

Table of Contents

Foreword	V
-----------------------	----------

Chapter 1 Evolution Research

I. The epistemological problem.....	2
II. The methodological problems	2
III. References.....	5

Chapter 2 Cosmogenesis

I. Phenomenon	7
II. Hypotheses	7
III. Data.....	8
A. Redshift	8
B. Background radiation.....	10
C. Critical density	12
D. Particle interaction.....	13
IV. Reconstruction.....	13
A. The problem.....	13
B. Pulsation model	16
V. Micro-mechanisms of cosmogenesis.....	16
VI. References.....	19

Chapter 3 Chemogenesis

I. Phenomenon	21
II. Hypotheses	21
III. Data.....	22
A. Geogenesis	22
B. Boundary condition	24
C. Simulation experiment	25
1. Prebio-monomer.....	25
2. Prebio-polymer	26

IV. Reconstruction	28
A. The problem.....	28
B. Self-organization model.....	30
V. Micro-mechanisms of chemogenesis	32
VI. References.....	34

Chapter 4 Biogenesis

First subchapter Precyte

I. Phenomenon	37
II. Hypotheses	40
III. Data.....	44
A. Fossil discovery.....	44
B. Cell component simulation.....	44
C. Evolution experiment in vitro	46
D. Computer test.....	50
IV. Reconstruction.....	52
A. The problem.....	52
B. Hypercycle model.....	56
1. <i>Protobiont</i>	56
2. <i>Eobiont</i>	62
3. <i>Progenote</i>	64
V. Summary.....	66
VI. References.....	68

Second subchapter Procyte

I. Phenomenon	71
II. Hypotheses	74
III. Data.....	76
A. Biotope study.....	76
B. Fossil discovery	77
C. Metabolic homology.....	78
D. Sequence analysis.....	84

IV. Reconstruction.....	86
A. The problem.....	89
B. Archaeobacterium model.....	89
1. <i>Archaeobacterium</i>	89
2. <i>Eubacterium</i>	90
3. <i>Ur-karyote</i>	92
V. Summary.....	92
VI. References.....	96

Third subchapter Eucyte

I. Phenomenon	99
II. Hypotheses	102
III. Data.....	102
A. Cell fossil discovery.....	103
B. Organelle autonomy.....	103
C. Endocytobiont analogy	110
D. Procyte homology.....	118
IV. Reconstruction.....	123
A. The problem.....	123
B. Endocytobiont model.....	127
1. <i>Pre-eucyte</i>	127
2. <i>Animal and fungus cells</i>	130
3. <i>Plant cell</i>	132
V. Summary.....	132
VI. Micro-mechanisms of biogenesis	134
VII. References.....	135

Chapter 5: Sociogenesis

I. Phenomenon	139
II. Hypotheses	140
III. Data.....	142
A. Embryonic development.....	142
B. Phylogenesis	144
C. Brain evolution.....	146
D. Evolution of speech.....	150

IV. Reconstruction.....	154
A. The problem.....	154
B. Fulguration model.....	154
1. <i>Polycyte</i>	154
2. <i>Human being</i>	156
3. <i>Culture</i>	159
V. Future development of mankind	160
VI. Micro-mechanisms of cultural evolution.....	162
VII. References.....	163

Chapter 6: Macro-mechanisms of Evolution

I. Phase principle.....	165
II. Modular principle.....	165
III. Periodicity principle	168
A. Preliminary periodic system of cells	170
B. Possible periodicity in cultural genesis	176
IV. Consequences for biogenesis	178
V. Summary.....	180
VI. References.....	182

Chapter 7: Experimental application

I. Endocytobiosis as an intracellular ecosystem	183
II. Endocytobiosis of leafhoppers.....	185
A. Oogenesis	185
B. Embryogenesis	188
C. Gene expression.....	190
D. Physiochemistry.....	193
E. Model system	199
III. Endocytobiology as an interdisciplinary research field	201
IV. References	205

Appendix

I. Author index	207
II. Subject index	211
