

Contents

1	Introduction and motivation	1
2	Basics of Markov decision processes and related concepts	9
2.1	Markov decision process (MDP)	9
2.2	Symmetries of MDPs	24
2.3	Reward shaping	41
3	Hidden symmetries of MDPs	45
3.1	Definition and model reduction	46
3.2	A conceptual example: the multi-period newsvendor problem	53
3.3	The concept of model minimization	64
4	Hidden symmetry approach: a model reduction procedure	95
4.1	The reduction procedure	95
4.2	How to apply the hidden symmetry approach in practice	109
5	Applying the hidden symmetry approach to the stonevender problem	119
5.1	Modeling the problem	119
5.2	Revealing hidden symmetries	123
5.3	Numerical example	130
6	Applying the hidden symmetry approach to a supply chain problem	135
6.1	Modeling the problem	135
6.2	Revealing hidden symmetries	143
7	Summary and further work	153
	Bibliography	157
