Efficient Routing of Mobile Agents for Agent-Based Integrated Enterprise Management: A General Acceleration Technique	1
<i>Amir Elalouf, Eugene Levner, and T.C. Edwin Cheng</i>	
A Framework of Views on Service Networks Models	21
<i>Olha Danylevych, Frank Leymann, and Christos Nikolaou</i>	
System Dynamics in Integration of Supply Chain Management	35
<i>Tillal Eldabi and Amir (Aboulfazl) Keramati</i>	
Modeling and Simulating Organisations	45
<i>Oana Nicolae and Gerd Wagner</i>	
Simulation, Games and Challenges: From Schools to Enterprises	63
<i>Pedro Sá Silva, Diogo Pedrosa, António Trigo, and João Varajão</i>	
Using a Controlled Vocabulary to Support Business Process Design	74
<i>Carla Marques Pereira, Artur Caetano, and Pedro Sousa</i>	
A Quality-Oriented Business Process Meta-Model	85
<i>Farideh Heidari, Pericles Loucopoulos, and Zoubida Kedad</i>	
Can BPMN Be Used for Making Simulation Models?	100
<i>Giancarlo Guizzardi and Gerd Wagner</i>	
Performance Improvement in Healthcare Processes	116
<i>Reza Widjaya, Frans van der Horst, and Mamadou Seck</i>	
Supporting Enterprise IS Modelling Using Ontological Analysis	130
<i>Robert Pergl</i>	
Instance-Level Modeling and Simulation Using Lambda-Calculus and Object-Oriented Environments	145
<i>Vojtěch Merunka</i>	
Conceptual Normalisation Formalised	159
<i>Martin Molhanec</i>	

Modelling and Prototyping of Business Applications Based on Multilevel Domain-Specific Language	173
<i>Robert Pergl</i>	
Building towards a Software Based Innovation Modelling Tool	192
<i>Paidi O'Raghallaigh, David Sammon, and Ciaran Murphy</i>
