

Table of contents

0. Introduction8

1. Regulated water speeds in the countercurrent pool8

1.1 How it all began8

1.2 Technical requirement for streaming water9

1.3 Different types of TZ countercurrent pools18

1.4 Special technical requirement in health sports23

1.5 Main application areas and target groups of the swimming flume ... 25

2. Streaming water in sports training30

2.1 Sports swimming30

2.1.1 Overview of training methodological priorities30

2.1.2 Endurance training39

2.1.2.1 Endurance training on the short distance48

2.1.2.2 Endurance training on middle distance49

2.1.2.3 Endurance training on the long distance50

2.1.3 Speed training51

2.1.4. Strength training in streaming water55

2.1.4.1 Importance of strength training for swimmers55

2.1.4.2. Training methodical tasks in strength training65

2.1.4.3 Model programs70

2.1.5 Competition-specific training78

2.2 Canoe racing89

2.2.1 Overview of training methodological priorities91

2.3 Fitness training93

2.3.1 Versatile training to improve the general condition -
exercise Main Programm 193

2.3.2 Developing general and specific strength -
exercise Main Programm 2100

2.3.3 Developing endurance-oriented skills whit and whitout fins -
exercise Main Programm 3102

2.3.4 Improvement of movement coordination, streching and
relaxing ability - exercise Main Programm 4104

2.3.5 Developing speed-strength abilities in combination whit
active rest - exercise Main Programm 5106

2.3.6 Improvement of water safety; fun and games -
exercise Main Programm 6108

2.3.7 End of training exercises for each Main Program110

3. Performance diagnostics in streaming water114

3.1 Sports swimming114

3.1.1 Standard series117

3.1.2 Competition specific tests120

3.1.3 Forecast tests in training123

3.1.4	Swimming technique	125
3.2	Canoe racing	134
4.	Health sports, exercise therapy and rehabilitation sports	140
4.1	Special technical requirements	140
4.1.1	Health sports	142
4.1.1.1	Selection criteria	143
4.1.1.2	Special features of Model Programs	144
4.2	Exercise therapy and rehabilitation sport	148
4.2.1	Selected exercise programs.....	149
4.2.2	Examples of rehabilitation sports in hospitals and the Olympic Training Center in Berlin.....	151
4.2.2.1	Outpatient rehabilitation treatments at <i>MEDICA Leipzig</i> and <i>Sportmedizin Magdeburg</i> center	151
4.2.2.2	Inpatient rehabilitation treatments at the <i>Raupennest/Alten- berg</i> center	151
4.2.2.3	Rehabilitation training for competitive athletes at the Olympic Training Center in Berlin	152
5.	Scientific work	156
5.1	Scientific work in competitive sports	156
5.1.1	Scientific studies on swimming techniques	157
5.1.2	Heart rate monitoring	168
5.1.3	Respiratory gas analysis and significance of the respiratory parameters	168
5.1.4	Examinations of training aids with „polar system“ for heart rate measuring at different intensity ranges	174
5.1.5	Examination of training aids using lactate measurements	175
5.2.	Exercise therapy and rehabilitation.....	177
5.2.1	Introduction	177
5.2.2	Balance coordination system to determine the patient's load	180
5.2.3	Performance diagnostics for patients whit walking disabilities.....	183
5.2.4	Selected results of the <i>MEDICA Klinik</i> in Leipzig	186
6.	Final remarks	190
7.	Annexes	196
7.1	Speed ranges in swimming (0,30-2,50 m/s).....	197
7.2	Indirect technique parameters (v in m/s, F in 1/min, cycle path in m).....	202
7.3	Overview: Countercurrent pools by the TZ Leipzig in operation ...	207
8.	Literature and Photos	213
