

Table of Contents

1	Introduction	1
1.1	Problem Statement.....	2
1.2	Research Contributions.....	2
1.3	Thesis Structure	4
1.4	Formatting Conventions	5
2	Background and Related Work	7
2.1	Fault Tree Analysis	7
2.1.1	Failure Rates and Failure Probabilities	8
2.1.2	Probability Calculation.....	9
2.1.3	Conditional Probabilities.....	14
2.1.4	Importance Measures.....	15
2.1.5	Minimal Cut Set Analysis	15
2.1.6	Independence of Events	16
2.1.7	Repeated Events.....	17
2.1.8	Negated Events	17
2.2	Extensions to Fault Tree Analysis	18
2.2.1	Component Fault Trees	19
2.2.2	Dynamic Fault Trees	20
2.2.3	State/Event Fault Trees.....	20
2.2.4	Combining Markov Chains with Fault Trees	21
2.3	Conclusion	21
3	Solution Overview.....	23
3.1	DaFTs.....	23
3.1.1	Tracing of Dependency Information	24
3.1.2	Probability Calculation.....	26
3.1.3	Probability Table	27
3.1.4	Example	28
3.2	DaCFTs.....	28
3.2.1	Port Interface	29
3.2.2	Modular Composition	29
3.2.3	Sub-tree Collapsing.....	30

3.3	Conclusion	31
4	Dependency-aware Fault Tree Analysis	33
4.1	Information Artifacts	34
4.1.1	Event Labels.....	34
4.1.2	Dependency Table.....	35
4.1.3	Default Probability	36
4.1.4	Probability Table	37
4.2	DaFT Modeling Elements.....	45
4.3	Probability Calculation	46
4.3.1	Basic Event.....	46
4.3.2	Gate Probability Calculation	47
4.3.3	AND Gates.....	48
4.3.4	OR Gates	55
4.3.5	NOT Gates	63
4.3.6	XOR Gates	66
4.4	Modular Composition of DaFTs.....	76
4.4.1	Proxy Gates.....	77
4.4.2	Input Ports and Output Ports.....	78
4.4.3	Requirements for Modeling DaCFTs	79
4.5	Decomposition of Large DaFTs	80
4.6	Complexity.....	81
4.7	Limitations	83
4.8	Conclusion	84
5	Implementation and Evaluation	85
5.1	DaFT Add-In for Enterprise Architect.....	85
5.1.1	Meta-Model.....	85
5.1.2	Tagged Values	86
5.1.3	Shape Scripts	89
5.1.4	Implementation in C#.....	89
5.1.5	Installation	90
5.2	DaFT Add-In Usage.....	90
5.2.1	Project Structure	90
5.2.2	Diagram Modeling.....	91
5.2.3	Context Menu Actions	91
5.2.4	Extended Logging.....	94
5.2.5	LaTeX Output and PDF Generation	94

5.3	DaFT Examples.....	94
5.3.1	Example with Top-level OR Gate.....	94
5.3.2	Example with Top-level AND Gate	96
5.3.3	Example with a Varying Number of Labels	98
5.4	DaCFT Examples	100
5.4.1	DaCFT Diagram with Multiple Input Ports	100
5.4.2	DaCFT Diagram with One Input Port	101
5.5	Complexity.....	104
5.6	Conclusion	105
6	Impact Analysis with DaFTs	107
6.1	Tracing of Impact	107
6.2	Impact Calculation	108
6.2.1	Example	108
6.2.2	Impact Probabilities.....	109
6.2.3	Impact Factor	110
6.3	Visualization	110
6.3.1	Path Highlighting.....	111
6.3.2	Coloring Probability Table Entries.....	112
6.3.3	Reordering Probability Table Entries.....	112
6.3.4	Adding Impact Factors to Probability Table Entries ..	112
6.3.5	Hiding Irrelevant DaFT Parts	113
6.3.6	Combining All Visualizations.....	113
6.4	Conclusion	114
7	Conclusion.....	115
7.1	Limitations	116
7.2	Open Questions and Future Work	116
	References.....	119
	Acronyms	123
	Glossary.....	125
A	DaFT Add-In for Enterprise Architect	129
A.1	Shape Scripts for DaFT Elements	129
A.1.1	Basic Event Shape Script	129
A.1.2	DaFT Gate Shape Scripts.....	131
A.1.3	Dependency Table Shape Script	138

A.2	Code Snippets in C#	140
B	DaFT Examples	147
B.1	Full Examples from Chapter 5	147
B.1.1	Diagram with Top-level OR gate	147
B.1.2	Diagram with Top-level AND gate	155
B.2	Example with Varying Number of Labels	169
B.2.1	Example with 3 Labels.....	169
B.2.2	Example with 5 Labels.....	180
B.2.3	Example with 7 Labels.....	194
B.3	DaCFT Example.....	214
B.3.1	Sub-Diagram DaCFT1	214
B.3.2	Sub-Diagram DaCFT2	216
B.3.3	Sub-Diagram DaCFT3	219
