

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Material Composition and Transport Processes in Li-Ion Batteries . . . . .	2
1.2	Degradation Processes in Li-Ion Batteries . . . . .	4
1.2.1	Mechanical Degradation . . . . .	5
1.2.2	Lithium Plating . . . . .	5
1.2.3	Solid Electrolyte Interphase . . . . .	6
1.2.4	Combined Degradation . . . . .	6
1.3	Scales and Models . . . . .	7
1.4	Related Work . . . . .	11
1.4.1	Homogenization and Newman-Type Models . . . . .	11
1.4.2	Numerical Solvers for Microscopic Battery Models . . . . .	12
1.4.3	Existence of Solutions . . . . .	13
1.5	Scope and Outline . . . . .	14
<b>2</b>	<b>The Microscopic Li-Ion Battery Model with SEI Growth</b>	<b>17</b>
2.1	Material Domains . . . . .	17
2.2	Transport Equations . . . . .	18
2.3	Interface Conditions . . . . .	21
2.4	Boundary and Initial Conditions . . . . .	24
2.5	Solid Electrolyte Interphase (SEI) Model . . . . .	25
2.6	Scaling and Nondimensional Variables . . . . .	30
<b>3</b>	<b>Discretization</b>	<b>33</b>
3.1	Fully Implicit Finite Volume Discretization of the Ideal Cell Model . . . . .	34
3.2	Fully Implicit Discretization of the Cell Degradation Model . . . . .	40
3.3	Considered Discrete Norms . . . . .	42
3.4	Solving the Discrete Systems . . . . .	47
3.4.1	Nonlinear Solver . . . . .	47
3.4.2	Linear Solver . . . . .	48
3.5	Scalings of the Discrete Systems . . . . .	54
<b>4</b>	<b>Battery Simulation Benchmarks</b>	<b>57</b>
4.1	Transport Parameters . . . . .	58
4.2	Battery Cell Geometries . . . . .	64
4.2.1	Cell Geometries with Realistic Morphology . . . . .	64
4.2.2	Minimalistic Cell Geometries . . . . .	68
4.3	Initial and Operating Conditions . . . . .	69
4.4	Solver Setup and Evaluation Metrics . . . . .	71
4.5	Benchmark Simulation Study . . . . .	75

<b>5 Flux Approximations for Systems of Diffusion-Type Fluxes with Discontinuous Coefficient Matrix</b>	<b>87</b>
5.1 Scalar Diffusion Problem with Discontinuous Coefficient . . . . .	88
5.2 System of Diffusion-Type Fluxes with Discontinuous Coefficients . . . . .	92
5.2.1 Decoupled Flux Approximation on Cartesian Grids . . . . .	93
5.2.2 Coupled Flux Approximation on Cartesian Grids . . . . .	98
5.2.3 Equivalence of the Two Flux Approximations . . . . .	102
5.2.4 Generalization to Non-Uniform Rectilinear Grids . . . . .	106
5.3 Comparison of Flux Approximations for Electrolytes . . . . .	108
5.3.1 Analyzing the Electrolyte Coefficients . . . . .	108
5.3.2 One-Dimensional Spatial Grid Convergence . . . . .	110
<b>6 A Semi-Implicit Solver for the Cell Degradation Model</b>	<b>121</b>
6.1 Motivation . . . . .	122
6.2 Developing the Semi-Implicit Solver for the Cell Degradation Model . . . . .	125
6.2.1 Operator Splitting for the SEI Growth Dynamics . . . . .	126
6.2.2 Linear Preconditioning for the Semi-Implicit Solver . . . . .	128
6.2.3 Evaluating the Linear Preconditioning Strategies . . . . .	133
6.2.4 Assembling the Semi-Implicit Solver . . . . .	138
6.3 Solver Comparison for Full Cell Charging Simulations . . . . .	148
6.3.1 Simulation Study for $\mathcal{G}_{SEI}$ . . . . .	148
6.3.2 Simulation Study for $\mathcal{G}_{SEI}$ . . . . .	152
6.4 Increased Robustness of the Semi-Implicit Solver . . . . .	156
6.5 SEI Growth during Storage and Cycling . . . . .	161
6.5.1 Calendar Aging Simulations . . . . .	162
6.5.2 Cyclic Aging Simulations . . . . .	167
<b>7 Summary and Conclusion</b>	<b>179</b>
<b>A Linear Solver Comparison</b>	<b>185</b>
A.1 General Row Scalings . . . . .	186
A.2 Linear Solvers and Iterative Preconditioners . . . . .	186
A.2.1 Block Preconditioner BGS(AMG) . . . . .	188
A.3 Comparison of Linear Solvers . . . . .	189
A.3.1 Scaling Preconditioners . . . . .	190
A.3.2 Block Partitioning Strategies . . . . .	195
A.4 Summary and Concluding Remarks . . . . .	203
<b>B Solver Parameters</b>	<b>207</b>
B.1 SAMG Parameters . . . . .	207
<b>C Additional Computations and Results</b>	<b>209</b>
C.1 Current Density TPFA between Active Material and CBD . . . . .	209
C.2 Iterative Linear Solvers as Preconditioners . . . . .	210
C.3 Charging Simulation Results on Small Geometries . . . . .	211
C.4 Simulation Results for Electrolyte TPFA Study . . . . .	214
C.5 Temporal Convergence for Charging Simulation on $\mathcal{G}_{SEI}$ . . . . .	214
C.6 Temporal Convergence for Storage Simulation on $\mathcal{G}_{SEI}$ . . . . .	214
<b>Acronyms</b>	<b>219</b>
<b>List of Symbols</b>	<b>221</b>
