Abstract	7
Deutsche Zusammenfassung	9
Acknowledgements	11
List of publications	13
1 Introduction	17
1.1 Motivation	17
1.2 Objectives of this work	20
1.3 Outline of this work	23
2 Fundamentals	25
2.1 Photonic crystals	26
2.1.1 Electromagnetic fields and waves in media	26
2.1.2 Photonic bandstructure	28
2.1.3 Light at interfaces	30
2.1.4 Local density of optical states	32
2.1.5 The Bragg structure	32
2.2 Upconversion	34
2.2.1 Upconverting materials	34
2.2.2 The upconversion process	36
2.2.3 Upconversion for photovoltaics	40
2.2.4 Increasing upconversion performance via photonic structure effects	42
2.2.5 State of the art of photonic structure enhanced upconversion	43
3 Methods	55
3.1 Modeling	56
3.1.1 Transfer matrix formalism	56
3.1.2 Optical local energy density in multilayer stacks	58
3.1.3 Calculating the local density of optical states	59
3.1.4 Calculating the fractional local density of optical states	61

3.1.5	Modeling upconversion	63
3.1.6	Modeling photonic effects on upconversion	67
3.2	Experimental	69
3.2.1	Fabrication methods	69
3.2.2	Nanostructural characterization methods	70
3.2.3	Photoluminescence measurements	71
3.3	Contributions to this chapter	75
4	Fabricating photonic upconverter devices	77
4.1	Design of active layers	78
4.1.1	Core-shell upconverter nanoparticles	78
4.1.2	Layer composition	78
4.1.3	PMMA absorption	79
4.1.4	Layer uniformity and nanoparticle distribution	80
4.1.5	Layer thickness adjustment and roughness	81
4.1.6	Refractive index	83
4.2	Design of high refractive index layers	84
4.2.1	Layer composition	84
4.2.2	Crystallinity	84
4.2.3	Refractive index	84
4.2.4	Layer thickness adaption	86
4.3	Design of optimized Bragg structures	87
4.3.1	Composition of reference samples	87
4.3.2	Design wavelength determination	87
4.3.3	Multilayer uniformity and nanoparticle distribution	89
4.4	Summary	90
4.5	Contributions to this chapter	91
5	Modeling photonic upconverter devices	93
5.1	Photonic effects in a Bragg structure	95
5.1.1	Optical local energy density	95
5.1.2	Local density of optical states	100
5.1.3	Fractional local density of optical states	102
5.2	Upconversion photoluminescence and quantum yield	104
5.2.1	Homogeneous media	104
5.2.2	Impact of photonic effects	105
5.2.3	Analysis of maximum upconversion efficiency	111
5.2.4	Impact of Bragg structure materials and fabrication constraints	115
5.2.5	Directionality of emission	118
5.3	Summary	120
5.4	Contributions to this chapter	122
6	Comparison of model and experiment	123
6.1	Upconversion photoluminescence in Bragg structure	124
6.2	Upconversion for photovoltaics - varied parameters	124
6.3	Design wavelength	126

6.4	Excitation wavelength	127
6.5	Irradiance	130
6.6	Excitation angle	132
6.7	Discussion of results in the context of literature	135
6.8	Summary	136
6.9	Contributions to this chapter	137
7	Conclusion and outlook	139
7.1	Conclusion	139
7.2	Outlook	142
A	Appendix	145
A.1	Experimental parameters of the rate equation model	145
	List of symbols	149
	List of acronyms	155
	List of Figures	156
	List of Tables	160
	Bibliography	163
