Contents

1 Art, Science and Engineering 1

Cognitive Structures; Scientific Method; Language is Contrastive

2 Metaphor as a Cognitive Process 27

Conjecture and Refutation, Theories and Hypotheses; Specialization and Abstraction, Induction and Generalization; Partial Analysis and Noise; The Importance of Errors and Restrictions

3 Psychology and Psycholinguistics 55

The Observable Processes of Acquisition; External Influences: Parents, Imitation, and Correction; Expansion and Reduction

4 Language Defects and Correction 77

Rate and Order of Learning; Telegraphic Speech; Parents and Teachers: Good and Bad Examples; Reinforcement: Punishment and Reward

5 Cognition and Restriction 97

The Cognitive Processes of Language Acquisition; The Magical Number Seven; Memory and Capacity Phenomena; Adult Characteristics

6 Nativism and Constructivism 129

Representations: Deep Structure and Language Acquisition; Acquisition Models, Chomsky and Piaget; Computer Programs as Psychological Models

7 Neurology and Neurolinguistics 161

Neuroanatomy: Brains, Neurons, and Synapses; Neurophysiology and the Effects of Plasticity; Neural Communication and Languages of the Brain; Neural Nets: Connectionistic and Locationistic Models

Bibliografische Informationen
http://d-nb.info/900353023

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

8 The Nature of Language 187

The Quintessence of Language; Epistemology, Phonology, and Prosody; Culture, Perspectives, and Metaphor

9 The Mechanics of Language 209

Contrast and Similarity: Paradigmatic Learning and Context; The Structures of Language; Models of Grammar

10 The Ubiquity of the Sentence 233

Pronouns and Anaphora; Recursion of Syntax and Parsing; Transformational Grammar; Generative Grammar; Learning Process and Idiolect

11 Computer Science and Artificial Intelligence 253

Pattern Recognition, Problem Solving and Heuristic Search; Learning Strategies; Problems and Theoretical Limitations

12 Heuristics and Analytic Intransigence 279

Automata and Formal Languages; Methodologies: Implementation vs Experimentation; Cybernetics and Robotics; Deletionless Strategies; Formalisms; Clauses: Horn and non-Horn, unit and non-unit Systems: LUSH and PROLOG

13 Postulates, Claims and Hypotheses 303

The Bases of Meaning and Learning; The Organization of Concepts in Learning; The Process of Learning; The Artificial Subsumes the Natural

14 Computer Modelling Experiments 327

Batteries One to Seven; A Generalized Toy World Package; Partial Analysis of NLA; Future Systems; Conclusions
