

Contents

Preface — V

1 Overview and introduction to the chemical industry — 1

- 1.1 Introduction — 1
- 1.2 Listing of U. S. top 50 chemical producers — 1
- 1.3 List of top chemical producers worldwide — 2
- 1.4 Employment — 5
- 1.5 Recycling — 5

2 Sulfuric acid — 7

- 2.1 Introduction — 7
- 2.2 Methods of production, sulfur — 7
- 2.3 Methods of production, sulfuric acid — 8
 - 2.3.1 The Contact Process — 8
 - 2.3.2 The Wet Sulfuric Acid Process — 9
- 2.4 Volume of production and sales — 9
- 2.5 Uses — 10
 - 2.5.1 Production of phosphoric acid — 10
 - 2.5.2 Production of aluminum sulfate — 10
- 2.6 Recycling — 11

3 Major industrial gases — 13

- 3.1 Introduction, air liquefaction — 13
- 3.2 Helium — 13
- 3.3 Helium uses — 13
- 3.4 Air liquefaction — 14
- 3.5 Oxygen — 15
 - 3.5.1 Storage and uses — 15
- 3.6 Nitrogen — 15
 - 3.6.1 Major uses — 15
- 3.7 Argon — 16
 - 3.7.1 Major uses — 16
- 3.8 Carbon dioxide — 16
 - 3.8.1 Carbon dioxide uses — 16
- 3.9 Pollution, recycling, by-product uses — 17

4 Nitrogen compounds — 19

- 4.1 Inorganic nitrogen compounds — 19

4.2	Ammonia — 19
4.2.1	Introduction and history — 19
4.2.2	Sources of starting materials — 19
4.2.3	Reaction chemistry — 19
4.2.4	Uses — 20
4.3	Nitric acid — 20
4.4	Ammonium nitrate — 21
4.5	Adipic acid — 21
4.6	Urea — 21
4.7	Ammonium sulfate — 22
4.7.1	Pollution — 22
4.7.2	Recycling possibilities — 22
5	Chemicals from limestone — 25
5.1	Introduction — 25
5.2	Lime — 25
5.3	Sodium carbonate — 26
5.3.1	Soda ash uses — 27
5.3.2	Sodium bicarbonate uses — 28
5.4	Calcium chloride — 28
5.4.1	Uses — 28
5.5	Pollution and recycling — 29
6	Sodium chloride — 31
6.1	Introduction — 31
6.2	Methods of recovery, production, and extraction — 31
6.2.1	Evaporation — 32
6.2.2	Mining — 33
6.2.3	Uses — 33
6.3	Chemicals produced from sodium chloride — 33
6.3.1	Sodium hydroxide production — 33
6.3.2	The mercury cell — 34
6.3.3	The diaphragm cell — 34
6.3.4	The membrane cell — 34
6.3.5	Production statistics — 35
6.4	Uses of NaOH — 36
6.5	Chlorine — 36
6.5.1	Uses of chlorine — 36
6.6	Hydrochloric acid — 37
6.6.1	Production of hydrochloric acid — 37
6.6.2	Uses of hydrochloric acid — 37
6.7	Titanium dioxide — 38

- 6.7.1 Production of titanium dioxide — 38
- 6.7.2 Uses of titanium dioxide — 39
- 6.8 Recycling — 39

7 Further inorganics — 41

- 7.1 Carbon black — 41
- 7.2 Producers — 41
- 7.3 Production methods — 42
- 7.4 Uses — 43
- 7.5 Recycling — 44
- 7.6 Potash — 44
- 7.6.1 Producers — 44
- 7.7 Production by country — 45
- 7.8 Recycling — 45
- 7.9 Sodium tri-poly-phosphate — 45
- 7.10 Producers — 46
- 7.11 Production — 47
- 7.12 Uses — 47
- 7.13 Recycling — 47

8 Water — 49

- 8.1 Introduction, sources — 49
- 8.2 Purification techniques — 49
- 8.2.1 Desalination — 49
- 8.2.2 Sewage treatment — 51
- 8.3 Uses, residential — 52
- 8.4 Uses, industrial — 52
- 8.5 High purity water, uses — 52
- 8.6 Recycling — 53
- 8.7 Further — 54

9 Simple organics from petroleum — 55

- 9.1 Introduction and history — 55
- 9.2 Sources, geographically — 55
- 9.3 Extractive techniques — 57
- 9.3.1 Offshore — 57
- 9.3.2 Onshore — 58
- 9.4 Refining and distillation — 60
- 9.4.1 Simple de-salting — 60
- 9.4.2 Distillation — 60
- 9.4.3 Hydrotreating or hydroprocessing — 60
- 9.4.4 Cracking or hydrocracking — 60

9.4.5	Coking — 60
9.4.6	Visbreaking — 61
9.4.7	Steamcracking — 61
9.4.8	Catalytic reformers — 61
9.4.9	Alkylation — 61
9.4.10	Removal of the C1 or natural gas fraction — 61
9.4.11	Sulfur recovery — 61
9.5	Pollution — 62
9.6	Recycling and by-product uses — 62

10 The C1 fraction — 63

10.1	Methane — 63
10.2	Methanol — 63
10.2.1	Production — 63
10.2.2	Uses — 64
10.3	Other oxygenated C1 chemicals — 65
10.3.1	Production — 65
10.3.2	Uses — 65
10.4	CFCs and HFCs — 66
10.4.1	Production — 66
10.4.2	Nomenclature — 66
10.5	Elemental hydrogen production from methane — 67
10.6	Pollution and recycling — 67

11 The C2 fraction and ethylene chemistry — 69

11.1	Introduction — 69
11.2	Ethane — 69
11.3	Ethylene — 69
11.3.1	Acetaldehyde and acetic acid — 71
11.3.2	Ethylene dichloride (also, ethylene chloride, or 1,2-dichloroethane) — 72
11.3.3	Vinyl chloride — 72
11.3.4	Ethylene oxide and ethylene glycol — 73
11.3.5	Vinyl acetate — 73
11.3.6	Ethanol — 74
11.3.7	Acetylene — 75
11.4	Recycling — 75

12 C3 and C4 fraction chemistry — 77

12.1	Introduction — 77
12.2	Propane — 77
12.3	Propylene — 78
12.4	Acrylonitrile — 78

- 12.5 Propylene oxide and propylene chlorohydrin — 79
- 12.6 Isopropanol — 80
- 12.7 Cumene — 81
- 12.8 Acetone and phenol — 81
- 12.9 Butane — 82
- 12.10 The 1,3-butadiene isomers — 82
- 12.11 Recycling possibilities — 83

13 Liquid organic fuels — 85

- 13.1 Gasoline — 85
- 13.2 Octane number — 85
- 13.3 Additives — 86
- 13.4 Jet fuels — 86
- 13.5 Diesel — 88
- 13.6 Liquefied petroleum gas — 88
- 13.7 Biofuels, pollution, and recycling — 88

14 Aromatics and their derivatives — 91

- 14.1 Benzene — 91
- 14.1.1 Catalytic reforming or steam cracking — 91
- 14.1.2 Toluene hydrodealkylation — 92
- 14.1.3 Toluene disproportionation — 92
- 14.2 Ethylbenzene — 92
- 14.3 Cyclohexane — 93
- 14.4 Nitrobenzene — 94
- 14.5 Toluene — 94
- 14.5.1 Caprolactam — 95
- 14.5.2 Trinitrotoluene — 95
- 14.5.3 Toluene diisocyanate — 96
- 14.6 Xylene — 96
- 14.7 Pollution and recycling — 98

15 Polymers — 99

- 15.1 Introduction — 99
- 15.2 Resin identification codes, RIC 1–6 — 99
- 15.3 Thermoplastics — 100
- 15.4 Thermosets — 100
- 15.5 Polyethylene terephthalate (PETE) — 101
- 15.6 Low density polyethylene and high density polyethylene (LDPE and HDPE) — 102
- 15.7 Polypropylene (PP) — 103
- 15.8 Polyvinyl chloride (PVC) — 104

15.9	Polystyrene (PS) —	104
15.10	Pollution, recycling possibilities, and by-product uses —	105
15.10.1	PETE —	105
15.10.2	Polyethylene, polypropylene, and polyvinyl chloride —	105
15.10.3	Polystyrene —	105
16	Coatings and adhesives —	107
16.1	Introduction —	107
16.2	Coating types —	107
16.3	Adhesives and binders —	107
16.4	Fillers —	108
16.5	Pigments —	109
16.5.1	Recycling —	110
17	Fertilizers and pesticides —	113
17.1	Introduction —	113
17.2	Nitrogen-containing materials —	113
17.3	Phosphorus-containing materials —	113
17.4	Potassium containing materials —	114
17.5	Mixed fertilizers —	114
17.5.1	Production of mixed fertilizers —	115
17.6	Pesticides —	115
17.6.1	Herbicides —	115
17.6.2	Insecticides —	116
17.7	Pollution and recycling —	118
18	The paper industry —	119
18.1	Introduction: the chemical composition of wood —	119
18.1.1	Cellulose —	119
18.1.2	Hemicellulose —	120
18.1.3	Lignin —	120
18.2	Virgin papers —	120
18.3	Kraft process (a. k. a. the sulfate process) —	120
18.3.1	By-product, lignin —	121
18.3.2	Tall oil —	122
18.4	High quality papers – acid sulfite process —	122
18.5	Steps in paper manufacturing —	123
18.6	Paper uses —	124
18.7	Paper re-cycling —	124
18.8	Low grade papers —	124

19	Pharmaceuticals — 127
19.1	Introduction — 127
19.2	The top 100 prescription medicines sold — 127
19.3	Over the counter drugs — 131
19.4	Drug synthesis — 132
19.4.1	Synthesis of common medicines — 132
19.5	Recycling — 134
20	Surfactants and detergents — 137
20.1	Introduction and historical production — 137
20.2	Current syntheses — 138
20.2.1	Anionic surfactants — 139
20.2.2	Cationic surfactants — 140
20.2.3	Zwitterionic or di-ionic surfactants — 140
20.2.4	Non-ionic surfactants — 141
20.3	Function of surfactants — 141
20.4	Additives — 141
20.5	Artisanal soap making — 143
20.6	Recycling — 143
21	Rubber — 145
21.1	Introduction — 145
21.2	Sources — 145
21.2.1	Natural rubber — 145
21.2.2	Synthetic rubber — 146
21.2.3	Vulcanization — 146
21.3	Major uses — 147
21.3.1	Synthetic isoprene rubber — 147
21.3.2	Poly-butadiene rubber — 147
21.4	Other elastomers — 148
21.5	Recycling — 148
22	Silicon — 151
22.1	Introduction, purification of silicon — 151
22.1.1	Ferrosilicon — 152
22.2	High purity silicon, uses — 152
22.3	Silicones — 153
22.3.1	Production of silicones — 153
22.3.2	Uses and features of silicones — 154
22.4	Silicon dioxide — 155
22.5	Recycling — 156
22.5.1	Recycling of silicon — 156

22.5.2 Recycling of silicones — **156**

22.5.3 Recycling of silica — **156**

23 Iron and steel — 159

23.1 Introduction and historical production — **159**

23.2 Ore sources — **159**

23.3 Current iron production — **161**

23.3.1 Blast furnace — **161**

23.4 Steel production — **163**

23.5 By-products — **163**

23.6 Recycling — **164**

24 Aluminum — 165

24.1 Introduction and history — **165**

24.2 Bauxite sources — **166**

24.3 Production methods — **166**

24.4 Major industrial uses — **168**

24.5 By-products — **169**

24.6 Recycling — **169**

25 Copper — 171

25.1 History — **171**

25.2 Ore sources — **171**

25.3 Producers — **171**

25.4 Production methods — **171**

25.5 Major industrial uses — **173**

25.5.1 Wire, piping, machinery, and alloys — **173**

25.5.2 Coinage — **173**

25.6 Brass — **173**

25.7 Bronze — **174**

25.8 Recycling — **174**

26 Other major metals for industrial use — 177

26.1 Titanium — **177**

26.1.1 Sources — **177**

26.1.2 Worldwide production — **177**

26.1.3 Extraction chemistry, reactions — **178**

26.1.4 Volume produced annually — **179**

26.1.5 Major uses — **179**

26.2 Chromium — **180**

26.2.1 Sources — **180**

26.2.2 Extraction chemistry, reactions — **180**

26.2.3	Major uses — 181
26.3	Mercury — 181
26.3.1	Sources — 182
26.3.2	Volume produced annually — 182
26.3.3	Major uses — 183
26.4	Gold — 183
26.4.1	Introduction — 183
26.4.2	Sources — 183
26.4.3	Extraction chemistry — 184
26.4.4	Major uses — 185
26.5	Silver — 186
26.5.1	Introduction — 186
26.5.2	Sources — 186
26.5.3	Extraction chemistry — 186
26.5.4	Major uses — 187
26.6	Platinum group metals (PGM) — 188
26.6.1	Introduction — 188
26.6.2	Sources — 188
26.6.3	Extraction chemistry — 189
26.6.4	Major uses — 189
26.7	Uranium — 189
26.7.1	Introduction and history — 189
26.7.2	Sources — 189
26.7.3	Major uses — 190
26.7.4	Recycling — 191

27 Materials — 193

27.1	Introduction, silicates — 193
27.2	Enamel — 193
27.2.1	Introduction — 193
27.2.2	Production — 193
27.2.3	Uses of enamel — 194
27.3	Ceramics — 194
27.3.1	Introduction and classifications — 194
27.3.2	Production — 194
27.3.3	Major uses — 195
27.4	Metal foams — 195
27.4.1	Production — 195
27.4.2	Uses — 196
27.5	Carbon materials — 196
27.5.1	Introduction — 196
27.5.2	Bucky ball fullerenes — 196

XVI — Contents

27.5.3 Tubular fullerenes — **197**

27.5.4 Major uses — **197**

27.6 Pollution, recycling, and by-product uses — **197**

Index — 199
