

Contents

Introduction — 1

Chapter 1

Molecular imprinting — 4

- 1.1 Introduction — 4
- 1.2 The concept of molecular recognition — 4
- 1.3 Imprinting technology — 6
- 1.4 Molecularly imprinted polymers — 7
- 1.5 A look to the basic components of MIP synthesis — 9
- 1.6 MIP polymerization methods and applications — 13
- References — 23

Chapter 2

Molecularly imprinted membranes: general aspects — 30

- 2.1 Introduction — 30
- 2.2 Membrane-based separations — 31
- 2.3 Molecularly imprinted membranes — 33
- 2.4 Separation mechanism and performance evaluation of MIMs — 36
- 2.5 Green imprinted membranes — 45
- References — 48

Chapter 3

Preparation strategies of molecularly imprinted membranes — 54

- 3.1 Introduction — 54
- 3.2 About the production of molecularly imprinted membranes — 54
- 3.3 In situ cross-linking polymerization — 57
- 3.4 Alternative molecular imprinting — 59
- 3.5 Surface imprinting — 66
- 3.6 Nanofibers and other composite imprinted membranes — 71
- References — 74

Chapter 4

Imprinted membranes in affinity separation — 81

- 4.1 Introduction — 81
- 4.2 Affinity-imprinted membranes: general considerations — 82
- 4.3 Affinity IMs in water treatment — 84
 - 4.3.1 Selective recovery of drugs and pharmaceutical ingredients — 84
 - 4.3.2 Removal of pesticides and other toxic compounds — 87
- 4.4 Food, herbal medicine, and pharmaceutical applications — 90
 - 4.4.1 Affinity IMs in the solid-phase extraction of bioactive compounds — 90

- 4.4.2 Removal of additives and contaminants — **95**
- 4.4.3 Drug separation and clinical uses — **96**
- References — **99**

Chapter 5

Imprinting of proteins — 105

- 5.1 Introduction — **105**
- 5.2 About proteins — **105**
- 5.3 Protein imprinting: general overview — **107**
- 5.4 Protein-imprinted polymers — **109**
- 5.5 Protein-imprinted membranes — **115**
- References — **122**

Chapter 6

Molecularly imprinted membranes in enantiomeric separation — 127

- 6.1 Introduction — **127**
- 6.2 Chirality — **128**
- 6.3 Enantioselective MIMs — **130**
- 6.4 Enantiomeric separation of drugs — **132**
- 6.5 Chiral separation of amino acids and their derivatives — **136**
- References — **142**

Chapter 7

Molecularly imprinted membranes as biomimetic receptors in sensors — 147

- 7.1 Introduction — **147**
- 7.2 The concept of chemical and biological sensors — **148**
- 7.3 Toward imprinted materials as biomimetic receptors — **153**
- 7.4 Detection of drugs and biomolecules through MIM-based sensors — **156**
- 7.5 MIM-based sensors for detecting additives and pollutants in food and water — **161**
- References — **167**

Chapter 8

Ion-imprinted membranes — 174

- 8.1 Introduction — **174**
- 8.2 General aspects of ion-imprinted membranes — **174**
- 8.3 Selective recognition of metal ions with IIMs — **177**
- 8.4 IIMs for rare earth elements recognition — **187**
- 8.5 IIMs toward inorganic anions — **192**
- References — **194**

Chapter 9

Molecular imprinting and controlled drug delivery — 201

- 9.1 Introduction — **201**
- 9.2 A small look at controlled drug administration — **202**
- 9.3 Molecular imprinting technology in drug delivery purposes — **208**
- 9.4 MIMs in controlled drug delivery — **211**
- References — **216**

Chapter 10

Cyclodextrins as recognition tools — 223

- 10.1 Introduction — **223**
- 10.2 Cyclodextrins as recognition elements — **223**
- 10.3 Cyclodextrin-based membranes — **227**
- 10.4 Cyclodextrins and imprinting technology — **232**
- References — **238**

Index — 245
