

Contents

1	Introduction	1
1.1	Motivation	1
1.2	V2X Communication Systems	3
1.2.1	WiFi based Communication	3
1.2.2	Cellular based Communication	5
1.3	Open Issues and Contributions of this Work	6
1.4	Structure of this Thesis	9
2	Channel Fundamentals	11
2.1	Symbol Transmission	11
2.2	Channel Properties	13
2.2.1	WSSUS Assumption	16
2.2.2	Delay Spread and Coherence Bandwidth	17
2.2.3	Coherence Time and Doppler Power Spread	18
2.2.4	Narrowband and Wideband Communication	18
3	Stochastic and Deterministic Channel Models	21
3.1	Channel Model Concepts	22
3.1.1	Band limited Tapped Delay Line Models	22
3.1.2	Geometry Based Stochastic Channel Models	24
3.2	Common Channel Models	25
3.2.1	Small-Term-Fading Models	25
3.2.2	Channel Models for Narrowband Communications	28
3.2.3	Channel Models for Wideband Communications	31
3.3	Final Remarks	37
4	A Ray Optical Channel Model for Vehicular Communications	39
4.1	The Ray Principle	39
4.2	Ray Tracer Arithmetic	43
4.2.1	Reflection	43
4.2.2	Diffraction	45
4.2.3	Scattering	46
4.3	Common Acceleration Techniques	47
4.3.1	State of the Art	48
4.3.2	Simplifying Input Data	50
4.3.3	R-Tree Filtering	51
4.3.4	Image Source Reduction	55
4.4	Analytical Ray Tracer	56
4.4.1	Surface Visibility Relations	57

4.4.2	Specular Reflected Rays	60
4.4.3	Building Diffraction	63
4.4.4	Scattering on Buildings	64
4.4.5	Modelling Moving Obstacles	68
4.5	Validation	75
5	Channel Model Comparisons inside V2V Scenarios	81
5.1	Scenario Development	81
5.2	Link-Level Predictor	83
5.3	The Problem of Randomness	85
5.4	Results	87
5.4.1	Urban Scenarios	87
5.4.2	Highway Scenario	92
5.5	Conclusion and Remarks	100
6	A Simulator for Vehicular Communication	102
6.1	Common V2X Simulators	103
6.1.1	NS-3 Overview	103
6.1.2	Veins Overview	106
6.1.3	NS-3 and Veins Model Description	108
6.1.4	Relevance and Issues	118
6.2	A new V2X Framework	121
6.2.1	SiMoNe: Simulator for Mobile Networks	122
6.2.2	V2V Blocks	124
6.2.3	Extension for Event-Based Simulations	131
6.2.4	A PER Model for V2V Communication	133
6.3	Conclusion and Remarks	137
7	V2X Simulations in Realistic Environments	139
7.1	Relevant V2X KPIs	139
7.2	Highway Scenario	144
7.3	Urban Scenario	152
7.4	Conclusion and Remarks	167
8	Conclusion and Future Work	168
Appendix A	Path Loss Deviation from Physical Optics	172
Appendix B	Impact of Noise Barriers on the Channel Gain	174
Appendix C	Scenario Parametrisation and Runtime Comparison	176
List of Acronyms		178
Bibliography		181
