

Table of contents

Introduction	IX
§ 1. Preliminaries from harmonic analysis and group theory	1
§ 2. Segal algebras; the Segal algebra $\mathfrak{e}^1(G)$	16
§ 3. Weil's unitary operators and the Segal algebra $\mathfrak{e}^1(G)$	36
§ 4. Weil's group of operators and related groups	43
§ 5. Vector spaces and quadratic forms over local fields	62
§ 6. Properties of certain quadratic forms	70
§ 7. Weil operators for vector spaces over local fields	81
§ 8. The metaplectic group (local case); Segal continuity	91
§ 9. The metaplectic group and Segal continuity in the adelic case	98
§10. Weil's theorem 6	117
Appendix. Weil's theorem 1 and certain Segal algebras	119
Bibliography	125
Index	127
Principal notations	128
