

Contents

1 Introduction.....	1
1.1 The LNT Assumption	3
1.2 Radiation Hormesis and Radioadaptive Response	6
References.....	12
2 Molecular and Cellular Mechanisms	17
2.1 Introduction.....	17
2.2 The Radioadaptive Response.....	19
2.3 Chromosome Aberrations.....	22
2.4 Neoplastic Transformation.....	24
2.5 Apoptosis	26
2.6 Immune Enhancement	28
References.....	30
3 Natural Environmental Radiation.....	37
References.....	41
4 Accidents, Tests, and Incidents	43
4.1 Radium Dial Painters	43
4.2 Nuclear Weapons Tests	44
4.3 Mayak and Techa River Residents.....	45
4.4 Eastern Urals Nuclear Waste Tank Explosion	45
4.5 Japanese A-Bomb Survivors.....	46
4.6 Taiwan Contaminated Buildings.....	47
4.7 Chernobyl.....	47
References.....	50
5 Medical Exposures and Workers.....	53
5.1 Radiotherapy for Noncancer Conditions	53
5.2 Diagnostic Radiation Exposures	54
5.3 Prenatal Exposures.....	55
5.4 Radioiodine Therapy.....	55

5.5	Second Tumors in Radiotherapy Patients Treated for a Primary Tumor	56
5.6	Medical Workers	57
	References	60
6	Nuclear Workers	63
	Appendix	69
	References	82
7	Biased Epidemiological Studies	85
7.1	Epidemiology Studies	85
7.2	Bias, Prejudice, and Statistical Inaccuracy	87
7.3	Pooled Studies	89
	References	90
8	Evidence Negating the Healthy Worker Effect	93
	References	100
9	Lung Cancer	105
9.1	Introduction	105
9.2	Tobacco	105
9.3	External Low LET Radiation	106
9.4	Radon General	109
9.5	Environmental and Ecologic Studies of Radon	109
9.6	Case-Control Studies of Radon	112
9.7	Underground Uranium Miners	115
9.8	Internal High LET Radiation	115
9.9	Mechanism	118
	Appendix	118
	References	126
10	Breast Cancer	135
	Appendix	139
	References	145
11	Leukemia	149
	Appendix	153
	References	161
12	Liver, CNS, and Thyroid Cancers	165
12.1	Liver Cancer	165
12.2	Central Nervous System Cancer	166
12.3	Thyroid Cancer	167
	Appendix	169
	References	182

13 Lifespan, Birth Defects, and Experimental Cancer	185
13.1 Lifespan	185
13.2 Birth Defects	187
13.3 Experimental Cancer.....	188
References.....	193
 14 Animal and Human Cancer Therapeutic Studies.....	 197
References.....	202
 15 Conclusions, Summary, and Importance.....	 205
References.....	209
