

Contents

A Tour in Process Mining: From Practice to Algorithmic Challenges.	1
<i>Wil van der Aalst, Josep Carmona, Thomas Chatain, and Boudewijn van Dongen</i>	
How Petri Net Theory Serves Petri Net Model Checking: A Survey	36
<i>Karsten Wolf</i>	
Parametric Verification: An Introduction	64
<i>Étienne André, Michał Knapik, Didier Lime, Wojciech Penczek, and Laure Petrucci</i>	
Integrated Simulation of Domain-Specific Modeling Languages with Petri Net-Based Transformational Semantics	101
<i>David Mosteller, Michael Haustermann, Daniel Moldt, and Dennis Schmitz</i>	
Formal Modelling and Incremental Verification of the MQTT IoT Protocol.	126
<i>Alejandro Rodríguez, Lars Michael Kristensen, and Adrian Rutle</i>	
Kleene Theorems for Free Choice Automata over Distributed Alphabets	146
<i>Ramchandra Phawade</i>	
Synthesis of Weighted Marked Graphs from Constrained Labelled Transition Systems: A Geometric Approach	172
<i>Raymond Devillers, Evgeny Erofeev, and Thomas Hujsa</i>	
Evaluating Conformance Measures in Process Mining Using Conformance Propositions	192
<i>Anja F. Syring, Niek Tax, and Wil M. P. van der Aalst</i>	
Relabelling LTS for Petri Net Synthesis via Solving Separation Problems . . .	222
<i>Uli Schlachter and Harro Wimmel</i>	
Author Index	255
