Preface.....	7
Bibliography	9
Directory of persons.....	11
1. Darwin's theory – Emergence of a world explanation model ..	23
2. Complex creation – simple theory. Lots of puzzles and no satisfying answers from established science.....	33
3. The animal and plant world underwent multiple redesigns and transformations by earth catastrophes	54
4. Procedure for an analysis and interpretation through new ways of thinking, e.g. the analysis technique of Arthur Conan Doyle's method "Science of Deduction"	59
5. New approaches for an exit strategy from materialistic science, using the example of the work of the famous biologist Rupert Sheldrake "Der Wissenschaftswahn" (The Science Delusion).....	67
6. Complex life functions, that are dependent on each other and even in terms of time are as such, open up a new explanatory model in the conclusion of emergence of material life.....	93
7. Science reduced man to a sum of food consumption and upbringing. What is behind the matter? A philosophical excursion. Simple explanations have a hard time, to find acceptance.....	100
8. Excerpts from the chorus of critics. Science stands in its own way through a narrow world view.	130
Short vita.....	145
