

Contents

- 1 The Logic of the Formative Measurement Model 1**
 - 1.1 Background: Latent Variables 1
 - 1.2 Formative and Reflective Measurement Models 4
- 2 The Application of the Formative Measurement Model 11**
 - 2.1 Formative or Reflective Modeling? 11
 - 2.1.1 Decision Based on Theory and Factual Logic 12
 - 2.1.2 Decision Based on Empirical Data 14
 - 2.2 Implementation of the Formative Model in Practice 21
 - 2.2.1 Index Formation 21
 - 2.2.2 SEM in the Covariance-Based Approach 28
 - 2.2.3 SEM in a Variant-Based Approach 31
- 3 Formative Measurement Models in Psychology and Education? 39**
 - 3.1 Critical Aspects of Formative Models 39
 - 3.2 Formative Modeling of Psychological Constructs? 42
- 4 Data-Driven Index Formation with the MARI Method 47**
 - 4.1 Mental Experiments 49
 - 4.2 Analysis of the Items 57
 - 4.2.1 Qualitative Analysis 57
 - 4.2.2 Quantitative Analysis 61
 - 4.3 Regression Analytical Validation 68
 - 4.3.1 On the Choice of Regression as a Method of Analysis 69
 - 4.3.2 Selection of Dependent Variables 73
 - 4.4 Data-Driven Index Formation 75
