Numerical Simulation of Compressible Euler Flows

A GAMM Workshop

Friedr. Vieweg & Sohn Braunschweig/Wiesbaden

TABLE OF CONTENTS

Problems for analysis	1
INVITED SURVEY LECTURES:	
B.van LEER: The computation of steady solutions to the Euler equations: a perspective	21
A.ELSENAAR: The International Vortex Flow Experiment: a test case for compressible Euler codes	39
CONTRIBUTING PAPERS:	
F.ANGRAND, V.BILLEY, J.PÉRIAUX, J.P.ROSENBLUM, B.STOUFFLET: Implicit Euler calculations using a Galerkin finite element approximation on adapted non-structured meshes	54
M.BORREL, J.-L.MONTAGNE: Upwind second-order unsteady scheme	76
F.CHALOT, L.P.FRANCA, I.HARARI, T.J.R.HUGHES, F.SHAKIB, M.MALLET, J.PÉRIAUX, B.STOUFFLET: Calculations of two-dimensional compressible Euler flows with a new Petrov-Galerkin finite element method	88
V.COUAILLER, J.P.VEUILLOT: Multigrid scheme for the Euler equations ...	105
A.DADONE: Computation of transonic steady flows using a modified Lambda formulation	122
A.DERVIEUX, J.A.DESIDERI, F.FEZOU, B.PALMERIO, J.P.ROSENBLUM, B.STOUFFLET: Euler calculations by upwind finite element methods and adaptive mesh algorithms	138
A.ECER, H.U.AKAY: Computation of steady Euler equations using finite element method	157
P.W.HEMKER, B.KOREN: A non-linear multigrid method for the steady Euler equations	175
B.KROUTHÉN, A.RIZZI: Numerical solutions to the Euler equations for the 1986 GAMM workshop	197
A.LERAT, J.SIDÈS: Implicit transonic calculations without artificial viscosity or upwinding	227
G.MORETTI, A.LIPPOLIS: Transonic airfoil and intake calculations	251
K.MORGAN, J.PERAIRE, J.PEIRO, O.C.ZIENKIEWICZ: A finite element scheme for the Euler equations	275
M.PANDOLFI, F.LAROCCA, T.T.AYELE: A contribution to the numerical prediction of transonic flows	292
N.SATOFUKA, K.MORINISHI: Solution of compressible Euler flows using rational Runge-Kutta stepping scheme	309

J.L.THOMAS, R.W.WALTERS, B.van LEER, W.K.ANDERSON: Implicit finite- volume algorithms for the flux-split Euler equations	331
---	-----

WORKSHOP ANALYSIS:

A short synthesis of the contributions	348
