

Table of Contents

Widening and Interpolation	1
<i>Kenneth L. McMillan</i>	
Program Analysis and Machine Learning: A Win-Win Deal.....	2
<i>Aditya V. Nori and Sriram K. Rajamani</i>	
Program Analysis for Web Security.....	4
<i>John C. Mitchell</i>	
Astrée: Design and Experience	5
<i>Daniel Kästner</i>	
Formal Model Reduction.....	6
<i>Jérôme Feret</i>	
Purity Analysis: An Abstract Interpretation Formulation.....	7
<i>Ravichandhran Madhavan, Ganesan Ramalingam, and Kapil Vaswani</i>	
The Complexity of Abduction for Separated Heap Abstractions	25
<i>Nikos Gorogiannis, Max Kanovich, and Peter W. O’Hearn</i>	
Efficient Decision Procedures for Heaps Using STRAND	43
<i>P. Madhusudan and Xiaokang Qiu</i>	
The Flow-Insensitive Precision of Andersen’s Analysis in Practice	60
<i>Sam Blackshear, Bor-Yuh Evan Chang, Sriram Sankaranarayanan, and Manu Sridharan</i>	
Side-Effect Analysis of Assembly Code	77
<i>Andrea Flexeder, Michael Petter, and Helmut Seidl</i>	
Directed Symbolic Execution	95
<i>Kin-Keung Ma, Khoo Yit Phang, Jeffrey S. Foster, and Michael Hicks</i>	
Statically Validating Must Summaries for Incremental Compositional Dynamic Test Generation	112
<i>Patrice Godefroid, Shuvendu K. Lahiri, and Cindy Rubio-González</i>	
On Sequentializing Concurrent Programs.....	129
<i>Ahmed Bouajjani, Michael Emmi, and Gennaro Parlato</i>	

Verifying Fence Elimination Optimisations	146
<i>Viktor Vafeiadis and Francesco Zappa Nardelli</i>	
An Efficient Static Trace Simplification Technique for Debugging Concurrent Programs.....	163
<i>Jeff Huang and Charles Zhang</i>	
A Family of Abstract Interpretations for Static Analysis of Concurrent Higher-Order Programs	180
<i>Matthew Might and David Van Horn</i>	
Abstract Domains of Affine Relations	198
<i>Matt Elder, Junghee Lim, Tushar Sharma, Tycho Andersen, and Thomas Reps</i>	
Transitive Closures of Affine Integer Tuple Relations and Their Overapproximations	216
<i>Sven Verdoolaege, Albert Cohen, and Anna Beletska</i>	
Logico-Numerical Abstract Acceleration and Application to the Verification of Data-Flow Programs	233
<i>Peter Schrammel and Bertrand Jeannot</i>	
Invisible Invariants and Abstract Interpretation	249
<i>Kenneth L. McMillan and Lenore D. Zuck</i>	
An Abstraction-Refinement Framework for Trigger Querying	263
<i>Guy Avni and Orna Kupferman</i>	
Bound Analysis of Imperative Programs with the Size-Change Abstraction	280
<i>Florian Zuleger, Sumit Gulwani, Moritz Sinn, and Helmut Veith</i>	
Satisfiability Modulo Recursive Programs	298
<i>Philippe Suter, Ali Sinan Köksal, and Viktor Kuncak</i>	
Probabilistically Accurate Program Transformations.....	316
<i>Sasa Misailovic, Daniel M. Roy, and Martin C. Rinard</i>	
Probabilistic Abstractions with Arbitrary Domains	334
<i>Javier Esparza and Andreas Gaiser</i>	
Software Verification Using k -Induction	351
<i>Alastair F. Donaldson, Leopold Haller, Daniel Kroening, and Philipp Rümmer</i>	
Using Bounded Model Checking to Focus Fixpoint Iterations	369
<i>David Monniaux and Laure Gonnord</i>	
Author Index	387
