Foreword — VII

1 Resolving the dilemma — 1

1.1 How to read this book — 6

2 Philosophy of scientific explanation — 10

2.1 Difficulties with models of explanation after Hempel — 14

2.2 Contemporary solutions to models of explanation — 23

2.2.1 The perils of non-causal explanations — 25

2.2.2 Typology of non-causal explanations — 31

2.3 The principle-based model of scientific explanation — 36

3 Systemic explanation in linguistics — 47

3.1 The missing panchronic view — 48

3.2 In the name of the principle of the analysis — 59

4 Formal explanation in linguistics — 74

4.1 Building linguistics as a science — 78

4.2 Explication of some models of formal explanation in linguistics — 93

The first interlude: Herdan's Language as choice and chance — 102

5 Functional explanation in quantitative linguistics — 115

5.1 General notion of functional explanation in linguistics — 117

5.2 System-theoretical linguistics — 124

5.2.1 What is a linguistic law? — 137

5.2.2 The register hypothesis and the principle of invariance of the linguistic system structure — 141

5.3 The unified approach in quantitative linguistics — 146

5.3.1 The struggle with logical empiricism — 149

5.3.2 Difficulties in grasping the linguistic law — 154

The second interlude: The principle of compositeness — 164

5.4 The diversity of theories in quantitative linguistics — 170

5.4.1 The origin of linguistic law — 172

X — Contents

5.5 Functional explanation in system-theoretical linguistics — 178

5.5.1 Reassessment of the structural axiom — 195

**5.6 Beyond functional explanation: Topological explanation in
system-theoretical linguistics — 207**

6 Conclusion — 218

Appendix — 223
