Introduction XIX

History and Philosophy of Bayer Pharmaceutical Research
W.-D. BUSSE XXI

Pathophysiology

Etiology

Epidemiology – Its Contribution to Understanding of the Etiology,
Pathogenesis, and Prevention of Diabetes Mellitus
P. ZIMMET, G. DOWSE, R. LA PORTE, C. FINCH, and C. MOY 5

Genetics of Diabetes Mellitus
J. KÖBBERLING, and H. TILLIL 27

On the Pathogenesis of Insulin-Dependent Diabetes Mellitus –
A Discussion of Three Recently Proposed Models
J. NERUP, T. MANDRUP-POULSEN, J. MØLVIG, S. HELQVIST,
and L. DALL WOGENSEN 39

Challenging Views on the Pathogenesis of Type I (Insulin-Dependent)
Diabetes Mellitus
G. F. BOTTAZZO, E. BONIFACIO, E. BOSI, R. MIRAKIAN, I. TODD,
and R. PUJOL-BORRELL 51

Islet Amyloid and Type 2 Diabetes
P. WESTERMARK 63

Physiology and Pathophysiology

Insulin Receptor: Role of Receptor Tyrosine Kinase in Insulin Signalling
and Action
E. VAN OBBERGHEN, S. GAMMELTOFT, Y. LE MARCHAND-BRUSTEL,
and R. BALLOTTI 73

The Kinetics of Insulin, C-Peptide, and Proinsulin in Normal and Diabetic Man K. S. POLONSKY	82
Cell Biology of Insulin Action on Glucose Transport and Its Perturbation in Diabetes Mellitus B. B. KAHN, and S. W. CUSHMAN	94
Mechanisms of Insulin Resistance in Obese and Type II Diabetic Subjects A. D. BARON, O. G. KOLTERMAN, R. PRAGER, G. R. FREIDENBERG, R. R. HENRY, W. T. GARVEY, and J. M. OLEFSKY	107
Abnormal Glucagon Secretion in Type 2 (Noninsulin-Dependent) Diabetes Mellitus: Causes and Consequences J. E. GERICH	127

Animal Models

Physiopathology and Possible Etiology of Hormonal Dysregulations and Insu- lin Resistance in Obese Rats: a Potential Model for Some Human Obesity B. JEANRENAUD	137
Models for Studying Diabetic Complications J. R. WILLIAMSON, K. CHANG, R. G. TILTON, and C. KILO	142

Pharmacology

Insulin Analogues – Potentials for Improving Diabetes Treatment F. B. HANSEN, I. G. CLAUSEN, B. DATH, E. B. JENSEN, B. R. JOHANSEN, I. JONASSEN, F. JUNKER, K. D. JØRGENSEN, G. MEYN, J. PETERSEN, and P. BALSCHMIDT	155
Metabolic Inhibitors in the Treatment of Diabetes Mellitus K. G. M. M. ALBERTI, H. S. A. SHERRATT, and P. L. SELBY	164
Inhibitors Influencing Carbohydrate Absorption W. F. CASPARY	172

Therapy

Comprehensive Approach to the Treatment of Diabetes Mellitus

Why and How to Involve the Diabetic Patient in his Treatment R. TATTERSALL	197
---	-----

Prevention of Late Complications

Advanced Non-Enzymatic Tissue Glycosylation: Biochemical Basis of Late Diabetic Complications

H. VLASSARA, M. BROWNLEE, and A. CERAMI 209

Is it Possible to Prevent Late Complications of Diabetes Mellitus?

J.D. WARD 218

Recent Aspects of Insulin Therapy

Long-Term Efficacy and Safety of Intensified Insulin Treatment Strategies

M. BERGER 225

Is Human Insulin Better than Animal Insulin in the Treatment of Insulin-Dependent Diabetes Mellitus?

G. SCHERNTHANER 234

Specific Problems of Diabetes Mellitus in Youth

Natural History of Diabetes Mellitus in Children

D.D. ETZWILER 245

Particular Aspects of the Management of Diabetes in Children

Z. LARON, S. AMIR, M. KARP, Z. FLEXER, G. FAIMAN, R. OFAN, Y. ALBAG,
O. KALTER-LEIBOVICI, and A. GALATZER 252

The Pregnant Diabetic

The State of the Art in Diabetic Pregnancy

J.D. BAIRD 267

Relationship Between Maternal Glucose Levels and Congenital Malformations in the Infant of the Diabetic Mother

L. JOVANOVIC-PETERSON, and C.M. PETERSON 275

Pancreas and Islet Transplantation

State of the Art in Pancreas Transplantation
D. E. R. SUTHERLAND 283

What Future for Islet Transplantation in Man?
R. LANDGRAF 288

Diet

Aims of Diet in Diabetes Management
D. J. A. JENKINS, A. L. JENKINS, TH. M. S. WOLEVER, V. VUKSAN, G. S. WONG,
and R. G. JOSSE 299

Practicability of Diet in Diabetes Management
A. L. JENKINS, D. J. A. JENKINS, TH. M. S. WOLEVER, V. VUKSAN, G. S. WONG,
and R. G. JOSSE 309

New Aspects of Diabetes Treatment

Induction of Partial Remission and Enhancement of Beta-Cell Function
By Cyclosporin in Type I Diabetes
J. DUPRE, and C. R. STILLER 321

Role of Abnormal Free Fatty Acid Metabolism in the Pathogenesis
and Treatment of Noninsulin-Dependent Diabetes Mellitus
G. M. REAVEN 335

Subject Index 351
