

Table of contents

Foreword..... 2

Table of contents..... 3

1 Introduction: scope of the book..... 5

2 First steps with Arduino..... 6

3 Background knowledge - Fundamentals of electrical engineering 9

 3.1 Introduction to electricity and digital electronics..... 9

 3.1.1 Electricity..... 9

 3.1.2 Circuit 10

 3.1.3 Digital electronics..... 11

 3.2 Important components in electronics 12

 3.2.1 The diode and the light-emitting diode (LED) 12

 3.2.2 The transistor 13

 3.3.3 The capacitor..... 14

 3.3.4 The resistance 15

 3.3 The multimeter: Current and voltage measurement in practice 16

 3.4 Embedded Systems..... 18

4 The Arduino Board Hardware 21

5 The Arduino Software (IDE) 25

6 Writing a program code for the Arduino 26

 6.1 Introduction to programming..... 26

 6.1.1 Block-based programming 26

 6.1.2 Basics for using the Arduino IDE 29

 6.1.3 Libraries..... 30

 6.1.4 Serial monitor..... 35

 6.2 Basics for text-based Arduino programming 35

- 6.2.1 Structure of an Arduino code..... 36
- 6.2.2 Syntax (program structure) for Arduino code..... 37
- 6.2.3 Basic operators in Arduino programming..... 37
- 6.2.4 Basic data types for Arduino programming 38
- 6.2.5 Constants and variables 39
- 6.2.5 Controlling the operation of the Arduino 41
- 6.2.6 Functions..... 42
- 6.3 Connect to the Arduino Board and Upload Code (Sketch) 46
- 7 Arduino DIY Projects 48**
 - 7.1 Project 1: A flashing LED and an SOS signal 48
 - 7.2 Project 2: Temperature-based LED light..... 53
 - 7.3 Project 3: Light-dependent control of a motor (blind motor) 59
 - 7.4 Project 4: Gas detection alarm 63
 - 7.5 Project 5: Password protected mechanical system 68
 - 7.6 Project 6: Remote unlocking mechanism 81
- Closing words 88**
- Imprint of the author / publisher 92**
