

Contents

- 315 An introduction to quiet daily geomagnetic fields, *W. H. Campbell*
- 333 Geomagnetic quiet day selection, *J. A. Joselyn*
- 343 Very quiet intervals of geomagnetic activity and the solar wind structure, *J. Hruska and A. Hruska*
- 357 Least squares and integral methods for the spherical harmonic analysis of the *Sq*-field, *K. Kawasaki, S. Matsushita and J. C. Cain*
- 371 Polar region *Sq*, *W.-Y. Xu*
- 395 Field-aligned currents in the undisturbed polar ionosphere, *H. W. Kroehl*
- 413 Modeling the ionosphere with wind dynamo: A review, *A. D. Richmond*
- 437 Contribution to geomagnetic *Sq*-field and equatorial electrojet from the day/night asymmetry of ionospheric current under dawn-to-dusk electric field of magnetospheric origin, *N. Fukushima*
- 447 The contribution of magnetospheric currents to *Sq*, *W. P. Olson*
- 463 Abnormal *Sq* behaviour, *E. C. Butcher*
- 485 The equatorial electrojet, *C. A. Reddy*
- 509 Subsolar elevation of the equatorial electrojet, *C. A. Onwumechili and P. C. Ozoemena*
- 515 On *Sq* and *L* current systems in the ionosphere, *W.-Y. Xu*
- 527 On the evolution of methods of determining *L*, *K.-K. Tschu*
- 533 Lunar magnetic variations, *D. E. Winch*
