Kurzfassung	XI
Abstract	XIII
1 Introduction	1
2 Mechanical Modeling with Multibody Systems	7
2.1 Rigid Multibody Systems	8
2.1.1 Kinematics	9
2.1.2 Kinetics	10
2.1.3 Description of Rotations	12
2.1.4 Kinematic Loops and Constraints	13
2.2 Elastic Multibody Systems	18
2.2.1 Linear Finite Element Method	18
2.2.2 Model Order Reduction	19
2.2.3 Floating Frame of Reference Approach	20
2.3 Multibody Systems Toolbox Neweul-M ²	22
3 Transrapid – System Setup and Modeling Approaches	27
3.1 System Setup and Functional Principle	28
3.1.1 Mechanical System Setup	29
3.1.2 Levitation and Guidance System	35
3.1.3 Propulsion System	37
3.2 Existing Models of Maglev Vehicle Systems	39
3.2.1 Literature Overview	39
3.2.2 Cross-Section Model	44

3.2.3	Longitudinal-Section Model	47
4	Considering Guideway Elasticity in Vehicle Dynamics Simulations	53
4.1	Single Elastic Guideway Element	54
4.1.1	Vehicle Model: Rigid Multibody System	55
4.1.2	Guideway Model: Euler-Bernoulli Beam	55
4.1.3	Coupling of Vehicle and Guideway	59
4.1.4	Simulation Results	60
4.1.5	Concluding Remarks	62
4.2	Infinite Series of Elastic Guideway Elements	63
4.2.1	Mechanical Guideway Model	63
4.2.2	Mechanical Vehicle Model	66
4.2.3	Magnet Model and Controller	67
4.2.4	Coupled System	68
4.2.5	Simulation Results	70
4.2.6	Concluding Remarks	75
4.3	Influence of Magnetic Force Discretization	76
4.3.1	Magnet Modeling Approaches	77
4.3.2	Mechanical Vehicle Model	78
4.3.3	Mechanical Guideway Model	78
4.3.4	Magnet Model, Controller, and Coupled System	79
4.3.5	Simulation Results	81
4.3.6	Concluding Remarks	86
4.4	Modeling of Guideway Slopes	86
4.4.1	Physical Shift and Rotation of Guideway Elements	87
4.4.2	Interpretation as Guideway Disturbance	88
5	Driving Along Curves with a 3D Model	91
5.1	3D Model of a Transrapid Mid Section	92
5.1.1	Mechanical Vehicle Model	93
5.1.2	Mechanical Guideway Model	102

5.1.3 Magnet Model and Controller	103
5.2 Curve Trajectory Design	103
5.3 Proof of Concept with Cross-Section Model	107
5.3.1 Model Adaptations	107
5.3.2 Realization of the Vehicle Propulsion	110
5.3.3 Application of a Curve Trajectory	111
5.4 Application at 3D Model	115
5.4.1 Adaptation and Extension of the 3D Model	115
5.4.2 Application 1: Lane Change via Switches	122
5.4.3 Application 2: Magnet Failure in a Banked Curve	127
6 Conclusion and Outlook	135
Abbreviations, Symbols, and Notation	139
Bibliography	143
