

Contents

1	Special Relativity	1
1.1	Relativity of Motion	1
1.2	Inertial Frames	2
1.3	Galileo Transformations	3
1.4	Velocity Addition Formula	4
1.5	Lorentz Transformations	5
1.6	Relativistic Velocity Addition Formula	6
1.7	Time Dilation	7
1.8	Derivation of the Lorentz Transformation Formulas	7
1.9	Important Formulas	8
1.10	Exercises	9
1.11	Solutions	11
2	Minkowski Geometry	17
2.1	Units	17
2.2	Space–Time Diagrams	18
2.3	Interval Between Events	19
2.4	Generalized Twin Paradox	21
2.5	More Dimensions	24
2.6	Important Formulas	25
2.7	Exercises	25
2.8	Solutions	28
3	Non-Euclidean Geometry	35
3.1	Curvilinear Coordinates	35
3.2	The Sphere	37
3.3	Geodesics	39
3.4	Curvature	41
3.5	Other Maps of the Sphere	42
3.6	Other Geometries	44
3.7	Exercises	45
3.8	Solutions	46

4	Gravity	49
4.1	Newton's Law of Universal Gravitation	49
4.2	Units	50
4.3	Escape Velocity	50
4.4	Kepler Laws	51
4.5	Circular Orbits	52
4.6	Important Formulas	54
4.7	Exercises	54
4.8	Solutions	55
5	General Relativity	59
5.1	Equivalence Principle	59
5.2	Gravitational Redshift	60
5.3	Curved Space-Time	61
5.4	Important Formulas	63
5.5	Exercises	64
5.6	Solutions	65
6	The Schwarzschild Solution	69
6.1	The Schwarzschild Solution	70
6.2	Stationary Observers	71
6.3	Redshift	71
6.4	Space Curvature	72
6.5	Orbits	73
6.6	Light Rays	74
6.7	Black Holes	77
6.8	Important Formulas	80
6.9	Exercises	81
6.10	Solutions	84
7	Cosmology	95
7.1	Redshift	95
7.2	Hubble Law	96
7.3	FLRW Models	96
7.4	Hubble Law in the FLRW Models	99
7.5	Redshift in the FLRW Models	100
7.6	Friedmann Equations	101
7.7	Important Formulas	103
7.8	Exercises	104
7.9	Solutions	106
8	Mathematics and Physics	115
8.1	Mathematics for General Relativity	115
8.2	Modern Physics	116
