

Table of Contents

Invited Talks

Causality, Responsibility, and Blame: A Structural-Model Approach (Abstract)	1
<i>Joseph Y. Halpern</i>	
Fuzzy Logic, Annotation Domains and Semantic Web Languages	2
<i>Umberto Straccia</i>	

Discussant Contributions

Logic Programming and Uncertainty	22
<i>Chitta Baral</i>	
Evaluating Probabilistic Inference Techniques: A Question of “When,” not “Which”	38
<i>Cory J. Butz</i>	
Probabilistic Logic Networks in a Nutshell	52
<i>Matthew Iklé</i>	
Dynamics of Beliefs	61
<i>Sébastien Konieczny</i>	
Fuzzy Classifiers: Opportunities and Challenges	75
<i>Anca Ralescu and Sofia Visa</i>	
A Brief Overview of Research in Argumentation Systems	81
<i>Guillermo R. Simari</i>	

Argumentation Systems

Maximal Ideal Recursive Semantics for Defeasible Argumentation	96
<i>Teresa Alsinet, Ramón Béjar, Lluís Godo, and Francesc Guitart</i>	
Argumentation Frameworks as Constraint Satisfaction Problems	110
<i>Leila Amgoud and Caroline Devred</i>	
On the Equivalence of Logic-Based Argumentation Systems	123
<i>Leila Amgoud and Srdjan Vesic</i>	
Bipolarity in Argumentation Graphs: Towards a Better Understanding	137
<i>Claudette Cayrol and Marie-Christine Lagasquie-Schier</i>	

Handling Enthymemes in Time-Limited Persuasion Dialogs.....	149
<i>Florence Dupin de Saint-Cyr</i>	
Argumentation Frameworks with Necessities.....	163
<i>Farid Nouioua and Vincent Risch</i>	
A Heuristics-Based Pruning Technique for Argumentation Trees	177
<i>Nicolás D. Rotstein, Sebastian Gottifredi, Alejandro J. García, and Guillermo R. Simari</i>	
On Warranted Inference in Argument Trees Based Framework	191
<i>Safa Yahi</i>	

Probabilistic Inference

Uncertainty Handling in Quantitative BDD-Based Fault-Tree Analysis by Interval Computation	205
<i>Christelle Jacob, Didier Dubois, and Janette Cardoso</i>	
A Branching Time Logic with Two Types of Probability Operators.....	219
<i>Zoran Ognjanović, Dragan Doder, and Zoran Marković</i>	
A Partition-Based First-Order Probabilistic Logic to Represent Interactive Beliefs	233
<i>Alessandro Panella and Piotr Gmytrasiewicz</i>	
Patterns Discovery for Efficient Structured Probabilistic Inference	247
<i>Lionel Torti, Christophe Gonzales, and Pierre-Henri Wuillemin</i>	
Indirect Elicitation of NIN-AND Trees in Causal Model Acquisition	261
<i>Yang Xiang, Minh Truong, Jingyu Zhu, David Stanley, and Blair Nonnecke</i>	

Dynamic of Beliefs

Change in Argumentation Systems: Exploring the Interest of Removing an Argument	275
<i>Pierre Bisquert, Claudette Cayrol, Florence Dupin de Saint-Cyr, and Marie-Christine Lagasquie-Schier</i>	
Incorporating Domain Knowledge and User Expertise in Probabilistic Tuple Merging	289
<i>Fabian Panse and Norbert Ritter</i>	
Qualitative Reasoning about Incomplete Categorization Rules Based on Interpolation and Extrapolation in Conceptual Spaces	303
<i>Steven Schockaert and Henri Prade</i>	

A Change Model for Credibility Partial Order	317
<i>Luciano H. Tamargo, Marcelo A. Falappa, Alejandro J. García, and Guillermo R. Simari</i>	
Conflict-Aware Historical Data Fusion	331
<i>Vladimir Zadorozhny and Ying-Feng Hsu</i>	

Information Retrieval and Databases

Extended Galois Derivation Operators for Information Retrieval Based on Fuzzy Formal Concept Lattice	346
<i>Yassine Djouadi</i>	
Processing Fuzzy Queries in a Peer Data Management System Using Distributed Fuzzy Summaries.....	359
<i>Olivier Pivert, Grégory Smits, and Allel Hadjali</i>	
Embedding Forecast Operators in Databases	373
<i>Francesco Parisi, Amy Sliva, and V.S. Subrahmanian</i>	

Ontologies

Investigating Ontological Similarity Theoretically with Fuzzy Set Theory, Information Content, and Tversky Similarity and Empirically with the Gene Ontology	387
<i>Valerie Cross and Xinran Yu</i>	
Answering Threshold Queries in Probabilistic Datalog+/- Ontologies ...	401
<i>Georg Gottlob, Thomas Lukasiewicz, and Gerardo I. Simari</i>	
Coherent Top-k Ontology Alignment for OWL EL.....	415
<i>Jan Noessner, Mathias Niepert, and Heiner Stuckenschmidt</i>	

Possibility Theory and Classification

Generalized Possibilistic Logic	428
<i>Didier Dubois and Henri Prade</i>	
Transformations around Quantitative Possibilistic Logic	433
<i>Hadja Faiza Khellaf-Haned</i>	
Imprecise Regression Based on Possibilistic Likelihood	447
<i>Mathieu Serrurier and Henri Prade</i>	
Possibilistic Network-Based Classifiers: On the Reject Option and Concept Drift Issues.....	460
<i>Karim Tabia</i>	

Logic Programming

Weak and Strong Disjunction in Possibilistic ASP 475
 *Kim Bauters, Steven Schockaert, Martine De Cock, and
 Dirk Vermeir*

t-DeLP: A Temporal Extension of the Defeasible Logic Programming
Argumentative Framework 489
 Pere Pardo and Lluís Godo

Learning to Act Optimally in Partially Observable Markov Decision
Processes Using Hybrid Probabilistic Logic Programs 504
 Emad Saad

Applications

ChaseT: A Tool for Checking Chase Termination 520
 *Andrea De Francesco, Sergio Greco, Francesca Spezzano, and
 Irina Trubitsyna*

Swapping-Based Partitioned Sampling for Better Complex Density
Estimation: Application to Articulated Object Tracking..... 525
 Séverine Dubuisson, Christophe Gonzales, and Xuan Son Nguyen

A Fuzzy-Based Approach to the Value of Information in Complex
Military Environments..... 539
 Timothy Hanratty, Robert J. Hammell II, and Eric Heilman

Handling Sequential Observations in Intelligent Surveillance 547
 Jianbing Ma, Weiru Liu, and Paul Miller

Author Index 561
