

Contents

1	Introduction	1
1.1	Types of Race Cars	1
1.2	Comparison Racing Versus Mass Production	8
1.3	Development Process	12
	References	17
2	Vehicle Concept and Draft Design	19
2.1	Development <i>Process</i>	20
2.2	Design Areas	21
2.3	Concept <i>Characteristic</i>	22
2.3.1	<i>Engine</i> Position and Drive Layout	24
2.3.2	Concept Comparison	27
2.4	Conceptual Design of Overall Vehicle <i>Layout of Overall Vehicle</i>	51
2.5	General Principles of <i>Embodiment</i> Design	57
2.6	Materials	80
2.6.1	Overview of Common <i>Materials</i>	80
2.6.2	Material Comparison	84
2.6.3	Material Selection	85
2.7	Costs	87
	References	90
3	Safety	93
3.1	Vehicle Construction	94
3.2	Switches	95
3.3	Protective Devices	99
3.4	Fasteners	117
3.5	Tests	121
	References	127

4 Cockpit	129
4.1 Concept	129
4.2 Driver's Position	133
4.3 <i>Seat</i>	139
4.4 Steering Wheel	143
4.4.1 Position of Steering Wheel	143
4.4.2 Steering Wheel Dimensions and Types	144
4.5 Foot Lever Mechanism and Pedals	148
4.6 <i>Linkage</i>	159
4.7 Dashboard	164
4.8 Restraint Systems	166
4.9 Examples	172
References	174
5 Aerodynamics	177
5.1 Introduction	177
5.2 Air Resistance	179
5.3 Downforce	193
5.4 Wing Calculation	228
5.5 Air Deflectors	233
5.6 Heat Removal and Ventilation	236
5.7 Dimensioning and Setup	245
References	253
6 Frame	255
6.1 Requirements	256
6.2 Types of Construction	257
6.2.1 Tubular Space Frame	257
6.2.2 Box Frame (Sheet Metal Monocoque)	277
6.2.3 Composite Monocoques	298
6.3 Strength	321
6.4 Add-on Parts	329
6.4.1 Brackets and Mounts	329
6.4.2 Towing Systems	333
References	334
7 Bodywork	337
7.1 Terms	338
7.2 Requirements	338
7.3 Design	339
7.4 Materials	353
References	353

8 Comparison Series: Racing	355
8.1 Introduction	355
8.2 Development <i>Process</i>	356
8.3 Development <i>Goals</i>	357
8.4 Research and Development (R&D)	358
8.5 Costs	359
8.6 Environmental Protection	361
8.7 Technology	362
8.7.1 Frame and Body	362
8.7.2 Engine	363
8.7.3 Power Train	365
8.7.4 Suspension	366
