

Contents

1	Chance and Coincidence Take their Course.	1
	From Plow Horse to Racehorse	6
2	Essential Uncertainty is Everywhere.	15
	The Accidental Corona Pandemic.	16
	Mankind, an Ecosystem for Viruses	19
	Coincidental Inventions and Disasters	20
	Chance in Economy and Politics and the Unpredictable Consequences	23
	Accidental Events and Coincidences in Scientific Research	27
	The Essential Coincidence—an Attempt at Description.	32
	Alternative Views of Chance and Coincidence.	39
	Chance in Philosophy	45
	Coincidences are Real and Everywhere and Anything but Rare.	47
	The Beginning of Life and Evolution	48
	Curiosities Cabinet of Evolutionary Coincidences	51
	Nature and Evolution is Aimless, <i>homo sapiens</i>	
	is not the Summit of Evolution.	52
	Is Evolution Repeatable?	54
	Chance, Coincidence and Accidental events Are Ruling the World, in the	
	Small as in the Large	56
3	Creativity is Coincidence in the Brain	59
	Cooking is Good Craftsmanship, Science Must Go into Depth	62
	“Dispersion”—Practically Unexplored, but No Witchcraft!.	65
	Dispersion—one after the other	69
	The Discovery: Dispersions are Structured	75
	Mayonnaise, Béarnaise Sauce, Yogurt and Cheese.	81
	Sparkling Ideas and Flashes of Inspiration	87
	Improvisation is Coincidence in the Brain	89

4	“Equilibrium is good, Non-Equilibrium is bad”—is that True?	95
	“Entropy”: Heard of it, but didn’t Understand it?	99
	Entropy does Always Increase? Yes, but not Everywhere!	100
	Further Research on the Phenomenon of “Self-Organization”	104
	Self-Organization, Structure Formation in Non-Equilibrium—Structure	
	Loss in Equilibrium	105
	No Two Snowflakes are Really Identical	107
5	Almost Despairing of Science.	115
	<i>Non-equilibrium</i> also not Popular at Universities.	117
	Scientific Breakthroughs and Inventions Ususally have a Hard Time	119
	<i>Dispersion</i> is Underestimated.	124
	Led Astray by Outward Appearance.	127
	The Power of the Paradigm.	129
	The Power of Images	131
	Retreat from the Research Area with a Bang—Did Anyone Hear It?	138
6	The Birth of Chance and Coincidence in Complex Systems.	141
	Enzymes: Results of Non-Equilibria and Actors Therein.	142
	Higher Aggregation Level of Matter: New Properties	145
	Do Parlor Games Adequately Represent the Game of Chance and	
	Coincidence in Nature?	149
	Weather and Climate are Chaotic	152
	Chaos in Our Solar System!	158
	Chaotic Typhoon	159
	Dynamic Networks	161
	Similar, but Not Identical Patterns	162
	Nothing is as Constant as Change.	164
	Can The Big Bang Theory Explain the Structures in the Universe?.	167
	The Birth of Chance and Coincidence	170
	Chance and Coincidence is Everywhere—Just Not on the Quantum Level.	174
7	What Flows When “Time Flows”, and Where Does It Flow to?	185
	Is Time an Illusion?.	188
	Can the Direction of Time be Reversed?	192
	The Timelessness of the Quantum—So Time is an Illusion After All?	194
	Do We Live in One of Many Universes?	197
	What Flows There When Time Flows?.	200
	The New Hypothesis About the Nature of Time.	203
	The New Hypothesis is Verifiable and Falsifiable	206
	The Emergence of Entropy, and Thus of Time	208
	The End of Time	210

8 Our Perception of Time

213

Final Remarks

225

Appendix
