Foreword — V

Preface — VII

1 Introduction — 1

- 1.1 What Is This Book About? — 2
- 1.2 Assets and Liabilities Management — 3
- 1.3 The Banking Problem — 4
- 1.4 Motivations to Optimize — 6
- 1.5 Graphical Intuition — 7
- 1.6 Notations and Coding Considerations — 9
- 1.7 How to Read This Book — 10

2 Modeling Guidelines — 12

- 2.1 Read the Bank Business Plan — 12
- 2.2 Stick to Official Chart of Accounts — 13
- 2.3 Respect the Segregation of Duties — 14
- 2.4 Don't Wait for the Perfect Data — 14
- 2.5 Be Careful With Basic Financial Calculations — 15
- 2.6 Don't Be Ashamed to Simplify — 16
- 2.7 Get a Good Mathematical Solver — 17

3 Fundamental Concepts: Balance Sheet Model — 19

- 3.1 Balance Sheet — 19
- 3.2 Income Statement — 20
- 3.3 Cash Flow Statement — 22
- 3.4 Accounting Basis — 23
- 3.5 Accounting Classification — 24
- 3.6 Financial Contracts — 25
- 3.7 Financial Positions — 26
- 3.8 Non-Contract Accounting Records — 27

4 Fundamental Concepts: Mathematical Programming — 28

- 4.1 What Is a Model? — 28
- 4.2 Motivations for Having a Model — 29
- 4.3 Mathematical Programming Models — 30
- 4.4 Solution Methods — 31
- 4.5 Modeling Languages — 33
- 4.6 A Simple LP Model Example — 34
- 4.7 A Simple MILP Model Example — 36

4.8	Dynamic Programming — 39
4.9	Stochastic Dual Dynamic Programming — 43
5	Data Preparation Pipeline — 48
5.1	Chart of Accounts — 48
5.2	Outstanding Balances and Runoff Positions — 49
5.3	Reconciliation Rules — 50
5.4	New Positions — 51
5.5	Contract Aggregation Strategies — 52
5.6	Market Data — 53
5.7	Business Assumptions — 55
6	Building the Model: Foundations — 57
6.1	Initial Considerations — 57
6.2	Key Data Structures — 58
6.3	Contract Sets — 59
6.4	Model Initialization — 60
6.5	Core Decision Variables — 61
6.5.1	Buy Variables — 61
6.5.2	Sell Variables — 63
6.5.3	Prepayment Variables — 64
6.5.4	Write-Off Variables — 65
6.6	Core State Variables — 66
6.6.1	Quantity Variables — 66
6.6.2	Valuation Variables — 68
6.7	Cash Flow Variables — 71
6.7.1	Decision Cash Flows Variables — 71
6.7.2	Contractual Cash Flows Variables — 73
6.8	Income Variables — 76
6.8.1	Income Auxiliary Variables — 76
6.8.2	Unrealized Gains or Losses Variables — 78
6.8.3	Income Statement Variables — 80
6.9	Core Constraints — 82
6.9.1	Cash Flows Balance — 83
6.9.2	Income Statement Leaves — 84
6.9.3	Equity Accounts Update — 88
6.9.4	Book Balance — 90
7	Building the Model: Business Rules — 93
7.1	Business Constraints — 93
7.1.1	Bank Growth or Shrinkage — 94
7.1.2	Leverage Ratio — 95

7.1.3	Portfolio Composition —	96
7.1.4	Investing Policies —	97
7.1.5	Price Elasticity —	98
7.1.6	Withdrawals and Prepayments —	99
7.1.7	Prepayments —	101
7.1.8	Trading Volume Limits —	101
7.1.9	Liquidity Ratios —	102
7.1.10	Capital Adequacy Ratios —	104
7.1.11	Economic Capital —	107
7.1.12	Open Currency Positions —	110
7.1.13	Interest Rate Risk Limits —	111
7.1.14	Risk Targeting —	115
7.1.15	Operational Losses —	116
7.1.16	Allowances for Credit Losses —	117
7.1.17	Back-to-Back Hedging —	118
7.1.18	Freezing Short-Term Decisions —	119
7.1.19	Financial Ratios —	120
7.1.20	Capitalizations —	121
7.2	Slack Variables —	122
7.3	Objective Functions —	124
8	Running the Model —	129
8.1	Training the Policy —	129
8.2	Simulating Optimal Policy —	132
8.3	Post-Run Routines —	133
8.4	Results Reporting Guidelines —	135
8.5	Report Examples —	136
9	Adding Uncertainty —	141
9.1	Building Scenarios —	141
9.2	A Simple Stochastic Model —	143
9.3	Markov-Switching Uncertainty —	147
10	Troubleshooting Strategies —	156
10.1	Optimal, Infeasible, and Unbounded —	156
10.2	Unit Tests —	157
10.3	Disabling Constraints —	158
10.4	Temporary Slack Variables —	159
10.5	Limiting Objective Function —	160
10.6	Inspecting Contract Sets —	161
10.7	Inspecting Coefficient Matrices —	162
10.8	Analyzing LP Files —	162

XII — Contents

- 10.9 Changing Solver Tolerance — **163**
- 10.10 Fine-Tuning Your Solver — **164**
- 10.11 Using Different Solvers — **165**

11 Conclusions — 167

Appendix A Introduction to Julia, JuMP, and SDDP — 171

- A.1 Considerations — **171**
- A.2 Julia Basics — **171**
- A.3 Julia Packages — **177**
- A.4 JuMP Basics — **177**
- A.5 SDDP Basics — **183**

Bibliography — 189

List of Figures — 191

List of Tables — 193

List of Code Snippets — 195

About the Authors — 197

About the Series Editor — 199

Index — 201
