List of Contributors xv

Preface xix

Introduction xxi

1 Epidemiology and Economic Impact of Foot Ulcers 1

Edward J. Boyko and Matilde Monteiro-Soares

- 1.1 Introduction 1
- 1.2 Diabetic Foot Ulcer (DFU) Definition 1
- 1.3 DFU Classification 2
- 1.4 DFU Incidence and Prevalence 3
- 1.5 DFU Recurrence 5
- 1.6 Risk Factors for Diabetic Foot Ulcers and Lower Extremity Amputation 6
- 1.7 Diabetic Foot Ulcer Outcomes 7
- 1.8 Economic Considerations 9
- References 10

2 Cost of Diabetic Foot Disease in England 17

Marion Kerr

- 2.1 Introduction 17
- 2.2 Human Costs 17
- 2.3 Financial Costs 20
- 2.4 Why Measure Costs? 22
- 2.5 Establishing Healthcare Priorities 22
- 2.6 Conclusions 25
- References 26

3 Epidemiology of Amputation and the Influence of Ethnicity 31

Caroline A. Abbott

- 3.1 Why Study the Epidemiology of LEA? 31
- 3.2 LEA Incidence Study Design: The Risk of Bias 32
- 3.3 LEA Risk Assessment Study Design 32
- 3.4 Risk Factors for LEA 33
- 3.5 Incidence Rates of LEA 34
- 3.6 International and Regional Differences 34
- 3.7 Time Trends in LEA Rates 34

3.8	Ethnic Differences in Diabetes-Related LEA	35
3.9	Ethnic Differences in Diabetes-Related LEA Risk	35
3.10	Indian Asians	38
	References	38
4a	The Diabetic Foot Worldwide: India	43
	<i>M. Viswanathan</i>	
4a.1	Introduction	43
4a.2	Epidemiology of Diabetes in India	43
4a.3	Socio Economic Burden Due to Diabetes	43
4a.4	Common Risk Factors for Amputation in India	43
4a.5	Diagnosing High Risk Feet in Developing Countries	44
4a.6	Comparison in Risk Factors between India and the Western World	44
4a.7	DFI as a Cause for Declining Kidney Function	44
4a.8	Helping People with Amputation Cope Up with the Disability	44
	References	45
4b	The Diabetic Foot Worldwide: Pakistan	47
	<i>Abdul Basit</i>	
4b.1	Introduction	47
4b.2	Concept of Multidisciplinary Diabetic Foot Care Team (MDFCT)	47
4b.3	Nationwide Diabetic Foot Programme (Step by Step-[SbS])	48
4b.4	Footwear for Every Diabetic (FED)	48
4b.5	Further Steps Ahead of SbS	49
	References	49
4c	The Diabetic Foot Worldwide: Sub-Saharan Africa	51
	<i>Zulfiqarali G. Abbas</i>	
4c.1	Introduction	51
4c.2	Pathophysiology of Foot Ulcers	52
4c.3	Peripheral Neuropathy (PN)	52
4c.4	Peripheral Arterial Diseases (PAD)	53
4c.5	Foot Ulceration in SSA	54
4c.6	Foot Infection	55
4c.7	Amputation	56
4c.8	Mortality	56
4c.9	Prevention	56
4c.10	Conclusions	58
	References	58
4d	Burden of Diabetic Foot Disease in Brazil	61
	<i>Hermelinda C. Pedrosa and Luciana R. Bahia</i>	
	References	64
4e	Diabetic Foot in Romania and Eastern Europe	67
	<i>Norina Alinta Găvan and C. I. Bondor</i>	
4e.1	Introduction	67
4e.2	The Aim	67

4e.3	Diabetic Foot in Romania	67
4e.4	Diabetic Foot in Eastern Europe	70
4e.5	Conclusions	71
	References	71
4f	Diabetic Foot Worldwide: Pacific Region	75
	<i>Shigeo Kono</i>	
	References	76
4g	The Diabetic Foot Worldwide: Middle East	79
	<i>Samir H. Assaad-Khalil</i>	
4g.1	The Burden of Diabetic Foot Disease (DFD) in the Middle East (ME)	79
4g.2	Specific Regional Barriers to Healthy Feet and Foot Care	80
4g.3	Misconceptions	81
4g.4	Footwear	81
4g.5	Foot Care, Education and Awareness	81
	References	82
4h	The Diabetic Foot Worldwide: Australasia	85
	<i>Peter A. Lazzarini</i>	
4h.1	Introduction	85
4h.2	Australia	85
4h.3	New Zealand	86
4h.4	Pacific Islands	86
4h.5	Conclusion	87
	References	87
5	Diabetic Neuropathy	89
	<i>Dinesh Selvarajah, Gordon Sloan, and Solomon Tesfaye</i>	
5.1	Epidemiology	89
5.2	Classification	89
5.3	Symmetrical Neuropathies	91
5.4	Asymmetrical Neuropathies	95
5.5	Pathogenesis of Distal Symmetrical Neuropathy	97
5.6	Management of Diabetic Neuropathy	98
	References	101
6	The Pathway to Ulceration: Aetiopathogenesis and Screening	105
	<i>Andrew J.M. Boulton</i>	
6.1	Introduction	105
6.2	Peripheral Arterial Disease (PAD)	106
6.3	Diabetic Neuropathy	107
6.4	Neuropathy: The Major Contributory Factor in Ulceration	109
6.5	Other Risk Factors for Foot Ulceration	109
6.6	Assessment of Foot Ulcer Risk	111
6.7	The Pathway to Ulceration	116

6.8	Mechanical Factors and Neuropathic Foot Ulceration	118
6.9	The Patient with Sensory Loss	120
	References	120
7	Biomechanics of the Diabetic Foot for the Uninitiated	125
	<i>S.A. Bus and J.S. Ulbrecht</i>	
7.1	Introduction	125
7.2	The Concept of Pressure and its Measurement	125
7.3	The Role of Elevated Plantar Pressure in Foot Ulceration	126
7.4	Mechanisms of Elevated Plantar Pressure	128
7.5	Foot Biomechanics in Treating a Plantar Foot Ulcer	130
7.6	Biomechanical Issues in Preventing a Foot Ulcer	132
7.7	Summary	133
	References	134
8	Psychological and Behavioural Aspects of Diabetic Foot Ulceration	139
	<i>Loretta Vileikyte and Ryan T. Crews</i>	
8.1	The Role of Psychological and Behavioural Factors in DFU Development	139
8.2	The Role of Psychological and Behavioural Factors in DFU Healing	142
8.3	The Impact of DFUs on Patients' Health Status and QoL	146
8.4	Measuring QoL in DFU Patients: Generic, DFU-Specific or Combined Approach?	147
	References	148
9	What Role for the Plain Radiograph of the Diabetic Foot?	153
	<i>Richard William Whitehouse</i>	
9.1	Introduction	153
9.2	Pathologies	157
9.3	Summary	166
	References	167
10	Advanced Cross-Sectional Radiology-Ultrasound, Computed Tomography and Magnetic Resonance Imaging of the Diabetic Foot	169
	<i>Aparna Komaraju and Avneesh Chhabra</i>	
10.1	Introduction	169
10.2	Pathophysiology of Diabetic Foot Disease	170
	References	183
11	Gait and Exercise Training in Diabetic Peripheral Neuropathy	187
	<i>Neil D. Reeves</i>	
11.1	Introduction	187
11.2	Gait Characteristics of People with Diabetes	187
11.3	Muscle Forces and the Biomechanics of Gait in Diabetes	188
11.4	Biomechanical Strategies to Alter Gait in Diabetic Peripheral Neuropathy	190

- 11.5 Falls and Diabetic Peripheral Neuropathy 193
- 11.6 Biomechanical Factors Leading to Increased Fall Risk 193
- 11.7 Diabetic Peripheral Neuropathy and Balance during Gait 194
- 11.8 Exercise and Diabetic Peripheral Neuropathy 196
- 11.9 Effects of Exercise in Patients with Diabetic Peripheral Neuropathy on Gait and Balance 197
- 11.10 The Case for Resistance Exercise Training 198
- References 198

12 Smart Technology for the Diabetic Foot in Remission 201

Bijan Najafi and David G. Armstrong

- 12.1 Background 201
- 12.2 Technologies to Guide the Prescription of Footwear-Related Offloading Treatments 203
- 12.3 Technologies to Facilitate Triaging those at High Risk of DFU 204
- 12.4 Technologies to Manage Dose of Physical Activities in People with Diabetes and Insensate Foot 211
- 12.5 Using Technology to Improve Patient Education for Effective Prevention of Diabetic Foot Ulcers 214
- 12.6 Mobile Health (mHealth) to Manage Diabetic Foot Ulcers 215
- 12.7 Internet of Things and Remote Management of Diabetic Foot Ulcers 216
- 12.8 Technologies to Facilitate Delivering of Therapy at Home and Reduce Risk of DFU 217
- 12.9 Conclusion 218
- References 219

13 How to Assess the Quality of Clinical Trials for Diabetic Foot Ulcer Therapies 225

Fran Game and William Jeffcoate

- 13.1 Introduction 225
- 13.2 Hierarchy of Evidence 226
- 13.3 Items to Be Considered in Assessing Trials of Diabetic Foot Ulcer Therapies 227
- 13.4 The Population 227
- 13.5 The Person and Limb 228
- 13.6 The Ulcer 229
- 13.7 The Therapy 230
- 13.8 Outcomes 230
- 13.9 Adverse Events 231
- 13.10 21 Point Checklist 231
- References 233

14a Bypass in Diabetic Peripheral Artery Disease 235

Neal R. Barshes and Joseph L. Mills

- 14a.1 Identifying Significant PAD Amongst Patients Presenting with Foot Ulcers 235
- 14a.2 Relative Benefits and Risks: Identifying Patients Who May Benefit from a Leg Bypass Operation 237
- 14a.3 Evaluating Relevant Vascular Anatomy for Planning a Bypass Operation 239
- 14a.4 The Operation and Early In-Hospital Recovery 241
- 14a.5 Follow-Up After a Leg Bypass Operation 243
- References 243

14b Surgery or Endovascular Intervention in Diabetic Peripheral Vascular Disease 247

Edward Y. Woo and Misaki M. Kiguchi

- 14b.1 Introduction 247
- 14b.2 Background 247
- 14b.3 Diagnosis 248
- 14b.4 Management 250
- 14b.5 Endovascular Revascularization 250
- 14b.6 Results 253
- 14b.7 Complications 254
- 14b.8 Conclusion 254
- References 255

15 Inpatient Diabetic Foot Care: A UK Perspective 259

Gerry Rayman

- 15.1 Introduction 259
- 15.2 The Burden of Inpatient Diabetes 260
- 15.3 The Burden of Inpatient Diabetic Foot Disease 260
- 15.4 Recommended Foot Care for Inpatients with Diabetes 261
- 15.5 Summary 262
- References 263

16 Diagnosis and Management of Infection in the Diabetic Foot 265

Edgar J.G. Peters and Benjamin A. Lipsky

- 16.1 Introduction 265
- 16.2 Pathophysiology of Infections in Persons with Diabetes Mellitus 265
- 16.3 Risk Factors for DFI 266
- 16.4 Clinical Signs and Symptoms 266
- 16.5 Classification 267
- 16.6 Microbiology 268
- 16.7 Treatment 269
- 16.8 IWGDF Grade 4 (Severe) Infections 274
- 16.9 Osteomyelitis 275
- References 280

17	Surgical Approach to Diabetic Foot Infections	287
	<i>Katherine M. Raspovic, Javier La Fontaine, and Lawrence Lavery</i>	
17.1	Introduction	287
17.2	Initial Evaluation	288
17.3	Initial Surgical Intervention	290
17.4	After Initial Surgical Intervention	293
17.5	Staged Surgical Intervention and Wound Closure	294
17.6	Surgical Offloading	296
17.7	Soft Tissue/Tendon Balancing and Definitive Osseous Surgical Reconstruction	296
17.8	Decision for Proximal Level Amputation	297
17.9	Conclusions	298
	References	298
18	The Evidence Base for the Choice of Dressings in the Management of Diabetic Foot Ulcers	301
	<i>William J. Jeffcoate, Patricia E. Price, and Frances L. Game</i>	
18.1	The Problems	301
18.2	Quality of Evidence	302
18.3	The Definition of a Dressing	302
18.4	The Roles of the Dressing	303
18.5	Basic Aspects of Wound Care	304
18.6	Evidence for Potential Contributions of Dressings and Wound Applications to Improve Wound Healing	304
18.7	Other Therapies which May Modulate Healing of Chronic Wounds	306
18.8	Summary	307
	References	308
19	Pathogenesis of Charcot Neuroarthropathy and Acute Management	311
	<i>N.L. Petrova and Michael E. Edmonds</i>	
19.1	Introduction	311
19.2	Pathogenesis of CN	311
19.3	Acute Management of CN	316
19.4	Conclusions	318
	References	319
20	Surgical Reconstruction of the Charcot Foot	323
	<i>George Liu, Katherine Raspovic, and Dane Wukich</i>	
20.1	Introduction	323
20.2	Indications for Surgical Reconstruction	323
20.3	Radiographic Predictors for Ulceration	325
20.4	Timing of Surgery	326
20.5	Preoperative Medical Workup	327
20.6	Glycemic Control	327
20.7	Vitamin D	328
20.8	Renal Function	328

- 20.9 Procedures/Outcome Studies 328
- 20.10 Outcomes of Charcot Reconstruction 334
- 20.11 Summary of Evidence Based Recommendations 335
- References 336

21 Amputation in the Diabetic Foot 345

Michael S. Pinzur and Adam P. Schiff

- 21.1 Introduction 345
- 21.2 Impediments to Rehabilitation in the Diabetic Amputee 345
- 21.3 The Lower Extremity as an Organ of Weight Bearing 346
- 21.4 Metabolic Cost of Walking with an Amputation 346
- 21.5 Limb Salvage vs. Amputation 347
- 21.6 Amputation Level Selection 348
- 21.7 The Terminal Organ of Weight Bearing 348
- 21.8 The Soft Tissue Envelope 351
- 21.9 Tissue Management 351
- 21.10 Outcomes Following Amputation 352
- 21.11 Surgical Amputation Levels 352
- 21.12 Lesser Toe Amputation 353
- 21.13 Ray Resection 353
- 21.14 Midfoot Amputation 355
- 21.15 Hindfoot Amputation 355
- 21.16 Symes's Ankle Disarticulation Amputation 356
- 21.17 Transtibial Amputation 357
- 21.18 Knee Disarticulation Amputation 359
- 21.19 Transfemoral Amputation 359
- 21.20 Conclusions 360
- References 360

22 Rehabilitation of the Amputee 363

Karen Kowalske and Merrine Klakeel

- 22.1 Lower Limb Amputation and Prosthetics 363
- 22.2 Foot Amputations 364
- 22.3 Foot Orthotics 365
- 22.4 Transtibial Amputations 366
- 22.5 Ankle/Foot Components 369
- 22.6 Conclusion 372
- References 372

23 Surgery for the Diabetic Foot: Prophylactic and Osteomyelitis Surgery – Is there an Evidence Base? 375

Javier Aragón-Sánchez

- 23.1 The Role of Surgery Preventing Occurrence and Recurrence of Foot Ulcers 376
- 23.2 Preoperative Care 376
- 23.3 Hallux and First Metatarsal Head Procedures 377
- 23.4 Lesser Toes 380
- 23.5 Lesser Metatarsal Heads 381

23.6	Tendon Achilles Lengthening	383
23.7	Curative Surgery for Treating Diabetic Foot Osteomyelitis	385
23.8	Surgery of Forefoot Osteomyelitis	386
23.9	Surgery of Midfoot Osteomyelitis	388
23.10	Surgery of Rear Foot Osteomyelitis	388
	References	389
24	Footwear and Orthoses for People with Diabetes	395
	<i>J.S. Ulbrecht and S.A. Bus</i>	
24.1	Introduction	395
24.2	What is a Therapeutic Shoe for a Person Living with Diabetes?	395
24.3	Who Needs Therapeutic Shoes?	402
24.4	Choosing the Appropriate Footwear for the Patient with LOPS	403
24.5	Summary and Future Trends	406
	References	406
25	The Diabetic Foot in Remission	409
	<i>Tanzim Khan, Sicco A. Bus, Andrew J.M. Boulton, and David G. Armstrong</i>	
25.1	The Diabetic Foot in Remission	409
25.2	Maintaining Remission	410
25.3	Conclusion	413
	References	414
26	Setting up a Diabetic Foot Clinic	417
	<i>Michael E. Edmonds and N.L. Petrova</i>	
26.1	Natural History of the Diabetic Foot	417
26.2	Principles of Care of the Diabetic Foot	418
26.3	Space for the Diabetic Foot Clinic	418
26.4	Personnel for the Diabetic Foot Clinic	419
26.5	Organisation of the Diabetic Foot Clinic	422
26.6	Conclusion	426
	References	426
27	National Audit of Diabetic Foot Care: Continuing Audit Is Essential for the Delivery of Optimal Care of Diabetic Foot Ulcers	429
	<i>William Jeffcoate, Gerry Rayman, and Bob Young</i>	
27.1	Why Should We Document the Outcome of Routine Care?	429
27.2	General Principles of Clinical Audit	430
27.3	National Diabetes Foot Care Audit of England and Wales	433
	References	437
28	Regenerative Medicine and the Diabetic Foot	439
