

Contents

Part I General Considerations and Methodological Aspects

Basics and Dynamics of Neonatal and Pediatric Pharmacology	3
Hannsjörg W. Seyberth and Ralph E. Kauffman	
Developmental Pharmacokinetics	51
Johannes N. van den Anker, Matthias Schwab, and Gregory L. Kearns	
Principles of Therapeutic Drug Monitoring	77
Wei Zhao and Evelyne Jacqz-Aigrain	
Drug Delivery and Formulations	91
Jörg Breitzkreutz and Joachim Boos	

Part II Development of Pediatric Medicines

Development of Paediatric Medicines: Concepts and Principles	111
Klaus Rose and Oscar Della Pasqua	
Study Design and Simulation Approach	125
Stephanie Läer and Bernd Meibohm	
Efficacy Assessment in Paediatric Studies	149
Siri Wang and Pirjo Laitinen-Parkkonen	
Safety Assessment in Pediatric Studies	169
Gideon Koren, Abdelbasset Elzagallaai, and Fatma Etwel	

Small Sample Approach, and Statistical and Epidemiological Aspects	181
Martin Offringa and Hanneke van der Lee	
Sample Collection, Biobanking, and Analysis	203
Maurice J. Ahsman, Dick Tibboel, Ron A. A. Mathot, and Saskia N. de Wildt	
Ethical Considerations in Conducting Pediatric Research	219
Michelle Roth-Cline, Jason Gerson, Patricia Bright, Catherine S. Lee, and Robert M. Nelson	
Pediatric Regulatory Initiatives	245
Steven Hirschfeld and Agnes Saint-Raymond	
 Part III Specific Pediatric Pharmacology	
Fetal Medicine and Treatment	271
Magnus Westgren	
Fetal Risks of Maternal Pharmacotherapy: Identifying Signals	285
Gideon Koren	
Antiepileptic Treatment in Pregnant Women: Morphological and Behavioural Effects	295
Torbjörn Tomson and Dina Battino	
Preventive Medicines	317
Ulrich Heininger	
Postmarketing Surveillance	339
Vera Vlahović-Palčevski and Dirk Mentzer	
Global Aspects of Drug Development	353
Kalle Hoppu and Hans V. Hogerzeil	
Index	373
