

Table of Contents

1	Introduction	1
1.1	Definition of the Term "Ichthyosis"	3
1.2	History of the Ichthyoses	4
1.3	New Classification and Tables for Differential Diagnosis of the Ichthyoses	9
1.4	Epidermal Lipids and the Biochemistry of Keratinization B. MELNIK	15
1.4.1	Introduction	15
1.4.2	Changes in Lipid Composition of Epidermal Layers during Keratinization	16
1.4.3	Organization and Metabolism of Epidermal Lipids	21
1.4.4	Epidermal Lipids and the Permeability Barrier	25
1.4.5	Effect of Retinoids on Epidermal Lipid Metabolism	26
1.4.6	Disorders of Cornification Associated with Abnormalities in Epidermal Lipid Metabolism	27
1.4.7	Conclusion	35
2	Isolated Vulgar Ichthyoses	43
2.1	Autosomal Dominant Ichthyosis Vulgaris	45
2.1.1	Historical Aspects	45
2.1.2	Incidence and Clinical Features	45
2.1.3	Histologic and Ultrastructural Features	49
2.1.4	Biochemical Aspects	49
2.1.5	Genetic Counseling	52
2.2	X-Linked Recessive Ichthyosis	54
2.2.1	Historical Aspects	54
2.2.2	Incidence	55
2.2.3	Clinical Features	55
2.2.4	Histologic and Ultrastructural Features	62
2.2.5	Biochemistry	64

2.2.6	Genetics	70
2.2.7	Genetic Counseling	73
3	Associated Ichthyoses of the Vulgaris Type	79
3.1	Refsum's Syndrome (Heredopathia Atactica Polyneuritiformis)	81
3.1.1	Historical Aspects	81
3.1.2	General Clinical Features	81
3.1.3	Cutaneous Manifestations	82
3.1.4	Histologic and Ultrastructural Findings	84
3.1.5	Biochemical Aspects	85
3.1.6	Therapy	86
3.1.7	Genetic Counseling	86
3.2	Associated Steroid-Sulfatase Deficiency	88
3.2.1	X/Y Translocations and Loss of Xp223-pter	88
3.2.2	XRI and Kallmann's Syndrome	88
3.2.3	XRI and Hypertrophic Pyloric Stenosis: Possible Implications for the Carter Effect	89
3.2.4	Genetic Counseling	89
3.3	Ichthyosis and Hypogonadism: Reflections on the so-called Rud's Syndrome	91
3.3.1	General Remarks	91
3.3.2	How a Syndrome was Made up	91
3.3.3	Current Concepts: Evidence for Genetic Heterogeneity	92
3.4	Multiple Sulfatase Deficiency	98
3.4.1	Historical Aspects	98
3.4.2	Clinical Features	98
3.4.3	Biochemical and Genetic Aspects	99
3.4.4	Genetic Counseling	100
4	Isolated Congenital Ichthyoses	103
4.1	Harlequin Fetus	105
4.1.1	Historical Aspects	105
4.1.2	Clinical Features	105
4.1.3	Histologic Features	108
4.1.4	Biochemical Aspects	108
4.1.5	Genetic Counseling	108
4.2	The Lamellar Ichthyoses	111
4.2.1	Classification, History, and Remarks on Nomenclature	111

4.2.2	Autosomal Dominant Lamellar Ichthyosis	116
4.2.3	Heterogeneity of Autosomal Recessive Lamellar Ichthyosis	121
4.2.4	Genetic Counseling in Lamellar Ichthyosis	132
4.3	Alopecia Ichthyotica: A Characteristic Feature of many Types of Congenital Ichthyosis	135
4.4	The Epidermolytic (Acanthokeratolytic) Ichthyoses .	139
4.4.1	Classification	139
4.4.2	Bullous Ichthyotic Erythroderma of Brocq	140
4.4.3	Ichthyosis Bullosa of Siemens	144
4.4.4	Ichthyosis Hystrix of Curth and Macklin	148
4.4.5	Genetic Counseling of the Epidermolytic Ichthyoses	150
4.4.6	General Comments on Prenatal Diagnosis	151
5	Associated Congenital Ichthyoses	155
5.1	The Sjögren-Larsson Syndrome	157
5.1.1	Historical Aspects	157
5.1.2	Clinical Features	157
5.1.3	Histologic Features	159
5.1.4	Biochemical Aspects	159
5.1.5	Genetic Counseling	160
5.2	Ichthyosis and Trichothiodystrophy: the Tay and PIBI(D)S Syndromes	162
5.2.1	Historical Aspects and Classification	162
5.2.2	Clinical Features of the Tay Syndrome	162
5.2.3	Clinical Features of the PIBI(D)S Syndrome	164
5.2.4	Histologic Features of Tay and PIBI(D)S Syndromes	165
5.2.5	Biochemical Aspects	165
5.2.6	Genetic Aspects and Counseling	166
5.3	The Comèl-Netherton Syndrome	168
5.3.1	Historical Aspects	168
5.3.2	Clinical Features	169
5.3.3	Histologic and Ultrastructural Features	174
5.3.4	Pathogenesis of Trichorrhaxis Invaginata	175
5.3.5	Biochemical Aspects	175
5.3.6	Remarks on Therapy	176
5.3.7	Genetic Aspects and Counseling	176
5.4	X-Linked Dominant Ichthyosis	179
5.4.1	Historical Aspects and Nomenclature	179
5.4.2	Clinical Features	180

5.4.3	Histologic and Ultrastructural Features	182
5.4.4	Homology in the Mouse	183
5.4.5	Genetic Counseling	185
6	Recently Recognized Ichthyoses	187
6.1	Dorfman's Syndrome: Neutral Lipid Storage Disease with Ichthyotic Erythroderma	189
6.1.1	Historical Aspects	190
6.1.2	Clinical Features	190
6.1.3	Histologic and Ultrastructural Features of the Skin	191
6.1.4	Genetic Counseling	191
6.2	Hystrix-like Ichthyosis with Deafness: the HID Syndrome	193
6.2.1	Historical Aspects and Nomenclature	193
6.2.2	Clinical Features	193
6.2.3	Histologic and Ultrastructural Features	195
6.2.4	Differential Diagnosis	195
6.2.5	Genetic Counseling	196
6.3	Not an Ichthyosis at All: the Keratitis, Ichthyosis-like Hyperkeratosis, and Deafness (KID) Syndrome	198
6.3.1	Historical Aspects and Nomenclature	198
6.3.2	Clinical Features	199
6.3.3	Histologic Features	200
6.3.4	Treatment	201
6.3.5	Genetic Counseling	201
6.4	The Ichthyosis Follicularis, Atrichia, and Photophobia (IFAP) Syndrome	203
6.4.1	Historical Aspects and Nomenclature	203
6.4.2	Clinical Features	203
6.4.3	Histologic Features	204
6.4.4	Genetic Counseling	205
6.4.5	Clues for Differential Diagnosis	205
6.5	Peeling-Skin Syndrome: Clinical and Morphological Evidence for Two Types	207
6.5.1	Historical Aspects	207
6.5.2	Peeling-Skin Syndrome, Type A	207
6.5.3	Peeling-Skin Syndrome, Type B	208
6.5.4	Is Peeling-Skin Syndrome, Type B, Identical to the Comèl-Netherton Syndrome?	208
6.6	Autosomal Dominant Congenital Ichthyosis and Keratoderma Hereditaria Mutilans of Vohwinkel	211

6.7	Congenital Migratory Ichthyosis with Neurologic and Ophthalmologic Abnormalities	213
6.8	Ichthyoses of Uncertain Status	214
6.8.1	Unestablished Ichthyoses with Bone Disease	214
6.8.2	Unestablished Ichthyoses in Association with Alopecia or Hair Shaft Abnormalities	215
6.8.3	Unestablished Ichthyoses with Neurologic Involvement	216
6.8.4	Unestablished Ichthyoses and Renal Impairment . .	216
6.8.5	Miscellaneous	217
7	Therapy	221
7.1	Topical Therapy	223
7.1.1	Introduction	223
7.1.2	Salicylic Acid: a Drug I Do not Use	223
7.1.3	Commonly Used Active Substances: Sodium Chloride, Urea, Lactic Acid, and Propylene Glycol .	224
7.1.4	Therapeutic Pitfalls in the Management of Children	228
7.2	Systemic Therapy	232
7.2.1	Retinoids	232
7.2.2	Other Systemic Treatment Modalities	240
8	Subject Index	245
