1	Introduction.....	1
1.1	Microscopic Examinations and Medical Malpractice Cases	6
Case 1.....		7
Case 2.....		8
Case 3.....		9
Case 4.....		10
Case 5.....		11
Case 6.....		12
Case 7.....		13
References.....		14
2	Staining Techniques and Microscopy.....	17
2.1	Conventional Histological Staining	17
2.1.1	Background Staining and Artifacts in Conventional Staining Methods	19
2.2	Immunohistochemical Techniques.....	20
2.2.1	Methods of Antigen Demasking	23
2.2.2	ABC-Method.....	24
2.2.3	APAAP-Method	24
2.2.4	Background Staining and Artifacts in Immunohistochemical Staining	24
2.3	Selection of Antigens and Antibodies.....	28
2.4	Special Examination Techniques	31
2.4.1	TUNEL Assay.....	31
2.4.2	In Situ Hybridization.....	31
2.4.3	Confocal Laser Scanning Microscopy	32
2.4.4	Electron Microscopy	32
2.4.5	Laser Microdissection.....	33
References.....		33
3	Histopathology of Selected Trauma.....	37
3.1	Hemorrhage, Necrosis, and Skeletal Muscle Trauma.....	37
3.1.1	Hemorrhage.....	38
3.1.2	Necrosis.....	41
3.1.3	Skeletal Muscle Trauma.....	41
3.2	Neck Trauma.....	43
3.3	Cardiac Concussion	45

3.4 Drowning – Water-Submerged Victims	46
3.4.1 Determining the Postmortem Interval in Water-Submerged Corpses.....	47
3.4.2 Histology of the Drowned Lung	48
3.4.3 Detection of Diatoms in Death by Drowning	50
3.5 Injury by Firearms and Explosives	51
3.6 Stab Wounds and Hemorrhage.....	54
3.6.1 Stab Wounds	54
3.6.2 Fatal Hemorrhage with Subendocardial Hemorrhage.....	54
3.7 Asphyxiation	56
3.8 Differentiation Between SIDS and Asphyxiation	57
3.9 Some Histopathologic Changes Due To Cardiopulmonary Resuscitation.....	58
3.10 Death by Starvation/Dehydration.....	58
3.11 Traumatic Injury to the Kidneys, Liver and Pancreas.....	59
References.....	60
4 Histopathology and Drug Abuse.....	67
4.1 Pulmonary Histopathological Findings.....	67
4.1.1 Pulmonary Edema.....	69
4.1.2 Pulmonary Granulomatosis (So-Called Junkie Pneumopathy).....	70
4.1.3 Pneumonia.....	73
4.2 Cardiac Histopathological Findings in Intravenous Drug Abuse	74
4.2.1 Myocarditis	74
4.2.2 Cocaine-Induced Findings	76
4.2.3 Endocarditis	77
4.3 Drug-Associated Nephropathies	78
4.3.1 Glomerulonephritis and Glomerulosclerosis	79
4.4 Hepatic Histopathological Findings.....	83
4.4.1 Hepatitis	83
4.4.2 Peliosis Hepatis.....	84
4.4.3 Amphetamine-Induced Liver Cell Necroses.....	85
4.4.4 Intravenous Injection of Methadone	85
4.5 Neuropathological Findings.....	86
4.6 Organ Infarction After Drug Consumption.....	86
4.7 Injection-Related Tissue and Vascular Wall Damage	87
References.....	89
5 Toxin- and Drug-Induced Pathologies	95
5.1 Hepatotoxic Histopathological Findings.....	98
5.1.1 Nonspecific Drug-Induced Hepatitis.....	99
5.1.2 Hepatic Peliosis and Focal Nodular Hyperplasia.....	102
5.1.3 Hepatic Lipofuscin.....	105
5.1.4 Transfusion Siderosis of the Liver	105
5.2 Histopathology of the Cardiotoxic Effects of Selected Medications: Drug-Induced Myocarditis.....	105
5.3 Histopathology of Other Special Intoxications.....	110
5.3.1 Special Histopathology in the Case of Colchicine Intoxication	111

5.3.2	Special Histopathology in Cases of Ethylene Glycol Intoxication	113
5.3.3	Lethal Death Cap Intoxication	116
5.3.4	Histopathological Findings in Anabolic Abuse	119
5.3.5	Reye's Syndrome	121
5.3.6	Antibiotic-Induced Pseudomembranous Colitis	122
5.3.7	Acute Drug-Induced Anaphylaxis (Anaphylactic Shock)	122
5.3.8	Anorganic Toxins, Metals, Metalloids, Carbon Monoxide, and Oxygen	125
5.3.9	Intoxication by Medication (Sleep Medications, Analgesics, Anesthetics, etc.), Organic Poisons, Solvents, Pesticides (Herbicides, Fungicides, etc.), and Other Selected Poisons.....	125
5.3.10	Further Fatal Adverse Drug Reactions and Medical Errors	129
	References.....	131
6	Alcohol-Related Histopathology	137
6.1	Alcoholic Liver Pathology	137
6.2	The Pancreas	141
6.3	Alcoholic Cardiomyopathy.....	142
6.3.1	Other Alcohol-Associated Histopathological Findings	145
	References.....	146
7	Heat, Fire, Electricity, Lightning, Radiation, and Gases	149
7.1	Heat and Fire.....	149
7.1.1	The Effects of Heat on the Skin	149
7.1.2	Heat Inhalation Trauma.....	150
7.1.3	Histological and Immunohistochemical Findings in the Case of Burn Shock.....	153
7.2	Electricity and Lightning stroke.....	155
7.2.1	Electrocution	155
7.2.2	Lightning.....	158
7.3	Malignant Hyperthermia.....	159
7.4	Radiation	160
7.5	Gases.....	161
	References.....	161
8	Hypothermia.....	165
	References.....	170
9	Thrombosis and Embolism	173
9.1	Thrombosis	173
9.2	Embolism	178
9.2.1	Thromboembolism	179
9.2.2	Fat and Bone Marrow Embolism	179
9.2.3	Air Embolism.....	184
9.2.4	Amniotic Fluid Embolism.....	185
9.2.5	Other Embolisms.....	186
	References.....	187

10 Vitality, Injury Age, Determination of Skin Wound Age, and Fracture Age	191
10.1 Vitality of an Injury or Skin Wound	192
10.2 Wound Age in the Case of Tissue Injuries	195
10.2.1 Invasion of Granulocytes	196
10.2.2 Occurrence of Macrophages	197
10.2.3 Granulation Tissue Formation	198
10.2.4 Inflammation Age in the Case of Fibrinous and Purulent Peritonitis, Pleurisy, and Pericarditis.....	198
10.2.5 Injury Age of Muscle Trauma	199
10.3 Skin Wounds.....	200
10.4 Bone Fractures and Fracture Healing	203
References	205
11 Aspiration and Inhalation	211
11.1 Aspiration of Water	211
11.2 Aspiration of Blood.....	213
11.3 Aspiration of Gastric Content or Chyme.....	215
11.4 Amniotic Fluid Aspiration	216
11.5 Aspiration of Barium Sulfate	219
11.6 Aspiration of Textile Material and Fibers	219
11.7 Aspiration of Other Substances	220
11.8 Inhalation of Smoke, Dust, Gases, and Allergens.....	221
11.8.1 Histopathological Findings After Inhalation of Volatile Substances.....	221
11.8.2 Asthma and Fatal Anaphylaxis.....	222
References	226
12 Forensic-Histological Diagnosis of Species, Gender, Age, and Identity.....	231
12.1 Species Diagnosis.....	231
12.2 Cytological Gender Determination	231
12.3 Tissue and Organ Determination	234
12.4 ABO Blood Type Verification	234
12.5 Histological Age Estimation	234
12.5.1 Tooth Cementum Annulation for Age Estimation.....	234
12.5.2 Age Estimation from Human Bones.....	234
12.5.3 Age Estimation Using Routine Histology	235
12.6 Evidence of Tattoo Remnants in the Identification Process	235
References	237
13 Coronary Sclerosis, Myocardial Infarction, Myocarditis, Cardiomyopathy, Coronary Anomalies, and the Cardiac Conduction System	241
13.1 Sudden Coronary Death	241
13.2 Myocardial Infarction.....	245
13.3 Acute and Chronic Viral Myocarditis	249
13.3.1 Acute Viral Myocarditis	250
13.3.2 Chronic Myocarditis.....	257

13.4 Non-virus Based Myocarditis.....	258
13.4.1 Bacterial Myocarditis	258
13.4.2 Tuberculous Myocarditis	259
13.4.3 Fungal Myocarditis.....	260
13.4.4 Rheumatoid Myocarditis	261
13.4.5 Giant Cell Myocarditis	261
13.4.6 Myocardial Involvement in Sarcoidosis	262
13.4.7 Eosinophilic Myocarditis.....	262
13.5 Cardiomyopathy	262
13.5.1 Hypertrophic Cardiomyopathy	263
13.5.2 Dilative Cardiomyopathy (DCM).....	264
13.5.3 Arrhythmogenic Right-Ventricular Cardiomyopathy/Dysplasia (ARVC)	266
13.5.4 Isolated Noncompaction Cardiomyopathy	267
13.5.5 Alcoholic Cardiomyopathy	268
13.5.6 Rare Forms of Cardiomyopathy	268
13.6 Coronary Anomalies.....	269
13.7 Cardiac Conduction System: CCS	270
13.7.1 Examining the CCS	270
13.7.2 Histopathologic Findings in the CCS	271
References.....	272
14 Vascular, Cardiac Valve, and Metabolic Diseases	283
14.1 Vascular Diseases	283
14.1.1 General, Coronary, and Cerebral Sclerosis.....	284
14.1.2 Aneurysms	284
14.1.3 Dissecting Aortic Aneurysm in Idiopathic Cystic Medial Necrosis.....	284
14.1.4 Marfan Syndrome.....	287
14.1.5 Ehlers–Danlos Syndrome	287
14.1.6 Aneurysms in Other Arteries.....	288
14.2 Arteritis.....	288
14.2.1 Syphilitic Aortitis.....	288
14.2.2 Suppurative Aortitis in Atherosclerosis.....	289
14.2.3 Giant-Cell Arteritis	289
14.2.4 Isolated Coronary Arteritis	291
14.2.5 Takayasu’s Arteritis	292
14.2.6 Kawasaki Disease	293
14.2.7 Drug-Associated Vasculitis	293
14.3 Heart Valve Defect – Endocarditis	294
14.4 Amyloidosis	294
14.5 Hemochromatosis.....	296
References.....	298
15 Lethal Infections, Sepsis, and Shock	303
15.1 Pneumonias	303
15.1.1 Purulent Bronchopneumonia.....	304
15.1.2 Lobar Pneumonia and Carnificating Pneumonia.....	304
15.1.3 Fungal Pneumonia	305
15.1.4 Pulmonary Tuberculosis	306

15.1.5	Viral Pneumonia	309
15.1.6	Acute Interstitial Pneumonitis (Hamman–Rich Syndrome)....	309
15.2	Pancreatitis	310
15.3	Malaria.....	311
15.4	Clostridia	312
15.5	Measles.....	312
15.6	Hydatid Disease (Echinococcosis)	313
15.7	Ascending Cholangitis	314
15.8	Ascending Urinary Tract Infections	315
15.9	Glomerulonephritis.....	315
15.10	OPSI Syndrome.....	317
15.11	Shock.....	319
15.12	Iatrogenic Infections.....	324
15.13	Allergies, Insect Bites, and Anaphylactic Shock	325
15.14	H1N1-Infection	326
15.15	Black Esophagus	328
	References	328
16	Endocrine Organs	333
16.1	Diabetes.....	333
16.2	Loss of Adrenocortical Lipids.....	336
16.3	Acute Primary Adrenal Insufficiency (Addison’s Disease)	336
16.4	Fatal Pheochromocytoma	337
16.5	Thyroid and Parathyroid Dysfunction.....	338
16.5.1	The Thyroid Gland	339
16.5.2	Parathyroid Glands	342
16.6	Hypophyseal Dysfunction	344
	References	344
17	Pregnancy-Related Death, Death in Newborns, and Sudden Infant Death Syndrome	347
17.1	Pregnancy-Related Maternal Deaths	347
17.1.1	Extrauterine Pregnancy or Ruptured Tubal/Ectopic Pregnancy	348
17.1.2	HELLP Syndrome	348
17.1.3	Amniotic Fluid Embolism	349
17.2	Perinatal Fatalities	349
17.2.1	Death Shortly Before or During Birth.....	349
17.2.2	Amniotic Infection Syndrome (AIS).....	353
17.2.3	Endangiitis Obliterans of the Placental Vessels.....	354
17.3	Newborns Found Lifeless.....	355
17.3.1	Histological Pulmonary Findings.....	355
17.3.2	Pregnancy Decidua and the Arias-Stella Phenomenon	355
17.4	Sudden Infant Death Syndrome (SIDS)	355
17.4.1	The Respiratory Tract and Lungs	357
17.4.2	Myocarditis and SIDS	364
17.4.3	Cardiomyopathies and SIDS	372
17.4.4	Hypoxia-Related Changes	374
17.4.5	Histopathological Findings in the Cardiac Conduction System.....	375

17.4.6 Salivary Glands.....	375
17.4.7 The Liver	377
17.4.8 The Thymus.....	378
17.4.9 Endocrine Organs (Pancreas, Thyroid, Pituitary).....	378
17.4.10 Lymph Nodes and Spleen.....	379
17.4.11 Additional Histopathological Findings.....	380
References	380
18 Forensic Cytology.....	391
18.1 Detection, Isolation, and Species Identification of Cells.....	391
18.2 Cytological Diagnosis in Sexual Offenses	392
18.2.1 Sperm Detection	392
18.2.2 Detection of Condom Residues	393
18.2.3 Detection of Vaginal Epithelial Cells	395
18.3 Identification of Cells and Tissues in the Case of Suspected Material Contamination or Mix-Up	396
18.4 Transfusion Reactions	396
18.5 Additional Methods of Forensic Cytological Diagnosis	397
References	397
