

Inhaltsübersicht

Connected and Automated Vehicles

- Traffic-based Control of Truck Platoons on Freeways** 1
(Alessandro Bozzi, Tommy Chaanine, Simone Graffione, Cecilia Pasquale, Roberto Sacile, Simona Sacone, Silvia Siri)
- A Lateral Positioning Strategy for Connected and Automated Vehicles in Lane-free Traffic** 9
(Ioannis Faros, Venkata Karteek Yanumula, Panagiotis Typaldos, Ioannis Papamichail, Markos Papageorgiou)
- Simulation Methods for Mixed Legacy-Autonomous Mainline Train Operations** 19
(Emily J. Morey, R. Eddie Wilson, Kevin Galvin)
- Can Dedicated Lanes for Automated Vehicles on Urban Roads Improve Traffic Efficiency?** 27
(Gabriel Tilg, Sabine Krause, Philipp N. Stueger, Klaus Bogenberger)
- GLOSA System with Uncertain Green and Red Signal Phases** 37
(Panagiotis Typaldos, Petros Koutsas, Ioannis Papamichail, Markos Papageorgiou)

New Mobility Systems

- A New Model for Electric Vehicle Mobility and Energy Consumption in Urban Traffic Networks** 47
(Carlos Canudas-de-Wit, Martin Rodriguez-Vega, Giovanni De Nunzio)
- Shared Autonomous Vehicles Implementation for a Disrupted Public Transport Network** 55
(Sara Jaber, Hassan Mahdavi, Neila Bhouri)

Traffic Flow and Simulation

Multi-vehicle Stochastic Fundamental Diagram Consistent with Transportation Systems Theory	59
<i>(Giuio Erberto Cantarella, Ernesto Cipriani, Andrea Gemma, Orlando Giannattasio, Livia Mannini)</i>	
A RoundD-like Roundabout Scenario in CARLA Simulator	69
<i>(Ali Nadar, Mathis Lafon, Jérôme Härr)</i>	
Multimodal Performance Evaluation of Urban Traffic Control: A Microscopic Simulation Study	77
<i>(Natalie Sautter, Lisa Kessler, Danil Belikhov, Klaus Bogenberger)</i>	
A MILP Framework to Solve the Sustainable System Optimum with Link MFD Functions	89
<i>(Niloofer Shakoori, Giovanni De Nunzio, Ludovic Leclercq)</i>	
On How Traffic Signals Impact the Fundamental Diagrams of Urban Roads	99
<i>(Chao Zhang, Yechen Li, Neha Arora, Carolina Osorio)</i>	

Traffic Control in Conventional Traffic

Data-driven Methods for Identifying Travel Conditions Based on Traffic and Weather Characteristics	105
<i>(Georgia Ayfantopoulou, Evangelos Mintsis, Zisis Maleas, Evangelos Mitsakis, Josep Maria Salanova Grau, Vassilis Mizaras, Panagiotis Tzenos)</i>	
AI-based Multi-class Traffic Model Oriented to Freeway Traffic Control	113
<i>(Kleona Binjaku, Cecilia Pasquale, Simona Sacone, Elinda Kajo Meçe)</i>	
Exploiting Deep Learning and Traffic Models for Freeway Traffic Estimation	119
<i>(Alexander Genser, Michail A. Makridis, Anastasios Kouvelas)</i>	
Automatic Design of Optimal Actuated Traffic Signal Control with Transit Signal Priority	129
<i>(Mahmud Keblawi, Tomer Toledo)</i>	
A Deep Reinforcement Learning Approach for Dynamic Traffic Light Control with Transit Signal Priority	139
<i>(Tobias Nusch, Runhao Zhou, Django Adam, Angelika Hirrl, Meng Wang)</i>	
Towards Efficient Incident Detection in Real-time Traffic Management	149
<i>(Ferran Torrent-Fontbona, Monica Dominguez, Javier Fernandez, Jordi Casas)</i>	
Dynamic Cycle Time in Traffic Signal of Cyclic Max-Pressure Control	157
<i>(Razi Zoabi, Jack Haddad)</i>	

Traffic Control with Autonomous Vehicles

Distributed Ordering and Optimization for Intersection Management with Connected and Automated Vehicles 169

(Francesco Vitale, Claudio Roncoli)

Prioritization of an Automated Shuttle for V2X Public Transport at a Signalized Intersection – A Real-life Demonstration 177

(Maik Halbach, Daniel Wesemeyer, Lukas Merk, Jan Lauermann, Daniel Heß, Robert Kaul)

User Behaviour and Safety

Local Traffic Safety Analyzer – Improved Road Safety and Optimized Signal Control for Future Urban Intersections 187

(Kim Jannik Eggers, Robert Oertel, Martin Hesse)

Demand and Traffic Management

A Stochastic Programming Method for OD Estimation Using LBSN Check-in Data 197

(Qing-Long Lu, Moeid Qurashi, Constantinos Antoniou)

Delineation of Traffic Analysis Zone for Public Transportation OD Matrix Estimation Based on Socio-spatial Practices 205

(S. M. Hassan Mahdavi Moghaddam, Mostafa Ameli, K. Ramachandra Rao, Geetam Tiwari)

Workshops

How to Integrate Human Aspects Into Engineering Science of Transport and Traffic? – A Workshop Report about Discussions on Social Contextualization of Mobility 217

(Sandra Buchmüller, Susanne Wunsch)

Learning from Covid: How Can we Predict Mobility Behaviour in the Face of Disruptive Events? – How to Investigate the Mobility of the Future 239

(Paul Papendieck, Maximilian Bäuml, Anna Sotnikova, Angelika Hirle)

Table of Authors 245
