Foreword (by J. Dieudonné)	vii
Acknowledgements	ix
Introduction	1
Notation and Conventions	3
Chapter 1. General Linear Groups, Steinberg Groups, and K-Groups	5
1.1. Rings, Modules, and Groups	5
1.1A. Rings and Modules	5
1.1B. Miscellaneous Group Theory	12
1.2. Linear Groups and Linear Transformations	18
1.2A. The General Linear Group $GL(M)$ and Related Groups	18
1.2B. Residual and Fixed Modules	20
1.2C. Elementary Transvections and the Group $E_n(R)$	23
1.2D. Cartesian Squares	30
1.2E. The Linear Congruence Groups	33
1.3. The Stable Linear Groups and K_1	37
1.3A. Commutators of Linear Groups	37
1.3B. The Groups $GL(R)$ and $E(R)$, and K_1	38
1.3C. The Normal Subgroups of $GL(R)$	43
1.4. The Linear Steinberg Groups	45
1.4A. The Groups $St_n(R)$ and $St(R)$	45
1.4B. Comparing $K_{2,n}(R)$ and $Cen St_n(R)$	47
1.4C. Central Extensions of Groups	49
1.4D. $St(R)$ as Universal Central Extension of $E(R)$	52
1.4E. The Groups $W_n(R)$ and $H_n(R)$	55
1.4F. The General Steinberg Group	60
1.5. The K_2 -Groups	61
1.5A. Symbols in $K_{2,n}(R)$	61
1.5B. A K_1 - K_2 Exact Sequence	65
Chapter 2. Linear Groups over Division Rings	68
2.1. Basic Properties of the Linear Groups	68

2.1A.	One-Dimensional Transformations	69
2.1B.	Generation Theorems for the Linear Groups	71
2.1C.	Orders of the Finite Linear Groups	74
2.2.	The Groups $E_n(V)$ and $SL_n(V)$	75
2.2A.	The Dieudonné Determinant	75
2.2B.	Iwasawa's Simplicity Criterion	78
2.2C.	The Simplicity of the Group $E_n(V)/\text{Cen } E_n(V)$	79
2.2D*.	Central Simple Algebras and the Norm One Group $SL_n(V)$	81
2.2E*.	Is $SL_n(V) = E_n(V)$?	85
2.3.	Connections with K-Theory	88
2.3A.	A Bruhat Decomposition and Presentations of the Linear Groups	88
2.3B*.	The Theorems of Matsumoto and Merkurjev-Suslin	92
Chapter 3.	Isomorphism Theory for the Linear Groups	96
3.1.	Basic Concepts and Facts	98
3.1A.	The Standard Isomorphisms	98
3.1B.	Rings with Division Rings of Quotients	101
3.1C.	The Fundamental Theorem of Projective Geometry	104
3.2.	Full Groups and Their Isomorphisms	106
3.2A.	Full Groups	106
3.2B.	More Properties of Linear Transformations	110
3.2C.	Action of an Isomorphism on Projective Transvections	115
3.2D.	The Isomorphism Theorems	119
3.3*.	Results over More General Rings	127
3.3A*.	Morita Theory and Isomorphisms of Matrix Rings	127
3.3B*.	A Return to Domains	130
3.3C*.	Description of Theorems and Proofs over More General Rings	134
Chapter 4.	Linear Groups over General Classes of Rings	139
4.1.	The Stable Range Condition	141
4.1A.	Big Modules and the Stable Range Condition	141
4.1B.	Examples of Rings with Stable Range Condition	143
4.2.	The Normal Subgroup Structure of the Linear Groups	147
4.2A.	Generalized Matrix Decompositions	147
4.2B.	Linear Groups of Big Modules	150
4.2C.	Commutators of Linear Groups	153
4.2D.	Classification of Normal Subgroups	155
4.2E*.	Stability for K_1 and K_2	160
4.3*.	The Congruence Subgroup, Generation, and Presentation Problems	164
4.3A*.	The Congruence Subgroup Problem	165

4.3B*.	Generation by Elementary Matrices and Finite Generation	172
4.3C*.	Presentations of the Linear Groups	177
Chapter 5. Unitary Groups, Unitary Steinberg Groups, and Unitary K-Groups		183
5.1.	Sesquilinear, Hermitian, and Quadratic Forms	184
5.1A.	Sesquilinear Forms.	184
5.1B.	Hermitian Forms	188
5.1C.	Form Rings and Generalized Quadratic Forms	190
5.1D.	Quadratic Modules over Form Rings	195
5.2.	Unitary Groups and Unitary Transformations	200
5.2A.	The Unitary Group of a Quadratic Module	201
5.2B.	Special Cases of Unitary Groups and the Traditional Classical Groups	204
5.2C.	Unitary Transformations	212
5.2D.	Ideals in Form Rings and Unitary Congruence Groups	215
5.3.	The Hyperbolic Unitary Groups	221
5.3A.	The Groups $U_{2n}(R, A)$ and $EU_{2n}(R, A)$	221
5.3B.	Basic Properties of the Group $EU_{2n}(R, A)$	228
5.3C.	The Homomorphisms T_- , T_+ , H , and F	235
5.3D.	The Congruence Groups $U_{2n}(\alpha, \Gamma)$ and $EU_{2n}(\alpha, \Gamma)$	238
5.4.	The Stable Unitary Groups and KU_1	241
5.4A.	Commutators of Unitary Groups	241
5.4B.	The Stable Unitary Groups $U(R, A)$ and $EU(R, A)$	243
5.4C.	Unitary K_1	248
5.4D.	The Normal Subgroups of $U(R, A)$	250
5.5.	The Unitary Steinberg Groups	256
5.5A.	The Groups $StU_{2n}(R, A)$ and $StU(R, A)$	256
5.5B.	The Hyperbolic and Forgetful Maps	259
5.5C.	Comparing $KU_{2,2n}(R, A)$ and $Cen StU_{2n}(R, A)$	261
5.5D.	$E_n(R)$ -Homomorphisms onto A_n and A_n^J	263
5.5E.	$StU(R, A)$ as Universal Central Extension of $EU(R, A)$	269
5.5F*.	The Groups $WU_{2n}(R, A)$ and $HU_{2n}(R, A)$	273
5.6*.	The KU_2 -Groups	277
5.6A*.	Symbols in $KU_{2,2n}(R, A)$	277
5.6B*.	Grothendieck Groups, Witt Groups, and L-Groups	281
5.6C*.	Sharpe's Version of the Unitary Steinberg Group	286
5.6D*.	The Exact Sequence of Sharpe	289
Chapter 6. Unitary Groups over Division Rings		292
6.1.	Forms over Division Rings	294
6.1A.	Form Parameters in Division Rings	294

6.1B.	J -Forms on Vector Spaces	295
6.1C.	Quadratic Spaces	300
6.1D.	Quadratic Spaces over Finite Form Rings	302
6.2.	Basic Properties of the Unitary Groups	307
6.2A.	Residual Spaces of Unitary Transformations	308
6.2B.	A Canonical J -Form on the Residual Space	311
6.2C.	Witt's Theorems and the Witt Index	314
6.2D.	Generation Theorems for the Unitary Groups	317
6.2E.	The Finite Unitary Groups	322
6.3.	The Group $\mathrm{EU}_n(V)$ for Isotropic V	325
6.3A.	Isotropic Transvections in $\mathrm{EU}_n(V)$	326
6.3B.	The Equality $\mathrm{EU}_n(V) = \mathrm{EU}_{\tilde{x}}(V)$ for Hyperbolic V	328
6.3C.	The Centralizer of $\mathrm{EU}_n(V)$	329
6.3D.	The Action of $\mathrm{EU}_n(V)$ on Isotropic Lines	331
6.3E.	The Simplicity of the Group $\mathrm{EU}_n(V)/\mathrm{Cen} \mathrm{EU}_n(V)$	333
6.4.	The Groups $\mathrm{U}_n^+(V)$, $\mathrm{U}'_n(V)$, and $\mathrm{SU}_n(V)$	338
6.4A.	The Spinor Norm Θ	339
6.4B.	The Group $\mathrm{U}_n^+(V)$	344
6.4C.	The Spinorial Kernel $\mathrm{U}'_n(V)$	349
6.4D.	Applications to $\mathrm{EU}_n(V)$	354
6.4E*.	The Unitary Norm One Group $\mathrm{SU}_n(V)$	359
6.4F*.	A Refinement of the Spinor Norm	362
6.4G*.	Unitary Groups over Special Fields	364
6.5*.	Connections with Unitary K-Theory	369
6.5A*.	The Groups $\mathrm{KU}_{1,2n}(R, \Lambda)$	369
6.5B*.	A Bruhat Decomposition and Presentations of the Hyperbolic Unitary Groups	377
6.5C*.	$\mathrm{KU}_{2,2n}(R, \Lambda)$ over Fields and the Exact Diagram of Merkurjev-Suslin-Sharpe	377
Chapter 7. Clifford Algebras and Orthogonal Groups over Commutative Rings		381
7.1.	The Clifford Algebra of a Quadratic Module	382
7.1A.	Definition, Existence, and Basic Properties	382
7.1B.	Gradings and Tensor Products	387
7.1C.	The Clifford Algebra of a Free Quadratic Module	393
7.1D.	The Generalized Quaternion Algebra	398
7.1E.	Centers and Graded Centers	401
7.2.	Clifford, Spin, and Related Orthogonal Groups	405
7.2A.	The Groups $\mathrm{CL}(M)$, $\mathrm{CL}^+(M)$, and $\mathrm{Spin}(M)$	406
7.2B.	The Groups $\mathrm{Epin}_{\tilde{x}}(M)$, $\mathrm{KSpin}_{1,2n}(R)$, and $\mathrm{KSpin}_{2,2n}(R)$ in the Hyperbolic Case	410
7.2C*.	Bass' Theory of the Spinor Norm	417

7.3. Isomorphisms Between Classical Groups of Small Rank	425
7.3A. The Rank 3 Situation	427
7.3B. The Rank 4 Situation	430
7.3C*. The Situations of Rank 5, 6, and 8	435
Chapter 8. Isomorphism Theory for the Unitary Groups	441
8.1. Basic Properties of Quadratic Spaces	443
8.1A. Some Elementary Concepts and Facts	443
8.1B. The Fundamental Theorem of Projective Geometry	446
8.1C. The Geometry of Totally Isotropic Subspaces	452
8.2. Full Orthogonal Groups and Their Isomorphisms	457
8.2A. Full Orthogonal Groups	458
8.2B. Elementary Abelian p -Groups in Orthogonal Groups	462
8.2C. More Properties of Eichler Transformations	465
8.2D. Centralizers and Double Centralizers	472
8.2E. Action of an Isomorphism on Projective Eichler Transformations	476
8.2F. The Isomorphisms of Full Groups in Dimensions Not 8	482
8.2G*. Cayley Algebras and the Isomorphisms of Full Groups in Dimension 8	491
8.2H*. Isomorphism Theory for Saturated Orthogonal Groups	496
8.3*. Non-Orthogonal Full Groups and Their Isomorphisms	500
8.3A*. The Isomorphisms of Non-Orthogonal Full Unitary Groups	501
8.3B*. Non-Existence of Isomorphisms Between Full Groups of Different Types	505
Chapter 9. Unitary Groups over General Classes of Form Rings	508
9.1*. The Normal Subgroup Structure of the Unitary Groups	508
9.1A*. Elementary Subgroups of the Unitary Groups	509
9.1B*. Classification of Normal Subgroups	514
9.1C*. Stability for KU_1 and KU_2	520
9.2*. The Congruence Subgroup, Generation, and Presentation Problems	528
9.2A*. The Congruence Subgroup Problem	529
9.2B*. Generation by Elementary Matrices and Finite Generation	533
9.2C*. Presentations of Symplectic and Orthogonal Groups	539
Concluding Remarks	543
Bibliography	545
Index of Concepts	567
Index of Symbols	574
