

Table of Contents

Experience of a PRACE Center	1
<i>Michael Resch</i>	
Achieving Exascale Computing through Hardware/Software Co-design	5
<i>Sudip Dosanjh, Richard Barrett, Mike Heroux, and Arun Rodrigues</i>	
Will MPI Remain Relevant?	8
<i>George Bosilca</i>	
Exascale Algorithms for Generalized MPIComm_split	9
<i>Adam Moody, Dong H. Ahn, and Bronis R. de Supinski</i>	
Order Preserving Event Aggregation in TBONs	19
<i>Tobias Hilbrich, Matthias S. Müller, Martin Schulz, and Bronis R. de Supinski</i>	
Using MPI Derived Datatypes in Numerical Libraries	29
<i>Enes Bajrović and Jesper Larsson Träff</i>	
Improving MPI Applications Performance on Multicore Clusters with Rank Reordering	39
<i>Guillaume Mercier and Emmanuel Jeannot</i>	
Multi-core and Network Aware MPI Topology Functions	50
<i>Mohammad Javad Rashti, Jonathan Green, Pavan Balaji, Ahmad Afsahi, and William Gropp</i>	
Scalable Node Allocation for Improved Performance in Regular and Anisotropic 3D Torus Supercomputers	61
<i>Carl Albing, Norm Troullier, Stephen Whalen, Ryan Olson, Joe Glenski, Howard Pritchard, and Hugo Mills</i>	
Improving the Average Response Time in Collective I/O	71
<i>Chen Jin, Saba Schrish, Wei-keng Liao, Alok Choudhary, and Karen Schuchardt</i>	
OMPIO: A Modular Software Architecture for MPI I/O	81
<i>Mohamad Chaarawi, Edgar Gabriel, Rainer Keller, Richard L. Graham, George Bosilca, and Jack J. Dongarra</i>	
Design and Evaluation of Nonblocking Collective I/O Operations	90
<i>Vishwanath Venkatesan, Mohamad Chaarawi, Edgar Gabriel, and Torsten Hoefler</i>	

Optimizing MPI One Sided Communication on Multi-core InfiniBand Clusters Using Shared Memory Backed Windows	99
<i>Sreeram Potluri, Hao Wang, Vijay Dhanraj, Sayantan Sur, and Dhabaleswar K. Panda</i>	
A uGNI-Based MPICH2 Nemesis Network Module for the Cray XE	110
<i>Howard Pritchard, Igor Gorodetsky, and Darius Buntinas</i>	
Using Triggered Operations to Offload Rendezvous Messages	120
<i>Brian W. Barrett, Ron Brightwell, K. Scott Hemmert, Kyle B. Wheeler, and Keith D. Underwood</i>	
pupyMPI - MPI Implemented in Pure Python	130
<i>Rune Bromer, Frederik Hantho, and Brian Vinter</i>	
Scalable Memory Use in MPI: A Case Study with MPICH2	140
<i>David Goodell, William Gropp, Xin Zhao, and Rajeev Thakur</i>	
Performance Expectations and Guidelines for MPI Derived Datatypes	150
<i>William Gropp, Torsten Hoefler, Rajeev Thakur, and Jesper Larsson Träff</i>	
The Analysis of Cluster Interconnect with the Network_Tests2 Toolkit	160
<i>Alexey Salnikov, Dmitry Andreev, and Roman Lebedev</i>	
Parallel Sorting with Minimal Data	170
<i>Christian Siebert and Felix Wolf</i>	
Scaling Performance Tool MPI Communicator Management	178
<i>Markus Geimer, Marc-André Hermanns, Christian Siebert, Felix Wolf, and Brian J.N. Wylie</i>	
Per-call Energy Saving Strategies in All-to-All Communications	188
<i>Vaibhav Sundriyal and Masha Sosonkina</i>	
Data Redistribution Using One-sided Transfers to In-Memory HDF5 Files	198
<i>Jerome Soumagne, John Biddiscombe, and Aurélien Esnard</i>	
RCKMPI – Lightweight MPI Implementation for Intel’s Single-chip Cloud Computer (SCC)	208
<i>Isaías A. Comprés Ureña, Michael Riepen, and Michael Konow</i>	
Hybrid OpenMP-MPI Turbulent Boundary Layer Code Over 32k Cores	218
<i>Juan Sillero, Guillem Borrell, Javier Jiménez, and Robert D. Moser</i>	

CAF versus MPI - Applicability of Coarray Fortran to a Flow Solver ...	228
<i>Manuel Hasert, Harald Klimach, and Sabine Roller</i>	
The Impact of Injection Bandwidth Performance on Application Scalability	237
<i>Kevin T. Pedretti, Ron Brightwell, Doug Doerfler, K. Scott Hemmert, and James H. Laros III</i>	
Impact of Kernel-Assisted MPI Communication over Scientific Applications: CPMD and FFTW	247
<i>Teng Ma, Aurelien Bouteiller, George Bosilca, and Jack J. Dongarra</i>	
A Log-Scaling Fault Tolerant Agreement Algorithm for a Fault Tolerant MPI.....	255
<i>Joshua Hursey, Thomas Naughton, Geoffroy Vallee, and Richard L. Graham</i>	
Fault Tolerance in an Industrial Seismic Processing Application for Multicore Clusters	264
<i>Alexandre Gonçalves, Matheus Bersot, André Bulcão, Cristina Boeres, Lúcia Drummond, and Vinod Rebello</i>	
libhashckpt: Hash-Based Incremental Checkpointing Using GPU's	272
<i>Kurt B. Ferreira, Rolf Riesen, Ron Brightwell, Patrick Bridges, and Dorian Arnold</i>	
Noncollective Communicator Creation in MPI	282
<i>James Dinan, Sriram Krishnamoorthy, Pavan Balaji, Jeff R. Hammond, Manojkumar Krishnan, Vinod Tipparaju, and Abhinav Vishnu</i>	
Evaluation of Interpreted Languages with Open MPI	292
<i>Matti Bickel, Adrian Knoth, and Mladen Berekovic</i>	
Leveraging C++ Meta-programming Capabilities to Simplify the Message Passing Programming Model	302
<i>Simone Pellegrini, Radu Prodan, and Thomas Fahringer</i>	
Portable and Scalable MPI Shared File Pointers	312
<i>Jason Cope, Kamil Iskra, Dries Kimpe, and Robert Ross</i>	
Improvement of the Bandwidth of Cross-Site MPI Communication Using Optical Fiber	315
<i>Kiril Dichev, Alexey Lastovetsky, and Vladimir Rychkov</i>	
Performance Tuning of SCC-MPICH by Means of the Proposed MPI-3.0 Tool Interface.....	318
<i>Carsten Clauss, Stefan Lankes, and Thomas Bemmerl</i>	

Design and Implementation of Key Proposed MPI-3 One-Sided Communication Semantics on InfiniBand.....	321
<i>Sreeram Potluri, Sayantan Sur, Devendar Bureddy, and Dhabaleswar K. Panda</i>	
Scalable Distributed Consensus to Support MPI Fault Tolerance	325
<i>Darius Buntinas</i>	
Run-Through Stabilization: An MPI Proposal for Process Fault Tolerance	329
<i>Joshua Hursey, Richard L. Graham, Greg Bronevetsky, Darius Buntinas, Howard Pritchard, and David G. Solt</i>	
Integrating MPI with Asynchronous Task Parallelism	333
<i>Yonghong Yan, Sanjay Chatterjee, Zoran Budimlic, and Vivek Sarkar</i>	
Performance Evaluation of Thread-Based MPI in Shared Memory	337
<i>Juan Antonio Rico-Gallego and Juan Carlos Díaz-Martín</i>	
MPI-DB, A Parallel Database Services Software Library for Scientific Computing	339
<i>Edward Givelberg, Alexander Szalay, Kalin Kanov, and Randal Burns</i>	
Scalable Runtime for MPI: Efficiently Building the Communication Infrastructure	342
<i>George Bosilca, Thomas Herault, Pierre Lemarinier, Ala Rezmerita, and Jack J. Dongarra</i>	
Writing Parallel Libraries with MPI - Common Practice, Issues, and Extensions	345
<i>Torsten Hoefer and Marc Snir</i>	
Author Index	357
