

Contents

1	Introduction	1
1.1	The History of Shell Modelling	2
1.2	Preliminary Work on Developable Structures	4
1.3	Outline	5
2	Basics and Notation	7
2.1	Omitting Parameters	7
2.2	Linear Algebra	8
2.3	Differentiability	9
2.4	The Euclidean and the Real Space	9
3	Differential Geometry of Curves and Surfaces	11
3.1	Manifolds and their Description	11
3.2	Curves and Surfaces	12
3.3	Framed Curves	16
3.4	Reference Parametrisations and Deformations	22
3.5	Isometric Deformations	23
3.6	Surface Curvature	26
4	Geometric Model Reduction	31
4.1	Developable and Ruled Surfaces	31
4.2	Director Decomposition	38
4.3	Regularity of Developable Surfaces	39
4.4	Rectifying Developable Surfaces	42
4.5	Differential Equations of Developability	47
4.6	The Fundamental Forms of Developable Surfaces	49
4.7	Isometric Deformations of Developable Ruled Surfaces	50
4.8	Compositions of Developable Surfaces	60
5	Computational Methods	65
5.1	Kirchhoff-Love Shells	65
5.2	Isogeometric Discretisation	70
5.3	Geometric Boundary Conditions	80
5.4	Non-linear Optimisation	83
5.5	Gradient Computation	87
5.6	Summary of the Computational Method	89
6	Simulations and Numerical Analysis	91
6.1	Comparison of Methods	91
6.2	Extended Euler elastica	97
6.3	Spatial Directrices	101

6.4	The Möbius Strip	102
6.5	Ribbons with Curved Reference Directrix	103
6.6	Ribbons of Varying Width	106
7	Closure	109
7.1	Open Ends	109
7.2	Conclusion	111
A	Auxiliary Statements	113
A.1	Curves	113
A.2	Ruled Surfaces	113
A.3	Envelopes of Planes	115
A.4	Tensor Fields for Developable Surfaces	117
A.5	The Isotropic Material Tensor	119
A.6	A Dual Description of Developable Surfaces	120
B	Methods in Non-linear Optimisation	123
B.1	Descent Methods for Unconstrained Problems	123
B.2	Equality and Inequality Constraints	124
B.3	Constraint Penalisation	124
B.4	The Method of Lagrange Multipliers	125
B.5	Penalty and Barrier Method	126
B.6	Sequential Quadratic Programming	127
B.7	Interior Point Methods	128
C	Algorithmic Differentiation	129
C.1	Graph Theory	129
C.2	Forward Mode	130
C.3	Reverse Mode	131
C.4	Comparison	131
D	Simulation Results	133
D.1	Comparison of Methods	133
D.2	The Möbius Strip	136
D.3	Ribbons with Curved Reference Directrix	137
D.4	Ribbons of Varying Width	138
	Bibliography	XI
	List of Symbols	XXIII
	Index	XXVII
	List of Figures	XXXI
