Preface — VII

Part I: Fractals and graphs

Zhen-Qing Chen, Takashi Kumagai, and Jian Wang

Stability of heat kernel estimates and parabolic Harnack inequalities for general symmetric pure jump processes — 3

Alexander Grigor'yan, Eryan Hu, and Jiaxin Hu

The pointwise existence and properties of heat kernel — 27

Qingsong Gu and Ka-Sing Lau

Resistance estimates and critical exponents of Dirichlet forms on fractals — 71

Bobo Hua and Xueping Huang

A survey on unbounded Laplacians and intrinsic metrics on graphs — 103

Naotaka Kajino

Energy measures for diffusions on fractals: a survey — 119

Shi-Lei Kong, Ka-Sing Lau, Jun Jason Luo, and Xiang-Yang Wang

Hyperbolic graphs induced by iterations and applications in fractals — 143

Tim Jaschek and Mathav Murugan

Geometric implications of fast volume growth and capacity estimates — 183

Ryosuke Shimizu

Parabolic index of an infinite graph and Ahlfors regular conformal dimension of a self-similar set — 201

Meng Yang

Metrics and uniform Harnack inequality on the Strichartz hexacarpet — 275

Part II: Euclidean spaces and manifolds

Alexander Grigor'yan

Analysis on manifolds and volume growth — 299

Alexander Grigor'yan, Satoshi Ishiwata, and Laurent Saloff-Coste
Geometric analysis on manifolds with ends — 325

Feida Jiang and Xinyi Shen
A matrix Harnack estimate for a Kolmogorov type equation — 345

Songzi Li and Xiang-Dong Li
Entropy power concavity inequality on Riemannian manifolds and Ricci flow — 359

Liguang Liu and Jie Xiao
Fractional differential operators and divergence equations — 385

Li Ma and Cong-han Wang
Interior gradient estimates for mean curvature type equations and related flows — 421

Lei Ni
An alternate induction argument in Simons' proof of holonomy theorem — 443

Simon Nowak
Higher integrability for nonlinear nonlocal equations with irregular kernel — 459

Yuhua Sun and Fanheng Xu
On nonexistence results of porous medium type equations and differential inequalities on Riemannian manifolds — 493

Index — 515
