

Contents

I Basics

1	Basic Concepts of Analytics	3
1.1	Design of the Experiment.....	4
1.2	And How Do I Get a Useful Answer?	5
2	Sampling and Sample Preparation	7
2.1	Separation Process	9
2.2	Sample Drying.....	15
3	Quality Assurance and Calibration	17
3.1	Everything Must Have Its Order: The Norm.....	20
3.2	Quantity Ranges	23
3.3	Calibration	25
3.4	Not All Standards Are Created Equal.....	28
3.5	Analytical Quality Assurance (AQA) and Good Laboratory Practice (GLP)	30
3.6	Significant Figures or: When Does “Exact” Become “Too Exact”?	31
3.7	A Brief Foray into Statistics	37
3.8	Summary.....	40
3.8.1	Basic Terms	40
3.8.2	Sampling and Separation Methods.....	40
3.8.3	Quality Assurance and Calibration.....	40
	Answers	41
	Literature.....	48

II Volumetric Analysis

4	General Information on Volumetric Analysis	53
5	Volumetric Analysis with Acids and Bases	57
5.1	Strong Acid with Strong Base (and Vice Versa)	63
5.2	Weak Acid with Strong Base/Weak Base with Strong Acid	66
5.3	Polyprotic Acids	73
5.4	Endpoint Determination.....	74
6	Volumetric Analysis with Complexes (Complexometry)	79
6.1	Combination of Two Principles.....	80
6.2	Versatile and Widely Used: EDTA.....	82
7	A Combination with Considerable Potential: Redox Titrations	87
7.1	Short-Circuited.....	88
7.2	Reference Values.....	89
7.3	The End Point (Almost Like with Acids and Bases).....	93
8	Poor Solubility Can Be Advantageous: Precipitation Titration	95
8.1	The Importance of the Solubility Product	96
8.2	Graphical Representation.....	97
8.3	Determination of the End Point	98

9	Gravimetry	99
9.1	Precipitation Form	100
9.2	Weighing Form.....	101
9.3	Special Case: Electrogravimetry.....	102
10	Selected Detection Methods	103
10.1	The Colour Change: Colorimetry	104
10.2	Altered Absorption Behaviour: Photometry.....	105
10.3	Changes in Electrochemical Potential: Potentiometry.....	106
10.4	Changes in Electrical Conductivity: Conductometry	107
10.5	Summary	109
	Further Reading	115

III Chromatographic Methods

11	General Information on Chromatography	121
12	Liquid Chromatography (LC)	125
12.1	Thin Layer Chromatography (TLC)	126
12.2	Column Chromatography.....	128
12.3	High Performance Column Chromatography (HPLC)	140
12.4	Detection Methods.....	147
13	Gas Chromatography (GC)	149
13.1	Columns in GC	150
13.2	Detectors.....	153
14	Specialised Forms of Chromatography	155
14.1	Ion Exchange Columns	156
14.2	Exclusion Chromatography	159
14.3	Affinity Chromatography.....	160
15	Electrophoresis	163
15.1	Capillary Electrophoresis (CE)	164
15.2	Gel Electrophoresis.....	167
16	Choice of Methodology	171
16.1	Summary	172
16.1.1	Liquid Chromatography (LC).....	172
16.1.2	Gas Chromatography (GC).....	173
16.1.3	More Specific Forms of Chromatography	173
16.1.4	Electrophoresis.....	173
	Answers.....	174
	Further Reading	177

IV Molecular Spectroscopy

17	General Information About Spectroscopy	181
18	Excitation of Electrons	187
18.1	Spectrophotometry and UV/VIS Spectroscopy	188
18.2	What Is the Effect of the Energy Transmitted by the Photon?	191

18.3	Who Does What?	203
18.4	Returning to the Ground State	209
18.5	Technical Aspects of (Spectral) Photometers	215
18.6	Applications	218
19	Vibrational Spectroscopy	219
19.1	Vibration Modes	220
19.2	Infrared Spectroscopy (IR)	223
19.3	Similar, Yet Different: Raman Spectroscopy	231
19.4	Summary	233
19.4.1	Spectrophotometry and UV/VIS Spectroscopy	233
19.4.2	For Vibrational Spectroscopy	233
19.4.3	IR Spectroscopy	233
19.4.4	Raman Spectroscopy	234
	Further Reading	238

V Atomic Spectroscopy

20	General Information on Atomic Spectroscopy	241
20.1	Atomisation	243
20.1.1	Flames	243
20.1.2	Oven	245
20.1.3	Plasma	246
21	Atomic Absorption Spectroscopy (AAS)	247
21.1	Excited States of the Atoms	248
21.2	Light Sources	252
22	Atomic Emission Spectrometry (AES, OES)	255
22.1	The Historical Precursor: Flame Photometry	256
22.2	ICP-OES	256
22.3	In Combination with Mass Spectrometry	257
23	X-Ray Fluorescence Analysis (XRF)	261
23.1	The Basic Principle	262
23.2	Detection of the Resulting Photons	265
23.3	Summary	268
23.3.1	Atomic Absorption Spectroscopy (AAS)	268
23.3.2	Atomic Emission Spectroscopy (AES)	268
23.3.3	X-Ray Fluorescence Analysis (RFA)	269
23.4	Appendix: Answers	269
	Literature	270

Supplementary Information

Glossary	272
Index	307
