Preface	v
Publications	xi
Permissions	xv

Part 1. The Person and His Work

J. Richard Büchi (1924–1984)	2
<i>Dirk Siefkes, Paul Young, and Leonard Lipshitz</i>	
The Life of J. Richard Büchi	4
<i>Sylvia Büchi</i>	
The Work of J. Richard Büchi	7
<i>Dirk Siefkes</i>	
The Role of Büchi's Automata in Computer Science	18
<i>E. Allen Emerson</i>	
J. Richard Büchi's Doctoral Students	23
Abstracts Published by J. Richard Büchi	24

Part 2. The Publications, with Comments

Section 1. Boolean Algebras	28
<i>With comments by Saunders Mac Lane, The University of Chicago</i>	
[1]* Die Boole'sche Partialordnung und die Paarung von Gefügen ...	33
[2] Representation of Complete Lattices by Sets.	103
[3] Investigation of the Equivalence of the Axiom of Choice and Zorn's Lemma from the Viewpoint of the Hierarchy of Types ...	121

*Numbers in brackets refer to the Publications section on pp. xi–xiii.

Section 2. Discrete Spaces	132
<i>With comments by Don Pigozzi, Iowa State University, Ames</i>	
[4] On the Existence of Totally Heterogeneous Spaces.	141
[19] Jordan Circuits of a Graph (with Gary Haggard).	147
[37] Skolem Rings and Their Varieties (with T. Michael Owens)	161
Section 3. Towards a Theory of Definability	222
<i>With comments by Ernst Specker, ETH Zürich, with assistance from Kenneth Danhof, Southern Illinois University at Carbondale</i>	
[5] The Theory of Proportionality as an Abstraction of Group Theory (with Jesse B. Wright).	226
[6] Invariants of the Anti-Automorphisms of a Group (with Jesse B. Wright).	234
[21] Model Theoretic Approaches to Definability (with Kenneth J. Danhof)	241
[22] Definability in Normal Theories (with Kenneth J. Danhof)	252
[23] Variations on a Theme of Cantor in the Theory of Relational Structures (with Kenneth J. Danhof)	261
[40] Relatively Categorical and Normal Theories.	277
Abstract 11. Relatively Categorical and Normal Theories	288
Section 4. Automata and Grammars	291
<i>With comments by Peter Deussen, Universität Karlsruhe</i>	
[10] Mathematische Theorie des Verhaltens endlicher Automaten ...	295
Mathematical Theory of the Behavior of Finite Automata (English translation by Sylvia Büchi, Peter Deussen, and Dirk Siefkes) ...	303
[11] Regular Canonical Systems	317
[12] Algebraic Theory of Feedback in Discrete Systems	338
[17] Canonical Systems which Produce Periodic Sets (with William H. Hosken)	371
Section 5. Automata and Monadic Theories	381
<i>With comments by Robert McNaughton, Rensselaer Polytechnic Institute</i>	
[7] Weak Second-Order Arithmetic and Finite Automata.	398
[8] On a Decision Method in Restricted Second Order Arithmetic ..	425
[13] Transfinite Automata Recursions and Weak Second Order Theory of Ordinals	437
[14] Decision Methods in the Theory of Ordinals.	459
[16] Definability in the Monadic Second-Order Theory of Successor (with Lawrence H. Landweber).	464

[26] The Complete Extensions of the Monadic Second Order Theory of Countable Ordinals (with Dirk Siefkes)	469
[28] Deterministic Automata and the Monadic Theory of Ordinals $< \omega_2$ (with Charles Zaiontz)	493
Section 6. Games and Determinacy	517
<i>With comments by Yuri Gurevich, University of Michigan, Ann Arbor</i>	
[15] Solving Sequential Conditions by Finite-State Strategies (with Lawrence H. Landweber)	525
[18] Algorithmisches Konstruieren von Automaten und die Herstellung von Gewinnstrategien nach Cantor-Bendixson	543
Algorithmic Construction of Automata and the Production of Winning Strategies According to Cantor-Bendixson (English translation by Sylvia Büchi, Saunders Mac Lane, Walter Schnyder, and Dirk Siefkes).	557
[20] On the Presentation of Winning Strategies via the Cantor-Bendixson Method (with Stephen Klein)	567
[27] Using Determinacy of Games to Eliminate Quantifiers	581
[29] State-Strategies for Games in $F_{\sigma\delta} \cap G_{\delta\sigma}$	593
Section 7. Computability	621
<i>With comments by Martin Davis, The Courant Institute</i>	
[9] Turing Machines and the Entscheidungsproblem	627
[31] Recursive Definition and Complexity of Functions Over Arbitrary Data Structures (with Bernd Mahr and Dirk Siefkes)	641
[32] Coding in the Existential Theory of Concatenation (with Steven Senger)	665
[33] Definability in the Existential Theory of Concatenation and Undecidable Extensions of This Theory (with Steven Senger)	671
Section 8. Quadratic Forms, the Five Squares Problem, and Diophantine Equations.	677
<i>With comments by Leonard Lipshitz, Purdue University</i>	
Section 9. Graphs and Matroids.	681
<i>With comments by William E. Fenton, Bellarmine College and Saunders Mac Lane, The University of Chicago</i>	
[34] Large Convex Sets in Oriented Matroids (with William E. Fenton)	685
