Foreword *xvii*

Preface *xix*

Acknowledgement *xxi*

About the Contributors *xxiii*

About the Companion Website *xxv*

1 Arterial Supply to the Central Nervous System *1*

Arterial Supply to the Brain *1*

- 1.1 Basic Pattern of the Main Arteries Supplying the Brain *1*
- 1.2 Basic Pattern of Incoming Branches to the Cerebral Arterial Circle *1*
- 1.3 Species Variations *2*
- 1.4 Summary of the Significance of the Vertebral Artery as a Source of Blood to the Brain *5*
- 1.5 Humane Slaughter *6*
- 1.6 Rete Mirabile *7*
- Superficial Arteries of the Spinal Cord** *8*
- 1.7 Main Trunks *8*
- 1.8 Anastomosing Arteries *8*
- 1.9 Segmental Arteries to the Spinal Cord *10*
- 1.10 General Principles Governing the Distribution of Arteries below the Surface of the Neuraxis *10*
- 1.11 The Deep Arteries of the Spinal Cord *10*
- 1.12 The Problem of Pulsation *11*
- 1.13 Arterial Anastomoses of the Neuraxis *11*

2 The Meninges and Cerebrospinal Fluid *13*

Meninges *13*

- 2.1 General Anatomy of the Cranial and Spinal Meninges *13*
- 2.2 Anatomy of the Meninges at the Roots of Spinal and Cranial Nerves *14*
- 2.3 The Spaces around the Meninges *14*
- 2.4 Relationship of Blood Vessels to the Meninges *16*
- 2.5 The Filum Terminale *16*
- 2.6 The Falx Cerebri and Membranous Tentorium Cerebelli *16*
- Cerebrospinal Fluid** *16*

- 2.7 Formation of Cerebrospinal Fluid *16*
- 2.8 The Choroid Plexuses *16*

- 2.9 Mechanism of Formation of Cerebrospinal Fluid 17
- 2.10 Circulation of Cerebrospinal Fluid 17
- 2.11 Drainage of Cerebrospinal Fluid 19
- 2.12 Functions of Cerebrospinal Fluid 20
- 2.13 Blood-brain Barrier 21
- 2.14 Collection of Cerebrospinal Fluid 22
- 2.15 Clinical Conditions of the Cerebrospinal Fluid System 23

3 Venous Drainage of the Spinal Cord and Brain 25

- The Cranial System of Venous Sinuses 25**
 - 3.1 General Plan 25
 - 3.2 The Components of the Dorsal System of Sinuses 27
 - 3.3 The Components of the Ventral System of Sinuses 28
 - 3.4 Drainage of the Cranial Sinuses into the Systemic Circulation 28
- The Spinal System of Venous Sinuses 29**
 - 3.5 General Plan 29
 - 3.6 Connections to the Cranial System of Sinuses 29
 - 3.7 Territory Drained by the Spinal System of Sinuses 29
 - 3.8 Drainage of the Spinal Sinuses into the Systemic Circulation 29
- Clinical Significance of the Venous Drainage of the Neuraxis 30**
 - 3.9 Spread of Infection in the Head 30
 - 3.10 Paradoxical Embolism 30
 - 3.11 Venous Obstruction 30
 - 3.12 Angiography for Diagnosis 31

4 The Applied Anatomy of the Vertebral Canal 33

- The Anatomy of Epidural Anaesthesia and Lumbar Puncture 33**
 - 4.1 The Vertebrae 33
 - 4.2 Spinal Cord 33
 - 4.3 Meninges 35
 - 4.4 Lumbar Puncture 35
 - 4.5 Epidural Anaesthesia in the Ox 35
 - 4.6 Injuries to the Root of the Tail 36
- The Anatomy of the Intervertebral Disc 36**
 - 4.7 The Components of the Disc 36
 - 4.8 Senile Changes 38
 - 4.9 Disc Protrusion 38
 - 4.10 Fibrocartilaginous Embolism 41
- Malformation or Malarticulation of Vertebrae 41**
 - 4.11 The 'Wobbler Syndrome' in the Dog 41
 - 4.12 The Wobbler Syndrome in the Horse 41
 - 4.13 Atlanto-Axial Subluxation in Dogs 42
 - 4.14 Anomalous Atlanto-Occipital Region in Arab Horses 42
 - 4.15 Other Vertebral Abnormalities in Dogs 42

5 The Neuron 43

- The Anatomy of Neurons 43**
 - 5.1 General Structure 43

5.2	The Axon	46
5.3	Epineurium, Perineurium and Endoneurium	50
5.4	The Synapse	51
5.5	Phylogenetically Primitive and Advanced Neurons	54
5.6	Axonal Degeneration and Regeneration in Peripheral Nerves	55
5.7	Regeneration and Plasticity in the Neuraxis	58
5.8	Stem Cells and Olfactory Ensheathing Cells	58
5.9	The Reflex Arc	59
5.10	Decussation: The Coiling Reflex	60
6	The Nerve Impulse	63
	Excitation and Inhibition	63
6.1	Ion Channels and Gating Mechanisms	63
6.2	The Membrane Potential	64
6.3	The Excitatory Postsynaptic Potential	64
6.4	The Inhibitory Postsynaptic Potential	67
6.5	The Receptor Potential	68
6.6	The End-plate Potential	69
6.7	Summary of Decremental Potentials	70
6.8	The Action Potential	71
6.9	Concerning Water Closets	73
6.10	Transducer Mechanisms of Receptors	73
6.11	Astrocytes	76
6.12	Oligodendrocytes	76
6.13	Microglia	77
7	Nuclei of the Cranial Nerves	79
	General Principles Governing the Architecture of the Nuclei of the Cranial Nerves	79
7.1	Shape and Position of the Central Canal	79
7.2	Fragmentation of the Basic Columns of Grey Matter	79
7.3	Development of an Additional Component; Special Visceral Efferent	80
7.4	The Cranial Nerves of the Special Senses	82
7.5	Summary of the Architectural Principles of the Nuclei of the Cranial Nerves	82
	Names, Topography and Functions of the Cranial Nerve Nuclei	82
7.6	Somatic Afferent Nucleus	82
7.7	Visceral Afferent Nucleus	85
7.8	Visceral Efferent Nuclei	85
7.9	Special Visceral Efferent Nuclei	86
7.10	Somatic Efferent Nuclei	86
	Reflex Arcs of the Nuclei of the Cranial Nerves	87
	Significance of the Nuclei of the Cranial Nerves in Clinical Neurology	88
8	Medial Lemniscal System	89
	Conscious Sensory Modalities, their Receptors and Pathways	89
8.1	Conscious Sensory Modalities	89
8.2	Peripheral Receptors of Touch, Pressure and Joint Proprioception	91

- 8.3 Pathways of Touch, Pressure and Joint Proprioception 92
- Clinical Conditions Affecting the Medial Lemniscal System 94**
- 8.4 Effects of Lesions in the Dorsal Funiculus 94
- Pain Pathways 96**
- 8.5 Peripheral Receptors of Pain 96
- 8.6 Spinothalamic Tract of Man 97
- 8.7 Spinothalamic Pathways in Domestic Mammals 100
- 8.8 Spinocervical Tract (Spinocervicothalamic Tract) 100
- 8.9 Species Variations in the Medial Lemniscal System 100
- 8.10 Somatotopic Localisation 101
- 8.11 Blending of Tracts in the Spinal Cord 101
- 8.12 Summary of the Medial Lemniscus System 101

9 The Special Senses 103

Vision 103

- 9.1 Neuron 1 103
- 9.2 Neuron 2 103
- 9.3 Neuron 3 103

Hearing 106

- 9.4 Neuron 1 106
- 9.5 Neuron 2 106
- 9.6 Neuron 3 106

Balance 107

- 9.7 Neuron 1 107
- 9.8 Neuron 2 107

Taste 112

- 9.9 Neuron 1 112
- 9.10 Neuron 2 112
- 9.11 Neuron 3 112

Olfaction Proper: The Sense of Smell 113

- 9.12 Neuron 1 113
- 9.13 Neuron 2 114
- 9.14 Neuron 3 114

Summary of the Conscious Sensory Systems 117

10 Spinocerebellar Pathways and Ascending Reticular Formation 119

- 10.1 Spinocerebellar Pathways 119
- 10.2 Ascending Reticular Formation 119
- Spinocerebellar Pathways 120**
- 10.3 Hindlimbs 120
- 10.4 Forelimbs 122
- 10.5 Projections of Spinocerebellar Pathways to the Cerebral Cortex 123
- 10.6 Functions of the Spinocerebellar Pathways 124
- 10.7 Species Variations 124
- Ascending Reticular Formation 124**
- 10.8 Organisation 124

	Functions of the Ascending Reticular Formation	128
10.9	Arousal	128
10.10	Transmission of Deep Pain	128
10.11	Summary of Spinocerebellar Pathways and Ascending Reticular Formation	132
11	Somatic Motor Systems	135
	Somatic Efferent Neurons	135
11.1	Motor Neurons in the Ventral Horn of the Spinal Cord	135
	Muscle Spindles	137
11.2	Structure of the Muscle Spindle	137
11.3	The Mode of Operation of the Muscle Spindle	137
11.4	Role of Muscle Spindles in Posture and Movement	139
11.5	Golgi Tendon Organs	139
11.6	Muscle Tone	140
11.7	Motor Unit	141
11.8	Recruitment of Motor Units	141
11.9	Summary of Ways of Increasing the Force of Contraction of a Muscle	142
	The Final Common Path	142
11.10	Algebraic Summation at the Final Common Path	142
11.11	Renshaw Cells	142
11.12	Lower Motor Neuron	142
11.13	Integration of the Two Sides of the Neuraxis	143
12	Pyramidal System	145
	Pyramidal Pathways	145
12.1	The Neuron Relay	145
	Feedback Pathways of the Pyramidal System	148
12.2	Feedback of the Pyramidal System	148
	Comparative Anatomy of the Pyramidal System	149
12.3	Species Variations in the Primary Motor Area of the Cerebral Cortex	149
12.4	Species Variations in the Pyramidal System	150
12.5	The Function of the Pyramidal System	150
	Clinical Considerations	151
12.6	Effects of Lesions in the Pyramidal System	151
12.7	Validity of the Distinction between Pyramidal and Extrapyrarnidal Systems	152
13	Extrapyrarnidal System	153
	Motor Centres	153
13.1	Nine Command Centres	153
13.2	The Cerebral Cortex	153
13.3	Basal Nuclei and Corpus Striatum	154
13.4	Midbrain Reticular Formation	155
13.5	Red Nucleus	155

13.6	Mesencephalic Tectum	155
13.7	Pontine Motor Reticular Centres	156
13.8	Lateral Medullary Motor Reticular Centres	156
13.9	Medial Medullary Motor Reticular Centres	156
13.10	Vestibular Nuclei	156
	Spinal Pathways	156
13.11	Pontine and Medullary Reticulospinal Tracts	156
13.12	Rubrospinal Tract	158
13.13	Vestibulospinal Tract	159
13.14	Tectospinal Tract	159
13.15	The Position in the Spinal Cord of the Tracts of the Extraparapidal System	159
13.16	Summary of the Tracts of the Extraparapidal System	159
14	Extraparapidal Feedback and Upper Motor Neuron Disorders	161
	Feedback of the Extraparapidal System	161
14.1	Neuronal Centres of the Feedback Circuits	161
14.2	Feedback Circuits	161
14.3	Balance between Inhibitory and Facilitatory Centres	164
14.4	Clinical Signs of Lesions in Extraparapidal Motor Centres in Man	165
14.5	Clinical Signs of Lesions in the Basal Nuclei in Domestic Animals	166
14.6	Upper Motor Neuron Disorders	166
15	Summary of the Somatic Motor Systems	169
	The Motor Components of the Neuraxis	169
15.1	Pyramidal System	169
15.2	Extraparapidal System	170
15.3	Distinction between Pyramidal and Extraparapidal Systems	171
	Clinical Signs of Motor System Injuries	171
15.4	Functions of the Pyramidal and Extraparapidal Systems: Effects of Injury to the Motor Command Centres	171
15.5	Upper Motor Neuron	171
15.6	Lower Motor Neuron	172
15.7	Summary of Projections onto the Final Common Path	173
16	The Cerebellum	175
	Afferent Pathways to the Cerebellum	175
16.1	Ascending from the Spinal Cord	175
16.2	Feedback Input into the Cerebellar Cortex	175
	Arterial Supply to the Brain	177
	Summary of Pathways in the Cerebellar Peduncles	178
16.3	Caudal Cerebellar Peduncle	179
16.4	Middle Cerebellar Peduncle	179
16.5	Rostral Cerebellar Peduncle	179
	Rostral Cerebellar Peduncle	179
16.6	Vestibular Areas	179
16.7	Proprioceptive Areas	179

16.8	Feedback Areas	180
	Functions of the Cerebellum	180
16.9	Co-ordination and Regulation of Movement	180
16.10	Control of Posture	181
16.11	Ipsilateral Function of the Cerebellum	181
16.12	Summary of Cerebellar Function	181
16.13	Functional Histology of the Cerebellum	182
	Clinical Conditions of the Cerebellum	184
16.14	The Three Cerebellar Syndromes	184
16.15	Cerebellar Disease in Domestic Mammals and Man	185
17	Autonomic Components of the Central Nervous System	187
	Neocortex and Hippocampus	187
17.1	Cortical Components	187
17.2	Hippocampus	188
	Diencephalon	188
17.3	Hypothalamus	188
	The Autonomic Functions of the Hypothalamus	190
17.4	Amygdaloid Body and Septal Nuclei	192
17.5	Habenular Nuclei	193
17.6	Hindbrain Autonomic Areas	193
	The Autonomic Areas of the Hindbrain	193
17.7	Autonomic Motor Pathways in the Spinal Cord	194
17.8	Ascending (Afferent) Visceral Pathways in the Spinal Cord and Brainstem	195
	Clinical Disorders of the Autonomic System	195
17.9	Effects of Lesions in Autonomic Pathways	195
17.10	Summary of Descending Autonomic Pathways	197
18	The Cerebral Cortex and Thalamus	199
	Cerebral Cortex	199
18.1	Projection Areas and Association Areas	199
18.2	Instinct	200
18.3	Cerebral Cortex in Primitive Mammals	200
18.4	Cerebral Cortex in the Cat and Dog	200
18.5	Conditioned Reflexes	200
18.6	Cerebral Cortex in Man	201
18.7	Cognitive Association Area in Man	202
18.8	Cognitive Association Area in Carnivores	203
18.9	Interpretative Association Area in Man	204
18.10	Interpretative Association Area in Carnivores	204
18.11	Frontal Association Area in Man	204
18.12	Frontal Association Area in Carnivores	205
18.13	Corpus Callosum	205
	Clinical Conditions of the Cerebral Cortex	205
18.14	Effects of Extensive Damage to the Cerebral Hemisphere in Domestic Mammals	205

18.15	Seizures	207
	Histology of the Cerebral Cortex	208
18.16	Histology of the Cerebral Cortex	208
	Thalamus	208
18.17	Ventral Group of Thalamic Nuclei	209
18.18	The Lateral Group	210
18.19	Central (or Intralaminar) Group	210
18.20	Dorsomedial Group	210
18.21	Summary of Incoming Afferent Paths to the Thalamus:	210
18.22	Summary of the Projections from the Thalamus to the Cerebral Cortex	211
18.23	Summary of Functions of the Thalamus:	211
18.24	Clinical Effects of Lesions of the Thalamus in Domestic Mammals	212
18.25	Clinical Effects of Lesions of the Thalamus in Man	212
	Growth of the Human Brain	212
19	Embryological and Comparative Neuroanatomy	215
	The Embryological Development of the Central Nervous System	215
19.1	The Development of the Brain	215
19.2	The Development of the Spinal Cord	217
19.3	The Development of the Neural Crest	217
	Evolution of the Vertebrate Forebrain	218
19.4	Primitive Vertebrates	218
19.5	Contemporary Amphibian	218
19.6	Contemporary Advanced Reptile	219
19.7	Mammal	220
19.8	Bird	221
19.9	Major Homologies in Mammals and Birds	222
	Evolution of the Capacity to Differentiate Sensory Modalities	223
19.10	Lower Vertebrates, Including Amphibians	223
19.11	Advanced Reptiles and Birds	223
19.12	Mammals	223
	Special Features of the Avian Brain	223
19.13	Size of the Brain	223
19.14	Poor Development of the Cerebral Cortex	223
19.15	External Striatum	224
19.16	Colliculi: The Optic Lobe	224
19.17	Olfactory Areas	224
19.18	Cerebellum	225
19.19	Spinocerebellar Pathways	226
19.20	Cuneate and Gracile Fascicles	226
19.21	Motor Spinal Pathways	227
20	Clinical Neurology	229
20.1	Mental Status	229
20.2	Posture	230
20.3	Gait	230
20.4	Examination of the Cranial Nerves: Tests and Observations	232

	Testing Postural and Locomotor Responses	243
20.5	Tonic Neck and Eye Responses	243
20.6	Proprioceptive Positioning Responses	243
20.7	Placing Responses	244
20.8	Extensor Postural Thrust	245
20.9	Hopping	245
20.10	Wheelbarrow Test	245
20.11	Hemiwalking	246
20.12	Righting	247
20.13	Blindfolding	247
20.14	Circling Test	247
20.15	Sway Test	247
	Examination of Spinal Reflexes	247
20.16	Withdrawal (Flexor) Reflex	247
20.17	Patellar Tendon Reflex	249
20.18	Triceps Tendon Reflex	250
20.19	Biceps Tendon Reflex	250
20.20	Cutaneous Trunci/Colli (Formerly Panniculus) Reflex	250
20.21	Perineal Reflex	251
20.22	Crossed Extensor Reflex	251
20.23	Babinski Reflex	251
	Other Tests	252
20.24	Assessment of Muscle Tone	252
20.25	Testing Conscious Pain Responses	252
20.26	Detecting Discomfort	252
20.27	Testing the Sympathetic System	252
20.28	Case Sheet	254
21	Imaging Techniques for Study of the Central Nervous System	257
	General Considerations	257
21.1	Species	257
21.2	Objectives of Imaging in Clinical Neurology	257
21.3	Computed Tomography and Magnetic Resonance Imaging	258
21.4	The Use of Contrast Agents in Imaging	260
	Intracranial Structures	262
21.5	Positioning of the Head	262
21.6	Breed and Age Variation in Images of the Head	262
	Vertebral Column	263
21.7	Positioning of the Patient	263
21.8	Imaging the Vertebral Column	264
21.9	Contrast Radiography of the Vertebral Column	267
22	Topographical Anatomy of the Central Nervous System	269
	Spinal Cord	269
22.1	Regions of the Spinal Cord	269
22.2	Segments of Spinal Cord and their Relationship to Vertebrae	270
22.3	General Organisation of Grey and White Matter	270

22.4	Dorsal, Lateral and Ventral Horns of Grey Matter	271
22.5	Laminae of Grey Matter	272
22.6	Funiculi of White Matter	272
22.7	Tracts of the White Matter	273
	Medulla Oblongata	274
22.8	Gross Structure	274
22.9	Cranial Nerves	274
22.10	Ventricular System	275
22.11	Internal Structure	277
	Pons	280
22.12	Gross Structure	280
22.13	Cranial Nerves	280
22.14	Ventricular System	281
22.15	Internal Structure	281
	Midbrain	283
22.16	Gross Structure	283
22.17	Cranial Nerves	283
22.18	Ventricular System	284
22.19	Internal Structure	284
	Diencephalon	288
22.20	Gross Structure	288
22.21	Cranial Nerves	289
22.22	Ventricular System	289
22.23	Internal Structure	290
	Cerebellum	293
22.24	Gross Structure	293
22.25	Internal Structure	293
22.26	Cerebellar Peduncles	294
	Cerebral Hemispheres	295
22.27	Gross Structure	295
22.28	Ventricular System	296
22.29	Internal Structure	297
23	Electrodiagnostics	303
23.1	Introduction	303
23.2	Electromyography	303
23.3	Nerve Conduction Velocity	304
23.4	Electroencephalography	304
23.5	Evoked Potentials	305
23.6	Electroretinography	307
23.7	Intra-operative Monitoring of Spinal Cord Function	307
