Acknowledgments — V

Chapter 1

Understanding the basics of piping and instrumentation diagrams (P&IDs) — 1

- 1.1 Introduction to P&ID — 1
- 1.2 Importance of P&IDs — 2
- 1.3 When to start developing P&IDs — 7
- 1.4 Skeleton of a P&ID — 8
- 1.5 Comparison of BFD, PFD, and P&IDs — 8
- 1.6 Common tools used to develop P&IDs — 10
- 1.7 General guidelines for developing P&IDs — 13
- 1.8 Types of P&IDs — 15
- 1.9 Steps in developing P&IDs — 21

Chapter 2

Development of equipment on P&IDs — 22

- 2.1 Introduction to chemical engineering equipment and their types — 22
- 2.2 Space required on a P&ID for an equipment — 23
- 2.3 Equipment design information on P&ID — 27
- 2.4 Pumps — 30
- 2.5 Compressor and auxiliary — 34
- 2.6 Pressure vessel and internals — 34
- 2.7 Storage tanks — 35
- 2.8 Reactors and internals — 36
- 2.9 Heat exchanger — 37
- 2.10 Columns — 39
- 2.11 Turbines — 41

Chapter 3

Development of piping on P&IDs — 43

- 3.1 Introduction to piping — 43
- 3.2 Significance of piping — 44
- 3.3 Pipeline tagging and information — 44
- 3.4 Line size — 45
- 3.5 Selection of piping specification and guidelines — 45
- 3.6 Selection of piping class — 46
- 3.7 Smart plant 3D — 46
- 3.8 Account for future expansion — 47

Chapter 4

Control system components — 48

- 4.1 Introduction — **48**
- 4.2 In-line devices — **49**
 - 4.2.1 Valve types — **49**
 - 4.2.2 Flow measurement and restriction — **51**
 - 4.2.3 Relief — **55**
- 4.3 Offline instruments — **57**
 - 4.3.1 Gauges and switches — **57**
 - 4.3.2 Transmitters — **59**
 - 4.3.3 Level — **61**
 - 4.3.4 Analyzers — **61**

Chapter 5

Process controllers, alarms, and safety instruments — 62

- 5.1 Process controller types — **62**
- 5.2 Cascade process controls — **63**
- 5.3 Process alarms — **63**
- 5.4 Cause-and-effect table — **64**
- 5.5 Safety interlocks — **65**

Chapter 6

Utilities — 66

- 6.1 Introduction to utilities — **66**
- 6.2 Different utility systems — **67**
 - 6.2.1 Steam and condensate — **67**
 - 6.2.2 Low-pressure nitrogen — **67**
 - 6.2.3 Instrument air — **68**
 - 6.2.4 Plant air — **69**
 - 6.2.5 Cooling water — **69**
 - 6.2.6 Clarified water — **70**
 - 6.2.7 Soft water and boiler feed water — **70**
 - 6.2.8 Demineralized water — **71**
 - 6.2.9 Fuel gas — **72**
 - 6.2.10 Hot oil — **72**
 - 6.2.11 Tempered water — **73**
 - 6.2.12 Chilled water — **73**
- 6.3 Isolation of utilities from process streams or equipment — **73**
- 6.4 Utility stations — **74**
- 6.5 Utility distribution — **74**
- 6.6 Future utility demand — **74**

Chapter 7**Isolation and drain/vent valve details development — 76**

- 7.1 Introduction and need for valves — 76
- 7.2 Valve types — 76
 - 7.2.1 Gate type — 76
 - 7.2.2 Globe type — 77
 - 7.2.3 Butterfly type — 77
 - 7.2.4 Ball type — 78
 - 7.2.5 Needle type — 78
- 7.3 Double block and bleed arrangement — 79
- 7.4 Drain and vent valves — 81
- 7.5 Special type of valves — 82
 - 7.5.1 Check valve — 82
 - 7.5.2 Choke valves — 83
- 7.6 Blinds — 83

Chapter 8**Additional information for effective design of P&IDs — 84**

- 8.1 P&ID legends — 84
 - 8.1.1 Unit numbering — 84
 - 8.1.2 P&ID numbering — 84
 - 8.1.3 Pipeline codes — 85
 - 8.1.4 General piping insulation types — 86
 - 8.1.5 Process service codes — 86
 - 8.1.6 Utility service codes — 87
 - 8.1.7 Instrument numbering — 87
 - 8.1.8 Specialty items — 88
 - 8.1.9 Valve type and symbols — 88
 - 8.1.10 Equipment types — 88
 - 8.1.11 Pipe fittings and other pipe symbols — 90
 - 8.1.12 Scope legend — 92
- 8.2 Design notes — 94
- 8.3 Project notes — 96
- 8.4 Hold notes — 96
- 8.5 Sample station details — 98
- 8.6 Pump seal plan details — 99
- 8.7 List of P&IDs — 99
- 8.8 List of equipment by type — 100
- 8.9 List of safety and control valves — 100
- 8.10 P&ID checklist — 101
 - 8.10.1 P&ID in general — 101
 - 8.10.2 P&IDs: piping in general — 102

8.10.3	P&IDs: instrumentation in general —	104
8.10.4	P&IDs: pressure safety valves (PSV) in general —	105
8.10.5	P&IDs: utility systems in general —	106
8.10.6	P&IDs: electrical in general —	106
8.10.7	P&IDs: civil in general —	106
8.10.8	P&IDs for pumps —	106
8.10.8.1	Pump: design data —	106
8.10.8.2	Pump: safety and operation —	106
8.10.8.3	Pump: motor driver —	107
8.10.9	P&IDs for steam driven turbines —	107
8.10.10	P&IDs for compressors —	108
8.10.10.1	Design data —	108
8.10.10.2	Knockout drum —	108
8.10.10.3	Auxiliaries —	108
8.10.10.4	Spillback control —	108
8.10.10.5	Control —	109
8.10.10.6	Miscellaneous —	109
8.10.11	P&IDs for vessels —	109
8.10.11.1	Design data —	109
8.10.11.2	Process and safety —	109
8.10.12	P&IDs for columns or towers —	110
8.10.12.1	Design data —	110
8.10.12.2	Process and safety —	110
8.10.12.3	Control —	111
8.10.13	P&IDs for heat exchangers —	111
8.10.13.1	Design data —	111
8.10.13.2	Process and safety —	112
8.10.14	P&IDs for furnaces or heaters —	112
8.10.14.1	Design data —	112
8.10.14.2	Process and safety —	112
8.10.15	P&IDs for storage tanks —	113
8.10.15.1	Design data —	113
8.10.15.2	Process and safety —	113
8.10.16	P&IDs for boilers —	115
8.10.17	P&IDs for lube oil plans —	115
8.10.18	P&IDs for flares —	116

Chapter 9

Safety systems for the plant — 117

9.1	Flare —	117
9.2	Flare network piping —	117
9.3	Flare knockout pot and seal system —	118

- 9.4 Fire water system and network — **119**
- 9.5 Deluge safety and fire and gas monitoring system — **120**
- 9.6 Safety shower and eyewash stations — **120**

Chapter 10

Drafting, checking, master markup (MMU), and revisions — 121

- 10.1 Drafting — **121**
- 10.2 Checking — **122**
- 10.3 MMU procedure — **123**
- 10.4 Revisions and project issue — **125**

Chapter 11

P&ID systems — 126

- 11.1 Control valve stations — **126**
- 11.2 Steam letdown stations and desuperheater — **128**
- 11.3 Steam traps and types — **130**
- 11.4 Pressure safety valve: liquid service — **130**
- 11.5 Pressure safety valve: gas or vapor service — **133**
- 11.6 Pump with restriction orifice in the minimum circulation line — **135**
- 11.7 Pump with control valve station with a minimum circulation line — **136**
- 11.8 Pump drains and vents — **138**
- 11.9 Positive displacement pump — **140**
- 11.10 Reactor system — **140**
- 11.11 Three-phase separator — **142**
- 11.12 Distillation column overhead receiver system — **144**
- 11.13 Compressor knockout pot — **146**
- 11.14 Hazardous open drain drum system — **148**
- 11.15 Shell and tube heat exchanger — **148**
- 11.16 Fin fan heat exchanger — **151**
- 11.17 Double-pipe heat exchanger — **152**
- 11.18 Kettle-type of heat exchanger — **154**
- 11.19 Vertical type of reboiler — **155**
- 11.20 Ejector system — **155**
- 11.21 Utility station — **155**
- 11.22 Storage tank with a pump system — **158**
- 11.23 Storage tank blanketing system — **159**
- 11.24 Storage tank mixer and heater — **159**
- 11.25 Distillation column — **163**
- 11.26 Pig launcher — **163**
- 11.27 Slug catcher — **166**
- 11.28 Slop oil collection header — **167**
- 11.29 Liquid coalescer — **167**

XII — Contents

11.30	Sump system —	167
11.31	Fired heater —	169
11.32	Burner management system (BMS) —	171
11.33	Cooling water network —	172
11.34	Vendor scope —	173
11.35	Battery limit drawing —	174
11.36	New scope vs. existing system —	176

Abbreviations — 177

Questions — 181

Answers — 185

Further reading — 193
