

# Synopsis

---

|                    |   |    |      |   |     |
|--------------------|---|----|------|---|-----|
| Prefaces           |   | 7  | 3    | Small rivers – Medium watercourses                                      | 93  |
| Acknowledgements   |   | 9  | 3.1  | Basics  | 93  |
| Authors Experience |   | 11 | 3.2  | Issues from an ecological point of view                                 | 93  |
| 1                  | Checklist for practical use                             | 13 | 3.3  | Restoration methods and and structural designs                          | 94  |
| 2                  | Streams and ditches – Small watercourses                | 19 | 4    | Major rivers – Major watercourses                                       | 101 |
| 2.1                | Problems, deficits and conflicts                        | 20 | 4.1  | Characteristics of alpine rivers in comparison to lowland rivers        | 101 |
| 2.2                | To learn from nature                                    | 28 | 4.2  | Problems from an ecological point of view                               | 103 |
| 2.3                | Positive and negative development series                | 37 | 4.3  | River specific dynamic  | 103 |
| 2.4                | Water and Soil Bioengineering methods                   | 40 | 4.4  | Comparison of regulated, artificial river course – natural river course | 114 |
| 2.5                | Structural construction methods for streams and ditches | 61 | 4.5  | Deadwood in rivers and floodplain forests                               | 116 |
| 2.6                | Estimate of costs                                       | 62 | 4.6  | Structural constructions made of wood                                   | 117 |
| 2.7                | Annual photodocumentary series – series 1 – series 9    | 62 | 4.7  | Structures made out of stone and river concrete                         | 136 |
| 2.8                | Succession or planting woods                            | 78 | 4.8  | Riparian waters – backwaters and floodplain ditches                     | 151 |
| 2.9                | Riparian strips   | 79 | 4.9  | Fishmonitoring  | 154 |
| 2.10               | Riparian strips during the age of beavers               | 85 | 4.10 | Flood protection – dikes  | 157 |
| 2.11               | German legal framework to riparian strips               | 88 | 4.11 | Flood protection – walls  | 166 |
| 2.12               | Workshops – infrastructure                              | 88 | 4.12 | Shoreline paths   | 174 |
|                    |   |    | 4.13 | Reptiles – compensary measures  | 175 |

|          |   |            |                   |  |            |
|----------|---|------------|-------------------|--|------------|
| <b>5</b> | <b>Utilizing margins - Getting the maximum out of a minimum of leeway</b> | <b>179</b> | <b>8.9</b>        | <b>Growth maintenance</b>  | <b>194</b> |
| <b>6</b> | <b>Cost estimate for construction methods</b>                             | <b>183</b> | <b>8.10</b>       | <b>Woody species along the stream - there is no unit plan</b>        | <b>194</b> |
| <b>7</b> | <b>Succession</b>   | <b>187</b> | <b>8.11</b>       | <b>Location determinants for woody plants</b>                        | <b>195</b> |
| 7.1      | What means succession at the watercourse and in the riparian forest?      | 187        | <b>8.12</b>       | <b>Reuse of woody plants</b>   | <b>196</b> |
| 7.2      | When planting is preferable to succession                                 | 188        | <b>8.13</b>       | <b>Mistaking with non-native species</b>                             | <b>197</b> |
| 7.3      | Succession and the Beaver   | 188        | <b>8.14</b>       | <b>Creating Clearance</b>  | <b>197</b> |
| 7.4      | Succession in forest compensation areas                                   | 189        | <b>8.15</b>       | <b>Benjes hedge and pollard willow</b>                               | <b>197</b> |
| 7.5      | Afforestation after planning approval decision                            | 189        | <b>8.16</b>       | <b>The planting of reeds, sedges and reeds on banks</b>              | <b>197</b> |
| <b>8</b> | <b>Planting</b>   | <b>191</b> | <b>9</b>          | <b>Seeding of grasses and weedy plants on flood protection dikes</b> | <b>199</b> |
| 8.1      | The origin of woody plants - terms  | 191        | 9.1               | Seeding method and seed transfer                                     | 199        |
| 8.2      | Legal situation in Germany  | 191        | 9.2               | Hay mulch transfer   | 199        |
| 8.3      | Availability of plants native to the area                                 | 191        | 9.3               | Hay threshing process  | 199        |
| 8.4      | Origin of reeds, tall shrubs, tall sedges                                 | 192        | 9.4               | E-Beetle   | 200        |
| 8.5      | Question of origin using the example of reeds                             | 192        | 9.5               | Excursus on robotic mowers   | 200        |
| 8.6      | Plant size and quality  | 193        | 9.6               | Seeding time   | 200        |
| 8.7      | Planting distance and depth   | 193        | 9.7               | Rapid greening versus woody seedlings (according to Joe Engelhart)   | 200        |
| 8.8      | Location/Level  | 194        | 9.8               | Seeding and maintenance tips   | 201        |
|          |   |            | <b>References</b> |  | <b>202</b> |
