I Operating Conditions

1	Oral and Maxillofacial Surgical Aspects in Anesthesia	3
	<i>Harald Eufinger and Thomas Götz</i>	
1.1	Introduction	4
1.2	Procedures Without Oral or Intravenous Medication: Local Anesthesia	4
1.2.1	Preparation and Implementation.....	4
1.2.2	Complications.....	4
1.2.3	Consumables and Supplies	5
1.2.4	Topographical Anatomy	8
1.2.5	Extraoral Anesthesia of the Terminal Branches of the Trigeminal Nerve and Cervical Plexus.....	9
1.2.6	Tumescent Anesthesia	11
1.2.7	Intraoral Terminal Anesthesia and Peripheral Nerve Blocks	11
1.2.8	Extraoral Stem Blocks	15
1.2.9	Limits and Outlook of Local Anesthesia.....	15
1.3	Procedures with Systemic Medication without Respiratory Support	15
1.3.1	Sedation with Nitrous Oxide.....	16
1.3.2	Sedative Premedication, Including Administration of Analgesics If Necessary	16
1.3.3	Analgesia as an Intraoperative Procedure	18
1.3.4	Short Anesthesia with Ketamine and S-ketamine.....	19
1.4	Procedures with Respiratory Support: Anesthesia	19
1.4.1	Preliminary Remarks	19
1.4.2	Mask Anesthesia, Laryngeal Mask Anesthesia.....	19
1.4.3	Intubation Anesthesia	20
	References.....	26

II Oral Surgery

2	Dentoalveolar Surgery	31
	<i>Martin Bonsmann, Ralf Kettner, and Stephan Wunderlich</i>	
2.1	Introduction	32
2.1.1	Instruments and Equipment.....	32
2.1.2	Wound Care.....	32
2.2	Surgical Endodontics	33
2.2.1	Apicoectomy.....	33
2.2.2	Surgical Exposure of Impacted Teeth	36
2.2.3	Tooth Transplantation	37
2.2.4	Hemisection/Root Amputation.....	38
2.3	Periodontal Surgery	38
2.3.1	Resective Periodontal Surgery	40
2.3.2	Regenerative Periodontal Surgery.....	43
2.3.3	Plastic-Aesthetic Reconstructive Periodontal Surgery	46
2.4	Tooth Extraction	53
2.4.1	Forceps and Lever Extractions.....	55
2.4.2	Extraction of Root Remnants	57
2.4.3	Intraalveolar Tooth Removal	59
2.4.4	Measures for Alveolar Stabilization	59
2.5	Surgical Tooth Removals	60
2.5.1	Roots and Root Remnants	60
2.5.2	Impacted and Partially Impacted Teeth.....	61

2.6	Preprosthetic Interventions.....	66
2.6.1	Bone Modeling Procedures.....	66
2.6.2	Soft Tissue Modeling Procedures.....	67
2.7	Surgical Problems and Complications	69
2.7.1	Complications During and After Surgical Interventions.....	70
2.7.2	Interventions During Bleeding Disorders.....	72
	References.....	73
3	Surgery of Cysts in the Maxillofacial Region	77
	<i>Andreas Michael Neff and Hans-Henning Horch</i>	
3.1	Introduction	78
3.1.1	Clinic	78
3.1.2	Diagnostics.....	79
3.1.3	Classification and Pathogenesis.....	80
3.2	Surgical Technique for Maxillary Cysts.....	86
3.2.1	Principles and Operational Planning	86
3.2.2	Special Surgical Methods.....	87
3.2.3	Follow-Up Treatment for Cystostomy and Cystectomy.....	102
3.2.4	Surgical Risks.....	103
3.3	Surgical Technique for Soft Tissue Cysts.....	103
3.3.1	Indication	104
3.3.2	Surgical Technique.....	104
	References.....	106
4	Surgical Aspects of Implantology.....	109
	<i>Rainer Lutz and Marco Kesting</i>	
4.1	Introduction	110
4.1.1	Basics	110
4.1.2	Implant Placement	110
4.1.3	Implant Materials	110
4.1.4	Tissue Reactions to Implants.....	110
4.1.5	Indications for Dental Implants.....	111
4.1.6	Contraindications.....	111
4.1.7	Informed Consent.....	112
4.2	Preoperative Diagnostics	112
4.2.1	Clinical Examination.....	112
4.2.2	Imaging Techniques.....	112
4.3	Implant Placement.....	114
4.3.1	Implant Placement in Pristine Jaw Bone.....	114
4.3.2	Bone Augmentation in Combination with Implants.....	118
4.3.3	Soft Tissue Management.....	123
4.3.4	Preprosthetic Surgery.....	127
4.3.5	Implant Prosthetic Measures in Tumor Patients.....	128
4.4	Complications.....	129
4.4.1	Intraoperative Complications	129
4.4.2	Postoperative Complications.....	130
4.4.3	Late Complications.....	130
	References.....	131
5	Surgery of Odontogenic Maxillary Sinus Diseases.....	135
	<i>Siegmar Reinert</i>	
5.1	Basics	136
5.1.1	Introduction	136
5.1.2	Surgical Anatomy and Pathophysiology of the Maxillary Sinus.....	136
5.1.3	Clinic and Diagnostics in Odontogenic Maxillary Sinus Diseases	138

5.1.4	Classification of Odontogenic Maxillary Sinus Diseases.....	140
5.2	Access to the Maxillary Sinus and General Surgical Techniques.....	142
5.2.1	Basic Aspects of Mucosal Treatment.....	142
5.2.2	Anesthesia.....	144
5.2.3	Surgical Planning and Preparation.....	145
5.2.4	Endoscopy of the Maxillary Sinus.....	145
5.2.5	Endoscopically Assisted Surgery via the Anterior Sinus Wall (Osteoplastic Approach).....	146
5.2.6	Drainage via the Inferior Nasal Meatus.....	149
5.2.7	Drainage to the Middle Nasal Meatus (Infundibulotomy).....	150
5.2.8	Surgical Treatment Algorithm for Odontogenic Maxillary Sinusitis.....	152
5.3	Special Surgical Techniques.....	152
5.3.1	Surgery for Maxillary Sinusitis and Oro-antral Communication (OAC).....	152
5.3.2	Surgery for Mycosis of the Maxillary Sinus.....	155
5.3.3	Surgery for Odontogenic Maxillary Cysts.....	155
5.3.4	Transantral Removal of Displaced Maxillary Teeth and Foreign Bodies.....	156
5.3.5	Pre-operated Maxillary Sinus.....	157
5.4	Complications.....	158
5.5	Aftercare.....	159
	References.....	159

III Infections

6	Infections.....	163
	<i>Jan Rustemeyer, Mariam Klouche, and Andreas Bremerich</i>	
6.1	Introduction.....	164
6.1.1	Pathogen Spectrum and Ports of Entry.....	164
6.1.2	Antibiotic Therapy.....	164
6.1.3	Adjuvant Drug and Physical Treatment.....	166
6.2	Surgical Therapy.....	166
6.2.1	Infections of the Tooth and Its Immediate Surroundings.....	166
6.2.2	Soft Tissue Infections.....	171
6.2.3	Infections in the Adjacent Areas of the Facial Skull.....	187
6.2.4	Bone Infections.....	195
6.2.5	Specific Infections.....	201
	References.....	203

IV TMJ Surgery

7	TMJ Surgery.....	209
	<i>Rudolf H. Reich and Marcus Teschke</i>	
7.1	Introduction.....	210
7.1.1	Anatomy of the Temporomandibular Joint (TMJ).....	210
7.2	Preoperative Diagnostics.....	211
7.2.1	Clinical Examination.....	211
7.2.2	Diagnostic Imaging.....	211
7.3	Disorders of the TMJ.....	211
7.3.1	Classification.....	211
7.3.2	TMJ Diseases.....	211
7.3.3	Treatment Goal and Indication for Surgical Therapy.....	212

7.4	Surgical Techniques	212
7.4.1	Principles of Surgical Planning and Surgery.....	212
7.4.2	Surgical Approaches to the TMJ.....	212
7.4.3	Special Surgical Techniques for Functional Disorders and Diseases of the TMJ.....	215
7.4.4	Chronic Arthritis	224
	References.....	233

V Traumatology

8	Basics of Traumatology	239
	<i>Alexander Gaggl and Michael Rasse</i>	
8.1	Etiology and Epidemiology	240
8.2	Polytrauma and Triage	240
8.3	Causes of Death in Trauma	242
8.4	ABCD scheme	242
8.4.1	Respiratory and Cervical Spine Control	242
8.4.2	Indications for Intubation	243
8.4.3	Circulation, Bleeding Control.....	243
8.5	Soft Tissue Injuries	245
8.5.1	Tissue Defects.....	245
8.5.2	Special Types of Injury.....	246
8.5.3	Infection Prophylaxis	246
8.5.4	Injury to the Eyelid.....	247
8.5.5	Injury to the Nose.....	248
8.5.6	Injury to the Lip.....	248
8.6	General Fracture Treatment	249
8.6.1	Closed Reduction Methods	249
8.6.2	Closed Retention	252
8.6.3	Open Reduction.....	254
8.6.4	Osteosyntheses.....	255
	References.....	260
9	Special Traumatology	263
	<i>Alexander Gaggl and Michael Rasse</i>	
9.1	Fractures of the Frontal Bone and Frontobasal Fractures	265
9.1.1	Classification	265
9.1.2	Symptoms.....	265
9.1.3	Diagnostics	266
9.1.4	Emergency Therapy.....	266
9.1.5	Access and Surgical Therapy	267
9.1.6	Secondary Reconstruction.....	270
9.2	Fractures of the Orbit	273
9.2.1	Anatomy, Classification, Fracture Mechanism	273
9.2.2	Symptomatology	274
9.2.3	Radiological Diagnostics	275
9.2.4	Therapy	275
9.2.5	Complications.....	279
9.3	Fractures of the Midface	280
9.3.1	Introduction	280
9.3.2	Zygomatooorbital Fractures.....	280
9.3.3	Fractures of the Nasoorbitoethmoidal Region.....	284
9.3.4	Le Fort Fractures	287
9.3.5	Other Fractures of the Maxilla	292

9.4	Fractures of the Mandible	293
9.4.1	Fracture Types.....	293
9.4.2	Fracture Mechanisms and Dislocations	293
9.4.3	Symptomatology and Diagnostics	294
9.4.4	Fractures in the Corpus and Ramus Mandibulae.....	296
9.4.5	Defect Fractures.....	301
9.4.6	Fractures in the Atrophic Mandible.....	301
9.4.7	Teeth in the Fracture Line.....	302
9.4.8	Fractures of the Condylar Process of the Mandible	302
9.5	Special Features of Fractures in Children	311
9.5.1	Etiology and Epidemiology	311
9.5.2	Anatomical Features	311
9.5.3	Diagnostic Problems	312
9.5.4	Therapeutic Guidelines	312
9.5.5	Late Sequelae After Pediatric Facial Fractures	313
	References.....	313
10	Injuries to the Teeth and the Alveolar Process	317
	<i>Andreas Filippi and Yango Pohl</i>	
10.1	Introduction	318
10.1.1	Prevalence and Etiology	318
10.1.2	Healing After Dental Trauma.....	318
10.1.3	Splinting After Dental Trauma	320
10.1.4	Root Canal Treatment	320
10.1.5	Treatment of the Periodontal Ligament (PDL)	320
10.2	Diagnostics	321
10.3	Luxation Injuries of Permanent Teeth	322
10.3.1	Classification	322
10.3.2	Avulsion	322
10.4	Fractures of Permanent Teeth.....	324
10.4.1	Classification	324
10.4.2	Indication and Objective	324
10.4.3	Crown Fractures.....	324
10.4.4	Crown-Root Fractures.....	325
10.4.5	Root Fractures	325
10.5	Alveolar Process Fractures	325
10.6	Deciduous Teeth Injuries	326
10.6.1	Classification	326
10.6.2	Indication and Aim of Treatment.....	326
10.6.3	Luxation and Avulsion of Deciduous Teeth	326
10.6.4	Fractures of Deciduous Teeth	327
	References.....	327
VI	Malformations	
11	Cleft Lip and Palate.....	331
	<i>Henning Schliephake and Jarg-Erich Hausamen</i>	
11.1	Introduction	332
11.1.1	Anatomical Characteristics and Classification	332
11.2	Treatment Principles	333
11.2.1	Interdisciplinary Treatment Concept	333
11.2.2	Treatment Principles	334
11.2.3	Time Table for Surgical Interventions	334
11.2.4	Preoperative Orthodontic Treatment	335

11.3	Primary Operations	336
11.3.1	Cleft Lip Closure.....	336
11.3.2	Cleft Palate Surgery	354
11.4	Secondary Operations	359
11.4.1	Osteoplasty.....	360
11.4.2	Speech Improving Surgery.....	362
11.4.3	Rhinoplasty.....	364
	References.....	385
12	Orthognathic Surgery	387
	<i>Alexander Kübler, Roman C. Brands, Christian Michel, and Jürgen Reuther</i>	
12.1	Introduction	389
12.1.1	Indication and Objective	389
12.1.2	Time of Operation	390
12.1.3	Treatment Plan	390
12.1.4	Medical History and Diagnostic Findings.....	390
12.1.5	Profile Prediction, Correlation of Skeletal and Soft Tissue Changes	395
12.1.6	Operation Planning	396
12.1.7	Fixation Methods in Orthognathic Surgery.....	400
12.2	Osteotomies of the Mandible	403
12.2.1	Osteotomies Without Interruption the Continuity of the Lower Jaw	403
12.2.2	Osteotomies with Interruption of the Continuity of the Lower Jaw	410
12.3	Osteotomies of the Maxilla	426
12.3.1	Transversal Maxillary Distraction.....	426
12.3.2	Anterior Segment Osteotomy	427
12.3.3	Posterior Segment Osteotomy.....	429
12.3.4	Total Osteotomy	429
12.4	Osteotomies of the Midface	436
12.4.1	Basics	436
12.4.2	Le Fort III Osteotomy	436
12.4.3	Combination of Le Fort III and Le Fort I Osteotomy.....	440
12.4.4	Le Fort II Osteotomy	440
12.5	Complications	441
12.5.1	Recurrences.....	441
12.5.2	Nerve Damage in Orthognathic Operations (Neurological Disorders)	442
12.5.3	Damage to Teeth	443
12.5.4	Pseudarthroses.....	443
12.5.5	Wound Infections.....	443
12.5.6	Rare Complications.....	443
12.6	Aftercare	443
	References.....	444
13	Craniofacial Surgery	447
	<i>Joachim Zöller and Matthias Kreppel</i>	
13.1	Introduction	448
13.2	Positional Growth Disorders of the Skull	448
13.3	Premature Cranial Suture Synostoses	448
13.3.1	Pathogenesis.....	448
13.3.2	Symptoms.....	450
13.3.3	Classification	451
13.3.4	Diagnostics	453

13.4	Operative Technique	454
13.4.1	Standardized Frontoorbital Advancement	454
13.4.2	Occipital Advancement	462
13.4.3	Special Techniques	463
13.4.4	Advanced Surgical Procedures.....	463
13.5	Orbitotomies	465
13.6	Operative Problems and Complications	468
13.7	Aftercare	469
	References.....	469

VII Tumor Surgery

14	Basics of Tumor Surgery	473
	<i>Torsten E. Reichert and Johannes Meier</i>	
14.1	Introduction	474
14.1.1	Basics	474
14.1.2	Etiology and Pathogenesis	474
14.1.3	Early Diagnosis and Clinic	475
14.1.4	Therapy	475
14.1.5	Prognosis.....	476
14.1.6	CUP Syndrome (Cancer of Unknown Primary)	476
14.2	Tumor Staging, Selection of Therapeutic Strategy	477
14.3	Basic Principles of Surgical Tumor Removal	478
14.4	Surgery of the Cervical Lymph Nodes	479
14.4.1	Introduction	479
14.4.2	Anatomy of the Neck and Regional Lymph Nodes.....	480
14.4.3	Frequency and Pattern of Cervical Metastases of Head and Neck Squamous Cell Carcinoma	482
14.4.4	Nomenclature and Indications of Cervical Lymph Node Dissection.....	484
14.4.5	Surgical Technique of Neck Dissection.....	486
14.4.6	Complications of Neck Dissection	492
	References.....	493
15	Tumor Operations of the Face and Scalp	495
	<i>Kai Wermker and Martin Klein</i>	
15.1	Introduction	496
15.2	Skin Tumors	496
15.2.1	Basal Cell Carcinoma	496
15.2.2	Squamous Cell Carcinoma	497
15.2.3	Malignant Melanoma, Sentinel Lymph Node Biopsy and Mucosal Melanoma.....	498
15.2.4	Rare Tumors.....	500
15.3	Reconstructive Facial Surgery	501
15.3.1	Basics	501
15.3.2	Full-Thickness and Split-Thickness Skin Grafts	503
15.3.3	Technique of the Skin Expander.....	504
15.4	Surgical Techniques According to Anatomic Regions	505
15.4.1	Scalp and Forehead Region.....	505
15.4.2	Nose	509
15.4.3	Cheek.....	512
15.4.4	Lids	513
15.4.5	Lips	517
15.4.6	Auricle	520
15.5	Conclusions	521
	References.....	522

16	Tumor Operations of the Lower Oral Cavity	525
	<i>Bernhard Frerich</i>	
16.1	Basic Principles and Preliminary Remarks	526
16.1.1	Preliminary Anatomical Remarks	526
16.1.2	Special Diagnostic Aspects	527
16.1.3	Principles of Planning Resections in the Lower Oral Cavity.....	527
16.2	Resections of the Mandible	528
16.2.1	Enucleation/Curettage	528
16.2.2	Continuity-Preserving Rim Resection for Bone Tumors	530
16.2.3	Continuity-Preserving Marginal Mandibulectomy in Resection of Oral Mucosal Carcinomas	531
16.2.4	Mandibular Segmental (Continuity) Resection	536
16.2.5	Disarticulation	541
16.2.6	Specific Aspects of Osteosarcoma	542
16.3	Transoral Excisions of Benign Lesions of the Tongue, Floor of the Mouth and Cheek	542
16.3.1	Excision of Benign and Potentially Malignant Mucosal Lesions.....	542
16.3.2	Other Benign Tumors of the Lower Oral Cavity.....	545
16.4	Transoral Resection of Malignancies	545
16.4.1	General Preliminary Remarks on Resection of Intraoral Malignancies and Preparatory Measures.....	545
16.4.2	Transoral Partial Resection of the Floor of the Mouth	546
16.4.3	Transoral Partial Tongue Resection.....	548
16.4.4	Cheek.....	550
16.5	Combined Resections, Block Resections and Their Access Routes in the Area of the Lower Oral Cavity	550
16.5.1	Lip Splitting and Mandibulotomy	551
16.5.2	Transcervical (Submandibular) Approaches to the Lower Oral Cavity Without Lip Splitting.....	552
	References.....	558
17	Tumor Operations of the Upper Oral Cavity, Maxilla, Midface and Anterior Skull Base	561

VIII **Reconstructive Surgery**

20	Pedicled Flaps	641
	<i>Michael Ehrenfeld and Carl-Peter Cornelius</i>	
20.1	Introduction, Terminology and Anatomical Principles	643
20.2	Characterization and Classification of Pedicled Grafts	647
20.2.1	Circulation.....	647
20.2.2	Construction	647
20.2.3	Constituents.....	647
20.2.4	Conformation	648
20.2.5	Contiguity (Latin "Contiguus": Adjacent)	653
20.2.6	Conditioning.....	654
20.3	Possible Uses of Local Pedicled Flaps	654
20.3.1	Hairy Scalp, Scalp	654
20.3.2	Forehead and Temporal Region.....	655
20.3.3	Nose	658
20.3.4	Eyelids.....	661
20.3.5	Cheek.....	662
20.3.6	Perioral Region	667

20.3.7	Oral Cavity.....	675
20.3.8	Neck and Throat Region	678
20.4	Regional Pedicled Flaps	678
20.4.1	Temporalis Flap and Temporoparietal Fascial Flap (TPF).....	679
20.4.2	Caudally Pedicled Nasolabial Flap	680
20.4.3	Facial Artery Perforator Flap (FAP-Flap).....	682
20.4.4	Facial Artery Musculo-Mucosal Flap (FAMM-Flap)	684
20.4.5	Lingual Flaps	688
20.4.6	Submental Flaps	689
20.4.7	Supraclavicular and Subclavicular Flaps	695
20.4.8	Deltpectoral Flap	703
20.4.9	Pectoralis Major Flap (PMF)	707
20.4.10	Latissimus Dorsi Flap (LDF).....	710
20.5	Perioperative Aspects, Postoperative Monitoring and Aftercare	711
20.6	Summary	711
	References.....	712
