

Contents

1	Motivation and Objectives, Quality and Usability	1
1.1	Motivation	1
1.2	Definitions	5
1.3	Perception and Assessment Processes	10
1.4	Taxonomy of Quality Aspects	13
	Bibliography	18
2	Basics of Psychophysics and Psychometrics	21
2.1	Properties of Measurements.	22
2.2	Psychophysical Measurements	24
2.3	Measuring Quality and Usability	26
2.4	User Types	30
2.5	Psychometric Methods.	33
2.6	Experimental Planning and Design	35
	Bibliography	39
3	Scaling	41
3.1	Scale Types	41
3.2	Ratio Scaling	42
3.3	Category Scaling	43
3.4	Category Ratio Scaling	46
3.5	Multidimensional Analysis	46
3.5.1	Similarity Assessment and Multidimensional Scaling.	48
3.5.2	Semantic Differential and Principal Component Analysis	49
3.5.3	Preference Mapping.	50
3.6	Evaluation of Scaled Measurement Results.	51
	Bibliography	54
4	Usability Engineering	55
4.1	Usability Engineering Lifecycle	56
4.2	Analysis	57
4.3	Design	60

4.4	Prototyping.	62
4.5	Expert Evaluation.	63
4.6	Empirical Testing.	66
4.7	Iterative Design	68
4.8	Feedback from the Field	69
4.9	Summary	71
	Bibliography	71
5	Quality of Voice and Audio Transmission Systems	73
5.1	Quality Elements of Voice Transmission Systems.	74
5.2	Quality Features of Voice Transmission Systems	78
5.3	Basic Information on the Measurement of Speech Quality.	81
5.4	Comprehensibility Tests.	82
5.5	Measurement of Speech Quality in the Listening Test	83
5.6	Measurement of Audio Quality in the Listening Test	84
5.7	Multidimensional Analysis	86
5.8	Conversation Tests	86
5.9	Standards	88
	Bibliography	91
6	Quality of Video Transmission Systems	95
6.1	Quality Elements of Video Transmission Systems	97
6.2	Quality Characteristics of Video Transmission Systems	102
6.3	Basic Information on Measuring Video Quality	104
6.4	Evaluation of Visual Sequences	108
6.5	Evaluation of Audiovisual Sequences	114
6.6	Conversation Attempts.	117
6.7	Standards	118
	Bibliography	119
7	Quality of Spoken Dialog Systems	121
7.1	Quality Elements of Spoken Dialog Systems	122
7.2	Quality Features of Spoken Dialog Systems	125
7.3	Overview	128
7.4	Performance of the System Components.	129
	7.4.1 Speech Recognition	130
	7.4.2 Speech Understanding	131
	7.4.3 Dialog Management.	131
	7.4.4 Speech Output	132
7.5	Quality Measurement of Overall Systems	133
	7.5.1 Annotation of Interactions	134
	7.5.2 Measurement of Interaction Parameters	135

7.5.3	Quality Measurement by Means of Questionnaires	144
7.5.4	Wizard-of-Oz Tests	144
7.6	Standards	145
	Bibliography	145
8	Quality of Multimodal Systems	149
8.1	Quality Elements of Multimodal Dialog Systems	153
8.2	Determining the Performance of Multimodal System Components	154
8.3	Quality Measurement in Multimodal Dialogue Systems	156
8.4	Measurement of Other Quality Aspects	158
	Bibliography	158
9	Quality Prediction	163
9.1	Models for Predicting Speech Transmission Quality	166
9.1.1	Model Types	166
9.1.2	Signal-Based Comparison Measures	168
9.1.3	Parametric Models	171
9.1.4	Quality Monitoring	172
9.1.5	Prediction of Speech Intelligibility	174
9.2	Models for Predicting Video Transmission Quality	176
9.2.1	Signal-Based Models	178
9.2.2	Parametric Models	180
9.3	Models for Predicting Interaction Quality	183
9.3.1	Regression Models	184
9.3.2	Simulation of User Behavior	184
9.4	Summary and Outlook	186
	Bibliography	188
	Index	191
