

Contents

1	Option Pricing in Discrete Time Models	1
2	Skorohod's Embedding Theorem and Donsker's Theorem	11
2.1	Skorohod's Embedding Theorem	11
2.2	Functional Limit Theorem	19
3	Stochastic Integration	27
3.1	Martingales and Predictable Processes	27
3.2	Itô Integral for the Brownian Motion	40
3.2.1	Extension of the Integral to L^2 -Integrands	43
3.2.2	Construction of the Integral for $\mathcal{L}^0(B)$	48
3.3	Quadratic Variation of Continuous Local Martingales	55
3.4	Stochastic Integral of Continuous Local Martingales	71
3.4.1	Stochastic Integral for Continuous L^2 -Martingales	71
3.4.2	Extension to the Set of Continuous Local Martingales	76
3.4.3	Extension to the Case of Continuous Semimartingales	79
3.5	Integration of Semimartingales	82
3.5.1	Decomposition Theorems	84
3.5.2	Stochastic Integral for $\mathcal{M}_{\text{loc}}^2$	86
3.5.3	Stochastic Integral for Semimartingales	87
4	Elements of Stochastic Analysis	95
4.1	Itô Formula	95
4.2	Martingale Representation	117
4.3	Measure Change, Theorem of Girsanov	132
4.3.1	Applications of the Girsanov Theorem	145
4.3.2	The Clark Formula	149
4.4	Stochastic Differential Equations	152
4.4.1	Strong Solution—Weak Solution of Stochastic Differential Equations	165
4.5	Semigroup, PDE, and SDE Approach to Diffusion Processes	173
5	Option Prices in Complete and Incomplete Markets	191
5.1	The Black–Scholes Model and Risk-Neutral Valuation	192
5.1.1	Risk-Neutral Valuation of Options	199
5.1.2	Discussion of the Black–Scholes Formula	206

5.1.3	Hedging Strategies and Partial Differential Equations	216
5.2	Complete and Incomplete Markets	219
6	Utility Optimization, Minimum Distance Martingale Measures, and Utility Indifference Pricing	233
6.1	Utility Optimization and Utility Indifference Pricing	233
6.2	Minimum Distance Martingale Measures	235
6.3	Duality Results	242
6.3.1	Minimum Distance Martingale Measures and Minimax Measures	242
6.3.2	Relationship to Portfolio Optimization	250
6.4	Utility-Based Hedging	255
6.5	Examples in Exponential Lévy Models	263
6.6	Properties of the Utility Indifference Price	269
7	Variance-Minimal Hedging	279
7.1	Hedging in the Martingale Case	280
7.2	Hedging in the Semimartingale Case	284
7.2.1	Föllmer–Schweizer Decomposition and Optimality Equation	285
7.2.2	Minimal Martingale Measures and Optimal Strategies	288
	Bibliography	295
	Index	299
