

Contents List of Papers and Workshop Summaries

Fouze Abu Qouder & Miriam Amit

Ethnomathematics of Bedouin Culture (Geometry in Bedouin
Embroidery) 1

Jogymol Kalariparampil Alex

Mathematics Education for the Future: Evidence from Mathematics
Education and Research Centre in a Rural University 7

Anita N. Alexander

Cultivating Inquiry in Advanced Mathematics with the Next
Generation of Mathematics Professors 13

Nurten Alpaslan & Emre Alpaslan

Mathematics for Everybody 19

Drishana Bachhawat

Introducing the History of Mathematics in the School Curriculum 21

Dawnette Blackwood-Rhoomes & John Gordon

Developing Abstract Mathematical Thinkers Part 2- Implementing Viable
Strategies 24

Simone Brasili

Online Teacher Training for K-12 Schools on Conceptual Change in
Symmetry and Invariance in the Classroom during Pandemic
Covid 19..... 31

Gail Burrill

Principles for the Design and Implementation of Instruction 38

Ann Dowker

The Numbers Count Intervention: Do the Benefits Persist through
Key Stage 2? 45

Angeline Duma, Magdeline Stephen & Emmanuel Mushayikwa

Cumulative Knowledge Building in a Grade 12 Semiconductors Lesson:
A Comparative Study between Online and Contact Mode of
Teaching 51

Courtney Fox

Exponential Growth and the Metric System: Using Stem to Create an
Active Learning Environment..... 60

Grant A Fraser	
Teaching Online Courses for Undergraduate University Students: Challenges and Opportunities	64
Gerald A. Goldin	
Foundational Pillars of Mathematics: Implications for a Holistic Philosophy of Mathematics Education.....	67
Christopher Gordon & David Pugalee	
Publishing Secondary Students’ Research Projects	73
John Gordon	
Developing Abstract Mathematical Thinkers Part 1 - Identifying the Challenges	79
Ivona Grzegorzcyk	
From 2D to 3D Symmetries	83
Ruhani Gulati & Saumya Gupta	
ISOTHETIC POLYGONS: Application of Fisk’s Proof and Fortress Theorem	90
Pam Harris	
Developing Mathematical Reasoning: The Trap of Algorithms	95
Marc Husband, Evan Throop-Robinson, Allison Tucker & Carolyn Clarke	
Co-teaching in an Elementary Mathematics Education Methods Course: Growing Awarenesses.....	99
Gibbs Y.Kanyongo	
Introduction to Confirmatory Factor Analysis (CFA)) using Lavaan in R Statistical Programming Language	107
Kathryn Kozak	
Active Learning Activities: Finding and Developing	109
Ishikka Ladia & Mrigshira Mehra	
Scutoids	113
Barbara H. Leitherer, Pankaj R. Dwarka, Entela K. Xhane & Jignasa R. Rami	
Global Learning and Climate Change: Undergraduate Research Reflections from Student Scholars and Faculty Advisors at a 2-Year College.....	117

Michail Lousis

Media as Constitutive Factors for Paradigm Shifts in Mathematics .. 123

Günter Maresch, Natalia Segura Caballero, Julia Köck & Eleni Lagoudaki

The New Online Platform RIF for Training Spatial Ability..... 131

Johannes Memling

From the Fundamental Theorem of Algebra to Monstrous Moonshine..... 137

Shelby Morge & Christopher Gordon

Integrating Mathematics and Computer Science Using Squeak Etoys..... 143

Diva Moriani & Nishika Shah

Non-Routine Problem-Solving Strategies for Children Making

Mathematics Formula Free..... 149

Janina Morska

The Teacher's Job after the Pandemic..... 156

Ildikó Nagy Pomuczné

Content and Teaching of the Topic of Number Theory in the 11th Grade
of High School in Hungary..... 160

Maria de Natividade

AMU Commission for Mathematics Education in Africa: A Contribution to

Improving the Quality of Mathematics Teaching and Learning in Africa 164

Reinhard Oldenburg

A Technology-oriented Algebra Curriculum..... 168

Elizabeth Oldham & Aibhín Bray

Innovative Experiential Practice(s) in Teacher Education: A Case Study
in an Irish University 174

Andrea Peter-Koop

The Impact of a Long-Term Professional Development Program

Addressing Kindergarten and Grade 1 Teachers on Students'

Achievement in Early Mathematics..... 181

Sarah Quebec Fuentes

S³D Approach: Strategies and Tools for Fostering Equitable Small-

Group, Student-to-Student Discourse 187

Ann-Sofi Røj-Lindberg

Reflections on the Links between Innovative Practices in Mathematics

Education and Democracy..... 194

İpek Saralar Aras & Bengi Bırgılı	
In the Pursuit of a Course Design: A TPACK-based Geometry for Pre-service Mathematics Teachers	200
Nishika Shah & Diva Moriani	
Using Technology to Learn Mathematics	206
Pari Shah	
Non-routine Problem-solving Strategies	209
Atara Shriki & Ilana Lavy	
Mathematics Teachers Using ChatGPT for Designing Lessons Plans	213
M. Vali Siadat	
An Innovative Model of Teaching and Learning in Mathematics	219
Clifford Singer	
Geometric Constructions: Understanding Constructing Irrational Numbers on the Number Line with Compass and Ruler in the Middle School	225
Panagiotis Stefanides	
Dissemination Methods Employed in Presenting the Discrete Geometries of the Discovered Invention of a Non-Regular Icosahedron: “The Generator Polyhedron”	230
Aynalem Tesfaye	
The Effect of Gender and School Location on Early-Grade Children’s Mathematics Achievement in Halaba, Ethiopia	237
Eleni Tsami, Dimitra Kouloumpou, Andreas Rokopanos & Dimitrios Anastasopoulos	
Shapes and Geometric Aptitude	245
Vivian Libeth Uzuriaga López, Héctor Gerardo Sánchez Bedoya & Walter F. Castro Gordillo	
Problem situations for the teaching of school mathematics	251
Ariana-Stanca Văcărețu	
Visible Maths	255
Alan Zollman	
Wellness Pedagogical Knowledge: Professional Development to Address STEM Teachers’ Needs	261
