

Contents

SECTION I: The Brain and Nervous System

1	Radiography, Angiography and Computed Tomography of the Central Nervous System <i>A. R. Valentine</i>	3
2	Nuclear Magnetic Imaging of the Nervous System <i>I. Moseley and L. Loh</i>	13
3	Positron Emission Tomography in the Investigation of Cerebral Disease <i>R. S. J. Frackowiak</i>	25
4	Jugular Venous Bulb Oxygen Saturation and Cerebral Blood Flow Measurement in Intensive Care <i>R. Garlick</i>	35

SECTION II: Imaging the Lungs

5	The Interpretation of the Portable Chest Film and the Role of Complementary Imaging Techniques <i>W. Kox, J. Boulton and K. Hillman</i>	45
6	Computed Tomography in Acute Respiratory Failure <i>L. Gattinoni, A. Pesenti, A. Torresin, S. Vesconi, G. P. Rossi, R. Fumagalli, R. Marcolin, D. Mascheroni, M. Langer, G. Iapichino, F. Rossi and S. Baglioni</i>	67
7	Radionuclide Imaging of the Lungs <i>R. F. Jewkes</i>	77

SECTION III: Cardiovascular Assessment

8	Cardiac Ultrasound <i>R. Donaldson</i>	95
9	Radionuclide Imaging of the Cardiovascular System <i>S. R. Underwood</i>	103
10	Magnetic Resonance <i>S. Rees, S. R. Underwood and D. Firmin</i>	115

SECTION IV: The Abdomen

11 Abdominal Ultrasound in Intensive Care
J. Boulton and W. Kox 127

12 Computed Tomography of the Abdomen of the Critically Ill
A. Dixon 137

13 Radioisotopes in the Diagnosis of Abdominal Embarrassment in the Critically Ill
J. P. Lavender 147

SECTION V: Special Techniques and Recent Advances

14 Interventional Radiology and Digital Subtraction Angiography
J. McIvor and P. S. Treweek 157

15 Radiolabelled Blood Cells in the Investigation of the Critically Ill
C. N. McCollum 167

16 Imaging and Investigating the Microcirculation in Intensive Care Patients
J. R. Weinberg and J. E. Tooke 179

Subject Index 185
