Basic Communication	25
2.3 Database Semantics and Pragmatic Interpretation	27
2.4 Criteria of Adequacy of Grammar	30
2.5 Current Paradigms	32
 3 Outline of Left-Associative Grammar	 35
3.1 Left-Associative Syntax	35
3.2 NEWCAT parsers	38
3.3 Semantic Interpretation	42
3.4 An Example	46
3.5 Two Fallacies of Constituent Structure	50
 4 Continuations in Natural Language	 55
4.1 Scheduling Access to Grammatical Information	55
4.2 Agreement	65
4.3 Valency	74
4.4 Word Order	79
4.5 Pronouns	86

5	Analysis and Generation	99
5.1	Incremental Pragmatic Interpretation	99
5.2	The Generation Paradox	105
5.3	The Linear Path Hypothesis	107
5.4	The Extraction Problem of Generation	110
5.5	Remarks on the Choice Problem	115
PART II	Algebraic and Automata-Theoretic Characterization	119
6	The Left-Associative Algorithm	121
6.1	Basic Concepts of PS-, C-, and LA-Grammar	121
6.2	The Mathematical Definition of Left-Associative Syntax	126
6.3	The Derivational Structure of LA-Grammar	128
6.4	An Example: the Formal Language $a^k b^k c^k$	131
6.5	On the Generative Power of LA-Grammar	134
7	Language Hierarchies	137
7.1	LA-Grammars for Regular, CF, and CS Languages	137
7.2	The Hierarchy of A-LAGs, B-LAGs, and C-LAGs	143
7.3	Ambiguity of Languages	148
7.4	Syntactically-Ambiguous LA-grammars	153
7.5	Lexically-Ambiguous LA-grammars	157
8	LA-Grammar and Automata	161
8.1	Input-Output Equivalence of Grammars and Parsers	161
8.2	Simulating Finite Automata in LA-grammar	167
8.3	The LAG Control Structure Compared with RTNs	173
8.4	Predictive Analyzers and Deterministic Parsers	175
8.5	LA-Grammar and Register Machines	183
9	Decidability and Efficiency	189
9.1	Recognition of Grammatical Recursion	189
9.2	The Recursion Factor of C-LAGs	193
9.3	Equivalence of C-LAGs	206
9.4	Improving Efficiency	213
9.5	Sound LA-Grammars	217

10 Computational Complexity Results	225
10.1 Complexity of Unambiguous C-LAGs	225
10.2 Empirical Results	227
10.3 Packing vs. Restricting Ambiguities	234
10.4 Complexity of Syntactically Ambiguous C-LAGs	238
10.5 Complexity of Lexically Ambiguous C-LAGs	248
 PART III Logic and Communication	 265
11 Principles of Pragmatics	267
11.1 Peirce and the Theory of Signs	267
11.2 Meaning, Use, and Grice's Intentions	271
11.3 The Principles of Reference	274
11.4 Successful Communication	279
11.5 Non-Literal Uses	283
 12 Meaning, Truth and Ontology	 289
12.1 Tarski's Truth Definition	289
12.2 Model Theory and Natural Language	292
12.3 A Simple Robot: the Color Reader	295
12.4 Intensional and Extensional Meaning Analysis	298
12.5 Four Basic Approaches to Meaning	301
 13 Model Theory and Artificial Intelligence	 305
13.1 Reconstructing Truth in a Robot	305
13.2 Autonomy from the Metalanguage	307
13.3 Semantics and Reference	310
13.4 Why Meanings are in the Head	312
13.5 The Speaker-Simulation Device	313
 14 Reference and Denotation	 319
14.1 The Epimenides Paradox	319
14.2 Consistency and Truth	322
14.3 Reconstructing Epimenides Pragmatically	323
14.4 Vagueness	326
14.5 The Sorites Paradox	330

15 Surface Compositional Semantics	333
15.1 Presuppositions	333
15.2 Restricted Quantification	336
15.3 Tautologies, Presupposition Failure, and Vagueness	338
15.4 Intensional Contexts	341
15.5 A Unified Semantic Account	344
Conclusion	351
APPENDICES	355
Introductory Remarks	357
A ECAT Category Segments and Categories	359
A.1 Alphabetical List of Category Segments	359
A.2 List of ELEX Categories	366
A.3 Derived ECAT Categories	371
B Sample Derivations	373
B.1 Yes/No Interrogative	373
B.2 Ambiguity in a Passive Sentence	374
B.3 Recursion of Control	377
B.4 Unbounded Dependency	381
B.5 Relative Clauses	383
B.6 Genitive Recursion	385
B.7 Idiom	386
C The Current Example Set of ECAT	389
References	403
Name Index	415
Subject Index	419
