

Contents

Part I: QED and Hadronic Corrections, Monte Carlo Programs

Applications of Renormalization Group Methods to Radiative Corrections <i>W. Beenakker, F.A. Berends and W.L. van Neerven</i>	3
Structure Function Techniques in e^+e^- Collisions <i>O. Nicrosini and L. Trentadue</i>	25
The Z Line Shape <i>F.A. Berends</i>	55
Uncertainties from Light Quark Loops <i>H. Burkhardt</i>	75
Hadron Physics and Radiative Corrections <i>J. Kühn</i>	83
Electroweak Monte Carlos for LEP: A Status Report <i>R. Kleiss</i>	101
The Exclusive Exponentiation in the Monte Carlo — The Case of Initial State Bremsstrahlung <i>S. Jadach and B.F.L. Ward</i>	118
A_{pol} as Test of the Standard Model at LEP <i>S. Jadach and Z. Wąs</i>	129

Part II: Electroweak Corrections

The Z Boson Width: Higher Order Effects and Influence on the Z Line Shape <i>W. Hollik</i>	143
On the Derivation of Standard Model Parameters from the Z Peak <i>T. Riemann, D. Bardin, M. Bilenky, M. Sachwitz</i>	162
Radiative Corrections in the Standard Model and the Rho Parameter <i>G. Passarino</i>	179
Radiative Corrections to Boson Pair Production in e^+e^- Annihilation <i>M. Böhm</i>	191
Radiative Corrections to W-Pair Production at LEP <i>F. Jegerlehner</i>	208

Part III: Beyond the Standard Model

Searches for a New Gauge Boson at Different LEP Phases <i>C. Verzegnassi</i>	231
A Simple Renormalization Framework for $SU(2)_L \times U(1)_Y \times \tilde{U}(1)$ Models <i>G. Degrossi and A. Sirlin</i>	244

Part IV: Experimental Strategies

Precision Measurement of Electroweak Parameters at the Stanford Linear Collider
P. Rankin 257

What Can We Learn from the Z Line Shape? An Experimentalist's Survey
D. Schaile 273

The First Three Months
R. Settles 286

Results on R in e^+e^- Annihilation
W. de Boer 293

Precision Measurements of Quark Asymmetries
J. Drees 311

Physics with the Pretzel LEP
D. Treille 323

Participants 348
